I am doing some research hoping to find a COTS product that does clip-ship for vector layers. It sounds like ERDAS Apollo might do the trick. Is this true? How much does Apollo cost? What are some of the advantages of Apollo?

We currently are an ESRI-centric shop, but currently use an Autodesk Mapguide solution as our internal map browser. We hope to learn more about your product.

---

**Bridle Trails Subarea**

**Current Statistics**
- Subarea Size: 2,031 Acres
