

East Link Extension

Field Work Alert

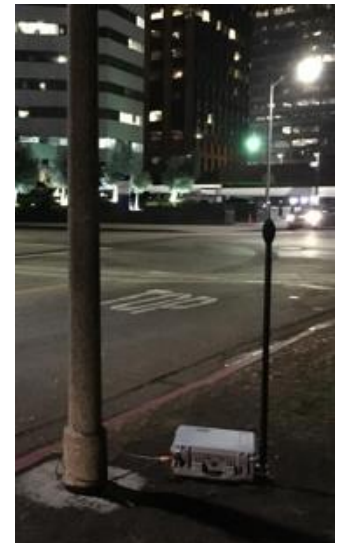

March 28, 2017

Noise monitoring happening near you

During the week of April 10th, Sound Transit’s noise and vibration contractor, WSP / Parsons Brinckerhoff, will be performing noise monitoring at Enatai Beach Park (3519 108th Avenue SE, Bellevue) to document existing ambient noise levels in the vicinity of I-90.

What to expect:

- Ambient noise monitoring equipment is scheduled to be placed at two locations within the park in early April (see map below of approximate locations).
- Noise monitoring equipment, consisting of a microphone and data logger, will be securely placed in outdoor areas. The equipment will be placed near the edge of the park, away from recreational activities, traffic and circulation.
- Noise monitoring equipment monitors sound levels and does not record sounds in the area.
- Monitoring consists of logging outdoor noise levels for up to four days.

Typical noise monitoring equipment: microphone and data logger

Approximate locations of noise monitoring equipment shown as red circles. Noise monitoring equipment will be placed in 2 locations near the park boundary.
