

Assisted Listening Devices

Assisted listening devices are available at no cost to visitors attending meetings at Bellevue City Hall. These devices help amplify sound for people who may have difficulty hearing. We provide this equipment to support the accessibility and participation of citizens in the variety of public meetings that occur at Bellevue City Hall.

About The Devices:

1. We have a variety of models available for your use.
2. Advance reservations are not required. Devices are available on a “self-service” basis from our kiosk located in the building’s concourse on the first floor.
3. Instructions for using the devices as well as a supply of backup batteries are also located at the self-service kiosk.
4. Look for the kiosk with the bright green sign located at the end of the building concourse.
