Dear Trisha,

Thank you for contacting us about your interest in developing a Cancer Memorial in one of our city parks. We certainly appreciate the attention you are trying to bring to the fight against this terrible disease. This is a very worthy effort.

Unfortunately, we are unable to accommodate your request as you have presented it. Elements in our parks are typically developed to present recreational benefits to our constituency, and development decisions are mission driven. We receive many requests for monuments and memorials of many types, but avoid permanent monuments in our park system in order to maintain the integrity of our developed parks and ensure our ability to meet our mission. I have enclosed for you a copy of our Department's Mission Statement.

We do have some opportunities to recognize interests similar to yours on a limited basis. We have a donations program that is very popular, it offers opportunities for recognition while providing direct benefit to the community and enhancing our park amenities, however it's not of the scale you are proposing. I have enclosed a pamphlet on the program for your information.

We do support programs and events such as Cancer Walks, and encourage the community to get involved. Part of our goal is to create a healthy and health-conscious community, and such events are a welcome and popular draw. One thing we would be willing to consider would be a temporary monument similar to "The Traveling Wall" that could be set up at events, and then transported to similar events in other communities. Such temporary displays are considered on a case-by-case- basis through our Special Events Committee. A temporary memorial display of this nature, similar to what you have suggested, could evoke a lot of emotion and support for your efforts, not only in Bellevue, but in communities throughout the region.

I know this is not the answer you were hoping to hear, but I also hope that you consider our suggestion as a possibility. Thank you again for contacting us and for your commendable efforts to battle a terrible disease.

Sincerely,

Jerry Nissley
Parks Resource Manager
Bellevue Parks Resource Management Division

Subject: Monument for park

Monument proposal-

Hello my name is Trisha Adams and I am the Vice President of the cancer memorial fund.
We are building monuments to memorialize cancer victims. With 7.6 million people globally who lose their battle to cancer every year, there are no monuments to honor their fight. We understand choosing the perfect place for our monument is critical, as this will become a major destination and a place for reflection, while brining awareness to the number of people this disease affects.
We plan on also becoming the hub for all cancer related events. Imagine opening/closing ceremonies for; the breast cancer 3 day, relay for life and the 100's of other events, for fundraising and awareness).

We would love an opportunity to discuss the benefits of having our monument in one of your parks.

I am attaching the picture we have created for Hong Kong.

Subject: RE: Newport Hills Park 7-24-09

Dan,

I have contacted the Newport Youth Soccer Club in regards to air horn use. They have a soccer clinic on Saturday mornings and the person who conducts the clinic failed to see the memo on air horns. She has been contacted directly and will use a whistle from now on.

The Parks scheduling office schedules the fields until 10 p.m. and lights out at 10:15 p.m. In many cases games will go over due to timeouts and/or injuries. It is our policy to have lights off at 10:15 p.m. when park scheduled. However, I will contact all adult groups again and have them do their best to finish games as best they can.

We will continue to communicate with all user groups at Newport Hills Park on the use of park.

Guess what Jon?

Three weeks ago there was another soccer jamboree of some sort and there was again an air horn.

I took your directions and called the police. After an hour and a half they had showed up.

Subject: Newport Hills Park 7-24-09

Dear Mr. Edds,

I wanted to follow up to your e-mail dated 7-26-09 regarding soccer play at Newport Hills on Friday evening July 24, 2009.

I am the Supervisor of the Field Scheduling office with the Parks & Community Services Department.

I contacted the group that had the field reserved on Friday evening and spoke with their league coordinator. He states that air horns are not part of the management of their games. It must have been a spectator and/or team supporter. He contacted the teams involved and communicated to them that air horns are not allowed and in future if a fan brings one to the game, they should silence and put away. He will also communicate to all teams in their leagues that air horns are prohibited per the parks sound ordinance. Their organization continues to strive to be good neighbors in all the parks that they use.

In the future, if you hear an air horn or other amplified sound, please call one of the following;

Bellevue Park Ranger Program (June 22 - September 15) at 425-864-1899
Bellevue Police Department non-emergency number (425) 577-5656

If an emergency please call 911.

I do apologize and regret that your evening was ruined by these events on July 24. Please in the future feel free to contact me if any other situations arise.

Subject: Newport Hills Neighborhood Park - yet again

I think it was in late June or early July I wrote to express my feelings about having an air horn going off inside the Newport Hills Neighborhood Park. What I heard back led me to believe that this was not an acceptable activity inside the City of Bellevue let alone a 4.5 acre park where neighbors back yard is about 30 feet from the play line on the soccer field.

Guess, what? Air horns continue to be operated. This morning, at around 9;30 Am there was once again an air horn going off. Three weeks ago there was another on going off. This time it was part of the official communication of the organization hosting the soccer festival. Thinking that air horns are not legal inside a small neighborhood park, or the City of Bellevue, I called the police. I was connected to a very nice lady who knew exactly how it was being used and why. How she knew this I have no idea, but she said she would send a patrol car by. I left the house an hour and a half later and the air horn was still going off. Good thing I did not have an elderly parent or a sick child that need rest. I might have really got upset.

In case any one is listening or interested, there was a meeting of the neighbors this morning. Two of our City Council members were there and guess what - they got to hear the air horn too.

Also, I realize that the members of the parks board are under the illusion that evening soccer games stop at 10:00 PM and the lights go out at 10:15. Well, this past Thursday evening, the soccer game finally ended at 10:13 and the lights went off a few minutes later. This is pretty normal behavior. I have written staff indicating that games are suppose to end at 10:00 and that referees should be notified to stop the games accordingly. Sorry to let you all know that games seldom end at 10:00.

Subject: Option A for Eastgate Park - you're kidding, right?

How is it possible that even though the public feedback for the development of the proposed Eastgate Park located east of 156th Ave NE and north of I-90 on the old Boeing property has consistently and vehemently supported retaining an area for an offleash dog park at the facility - in keeping with the area's historic primary use and the desires of the main users of this space - is being completely overlooked by city and park planners? Option B, with its three+ acre offleash area was the preferred development option by the majority of respondents to the parks development survey ... and yet, from what I understand, the recommendation is being made to go with Option A, that provides NO offleash facility at all!

Who are you people that you simply choose to ignore the wishes of tax-payers who use this park? I am furious about this decision and once again reminded why so many of us are cynical and disgusted with our government! This is not YOUR park ... this is OUR park, and with more and more families and households reporting fewer school age children but lots and lots of dogs in the immediate area as well as in Bellevue overall, it's time that the city started taking the wishes of this demographic into consideration in development planning.

The existing Robinswood offleash dag area is a travesty and anyone who has a dog will tell you that it is completely inadequate and basically laughable as an area for offleash recreation. The area is often far overcrowded and provides inadequate space to safely meet the needs of the dog-owning community who use it.

Who's interests are you representing, anyway? Clearly you don't represent the interest of the population who actually live in this city! We don't need more playing fields and expensive recreation development. What we do need is to retain and value open spaces, walking trails, and the areas that make Bellevue a livable community and not just another over-developed urban sprawl of concrete and intensive water-use artificial greenery! Are you listening to anyone other than the people who want to spend ridiculous amounts of money on unnecessary new development and the ongoing maintenance costs that that development will entail? It is OUR tax dollars - the residents of Bellevue - that is being wasted on this proposed disneyland development that you are forcing on us. And where, I'd like to know, is our representation?

I am so disgusted with this whole process .... why did you even invite public input when you so obviously could care less what the public wants?

Subject: RE: Option A for Eastgate Park - you're kidding, right?

Hi Ruby,
Thank you for your email and continued interest in the Eastgate Area Properties new park Master Plan. No design option for the new park has been chosen. We are anticipating that the Parks & Community Service Board will make a recommendation to Council at their next Board meeting. The City Council will not be asked to make a decision until the first quarter of 2010 when the environmental analysis is complete.

Public feedback has consistently and passionately supported and challenged; off-leash facilities, little league baseball, lacrosse, and aquatic facilities at your new Community Park. Informing a thoughtful, informed park design will include an understanding of existing and potential park and open space land opportunities, site analysis, level of service, demographics, recreation participation trends and community feedback. The master plan for this new park will not be determined by a public vote. Community feedback is important to help inform hard choices. We work to provide a variety of opportunities through workshops, on-line surveys, email and phone to communicate your preferences.

All the design alternative recommendations for the new Eastgate area park include off-leash facility improvements and expansion, if not on site then within a ¼ mile via a pedestrian walking path. We understand that the Robinswood facility is less than adequate for you and look forward to expanding and making improvements at the facility if Council approves funding. We continue working on the off-leash study and have proposed several options for a number of additional off-leash facilities throughout the City. The study, Park & Community Services Board and Council feedback is on-line if you would like to review at: http://bellevuewa.gov/off-leash_study.htm .

Staff forwarded three viable design options for the Eastgate Area new park. Based on all the park system and property information available, including community feedback, Staff concluded that alternative A;

- Is most consistent with the original intent of the purchase of the property and goals outlined in the City's Park & Open Space System Plan;
- is most consistent with the recreational priorities identified in earlier discussions by the Park Board and City Council;
- most effectively responds to the need for additional, high-quality sportsfields (synthetic fields require no water);
- when combined with the proposed off-leash improvements in Robinswood Park, and throughout the City, responds to the community's desire for more and better off-leash facilities in Bellevue;
- can be implemented in a manner that is both sensitive to the neighbors and responsible to the environment.

If you haven't already shared your design preferences for this new park on the survey, please do so on the project web site at: http://www.bellevuewa.gov/eastgate_area_properties_master_plan.htm . I will continue to update the web-site with the master planning information and status including Park Board and City Council meeting notices. If you are interested in following the master planning design process, the email alert notice on the project web-site will email you when the project web page is updated with new information.

Thank you for taking the time to write to us!

Subject: New Eastgate park area

Hello Pam,
I understand that Option A was selected for the new park design even when public opinion chose Option B.
Shared information: (On Sep 10th, the Bellevue Park Department Staff presented the summary of the "public input" they have received on the Eastgate Area Properties Park (EAPP) and they also made their "professional?" recommendation on which option should be adopted.

The public, by a narrow margin, selected option "B", the one with Off-Leash Area (OLA). The second choice was Option "A", the one with 2 lighted multi-use sports fields. Despite the public's preferences, the Park Staff is recommending that Option A be adopted. They site that this Option includes an obligation to expand OLAs at Robinswood, to compensate for the loss of off-leash activity at EAPP.)

I am disappointed in the talk to extend the OLA in Robinswood as an alternative = there is not a level space for it AND parking is a huge issue along with the water not available most months. I also understand that the average age of Bellevue residents is 45 or older, why then have 2 sports areas in a new park?

Please make note that I again support an OLA area in the new Eastgate Park.

Thank you very much for your assistance,
Barbara

Hi Marc,
Thank you for your email and continued interest in the Eastgate Area Properties new park Master Plan. No design option for the new park has been chosen. We are anticipating that the Parks & Community Service Board will make a recommendation to Council at their next Board meeting. The City Council will not be asked to make a preferred alternative decision until the first quarter of 2010 when the environmental analysis is complete.

I agree, all open space and undeveloped land should not be developed. Our open spaces, environmentally sensitive and or unique natural areas are highly valued and integral to the livability of our City. The City takes protection and preservation of our environment seriously. Approximately 80% (2000 ac of the 2500 ac) of Bellevue's Park & Open Space is natural. All the design alternatives propose to most intensively develop the southern portion of the property, the approximate 9 acres, underlain by a former landfill. The proposed synthetic sportfields require no fertilizer. The design alternatives propose less intensive, passive activities preserving mature woodlands, wildlife habitat and buffers to the single family residences to the North and West.

All the design alternative recommendations for the new Eastgate area park include off-leash facility improvements and expansion, if not on site then within a ¼ mile via a pedestrian walking path. We continue working on the off-leash study and have proposed several options for a number of additional off-leash facilities throughout the City. hi, my name is marc peterson, i have lived at 16246 se 29th street in bellevue since 1966. I feel i want to comment on the long city process of deciding on what to do with the eastgate area properties.I find it a real shame that any and all open space or undeveloped land in the city of bellevue must be developed. please don't get me wrong here, i know that times change and we need to keep kids busy so they do not get into bad trouble, however in this day and age of habitat restoration, salmon recovery, and all things green, i do not believe over developing all open space to be in the best interest of society as a whole. the maintenance, fertilizers,etc. wil only flow into phantom lake! i could tell you stories of how bellevue used to be decades ago and even when my folks where young, but everyone has those stories. i know progress marches on but it really saddens me to realize there will not even be a local place to walk my very loved dogs!

Subject: Saving McCormick Park from destruction

Are there any citizen groups, volunteers, agencies, or residents in Bellevue who might be interested in trying to save McCormick Park??

As local neighborhood people who wish to save the trees, shrubs, walking paths, and city amenities and investments, we want to connect with other people who feel the same way we do.

Sound Transit has designated most of McCormick park for destruction to put the Light Rail commuter trains through the park; and use it as a construction site. About 70% of the park will be permanently destroyed for a railroad track.

Who can we talk to?

Best regards, Mary & Dwight Schrag

Subject: RE: Saving McCormick Park from destruction

Mr. and Mrs. Schrag,

Your e-mail (below) regarding McCormick Park and Sound Transit was forwarded to me for a response. I have been the lead staff person in Parks & Community Services tracking the East Link project for potential impacts to parks throughout Bellevue.

As you note, the potential impact to McCormick Park is significant. The City has studied the route alignment options that Sound Transit has proposed with park impacts in mind. Based on that, the City formally commented to Sound Transit that even with the park mitigation proposed by Sound Transit in the Draft Environmental Impact Statement (DEIS), that area may cease to function as a viable park and recreation facility and that Sound Transit should complete a more detailed avoidance analysis than what was published in the DEIS.

As the analysis of downtown rail alignments proceeds over the next several months, the City will work with Sound Transit to avoid park impacts to the greatest extent possible, and if avoidance is not possible, to mitigate the park impacts so that the community's access to parks is maintained.

I am not aware of any community groups actively organized around McCormick Park at this time. I will keep your e-mail address on file though and let you know if I do hear of something in the future.

Thank you for your interest in McCormick Park,

Camron Parker

Subject: Re: East Link Construction Impact on Residential Neighborhoods and Businesses North and East of McCormick Park

Mr. Bogey,

Thank you for your informed inputs and concerns. You have described it well. Neighborhoods Matter. People matter. Every resident is somehow impacted by this. We don't believe these severe impacts were addressed properly or adequately in the East Link DEIS. Sound Transit needs to come clean on this; and inform everyone **NOW of Business and Neighborhoods impacts in all of Bellevue's Downtown areas.**

We believe a **similar level of extreme neighborhood disruption, traffic problems, noise and SAFETY risks** will occur during construction of the MASSIVE above-grade cement support towers for the Overhead Rail Line portions; in McCormick Park and along NE 12th St + through your neighborhood.

In addition, **severe construction impacts of building so many, many high-tension electrical line/steel towers at 15-foot +/- heights, to be installed all along the streets of our pristine, tree-lined downtown** Bellevue business districts and neighborhoods, along 108th and 110th Ave NE; and right through McCormick Park. **Destruction of most McCormick Park trees, shrubs, flower gardens, seating areas, walkways, and park amenities will also result.**

These galvanized steel high-tension electrical towers will create a gross-appearing power-grid overhead, and have a stark industrial downtown feeling; and **permanent visual blight on our city's landscape**; as well as an even worse "planning disasters" during the construction phase and operational 100-year timeframe.

Thanks for pointing out the extent of TUNNELING construction negative aspects. These will be incredibly bad for many years to come. Sound Transit and Bellevue Planning and Transportation need to address these serious impacts, SOON.

Keep you inputs coming and share with your neighbors, too.
Regards, Dwight & Mary Schrag

Subject: Re: East Link Construction Impact on Residential Neighborhoods and Businesses North and East of McCormick Park

The worst construction impact will be if it is a tunnel in the NE 12th area. The tunneling machine will either be assembled in McCormick park and moved into alignment in the middle of the 108th and NE 12th intersection at about a 60 foot depth or it will be assembled there. That is if they tunnel north to south. If they go south to north it will be disassembled in our area. If they go north to south the muck will be trucked out through our area. The design is for two 20 foot diameter tunnels so we could be having one machine going north and another machine going south. If they were in a great hurry you could have four machines going boring toward each other and meeting in the middle and requiring disassembly somewhere in the region of the transit station.
The least construction impact will be a surface line but it will cause a traffic mess where it meets intersections because it is going north-south while traffic goes east-west.
Figure on a five year construction mess.

Subject: East Link Construction Impact on Residential Neighborhoods and Businesses North and East of McCormick Park

Dear Cathy, Betina, Mr. Bogey, Bob & Barb, all your neighborhood interested parties, et al,

Some of your good neighbors (and businesses) to the North & East of you could be in for a huge, nasty surprise for East Link. Not sure if Sound Transit, Sue Comis and Katie Kuciemba told you this when they met with you last month?? If not, you should bring them back to show you and explain the "dirty" details. **Strongly suggest you have a Transportation Specialist from Bellevue sit in**, so you get accurate explanations & truthful details. Let us know what you already know; or what you can find out. Details have not been forthcoming on this plan.

Here's what it looks like to us: We've studied the Construction Site layouts for McCormick Park provided by CH2M Hill (whose business office is on 112th Ave NE & NE 10th St.) and Parsons Engineering for East Link. To us, it doesn't look good for all your neighbors and long-time friends to the North and East of you. The construction will go on for years at this construction staging site in McCormick Park. Maybe you were all aware of this, already??

It appears to us, on the sketchy, incomplete, site layout drawings, these neighborhood areas are slated to be used for an **"ACCESS ROAD" routing for trucks, railroad supplies, cement trucks, construction crews, earth moving vehicles, tree removal vehicles, construction crews, etc.** This access-line route <u>will likely be used to reduce or avoid any impacts of construction vehicles moving onto NE 12th St</u>,, (which has much traffic already), but **push it into the placid areas where people live along so-called "quiet residential" streets, past churches, businesses, and other neighborhoods to the North and East.**

111th Ave NE, going North and connecting to 110th Ave NE, about 4 blocks to the North, shows to be a designated "Access Road" for construction vehicles and crews. Then it goes North to: "it's not clear where it goes from here since drawing cuts off at this point. **"Surprise!!** At the connection point, there's a large cul-de-sac or traffic circle shown on the drawings.

In addition, along 112th Ave NE and the streets along I-405 (West side) the drawings show additional "Construction Staging" to the North; and **"future street-road modifications".** This looks like more

construction equipment access routing, but not "officially designated" yet. If this is correct, hundreds of people and businesses in all these neighborhood areas will be impacted by construction traffic, and heavy vehicles routed through these streets.

These types of homeowner-impacts, and business impacts, including Safety of residents and pedestrians, traffic issues, dust, dirt, noise, debris, street modifications, etc. should have been shown clearly, at some distinct level of detail in the DRAFT EIS for East Link. Go figure? How can people be expected to comment re: East Link DRAFT EIS if there's no details to comment about??

Check it out with your City officials and Bellevue Planning Departments. Dwight & Mary
