

GENERAL INFORMATION REGARDING USE OF OPTIONAL DNS PROCESS

When the SEPA field indicates a **Determination of Nonsignificance (DNS)** is expected, the optional DNS process is being used and a DNS is likely. This may be the only opportunity to comment on the environmental impacts of the proposal. The proposal may include mitigation measures under applicable codes, and the project review process may incorporate or require mitigation measures regardless of whether an Environmental Impact Statement (EIS) is prepared. The Threshold Determination will also be noticed in a subsequent issue of this Weekly Permit Bulletin. A copy of the subsequent Threshold Determination for the proposal may be obtained upon request.

EIS Required: On April 30, 2015, the Environmental Coordinator for the City of Bellevue, serving as lead agency, published a Notice of Determination of Significance, indicating that this proposal could have a significant adverse impact on the environment and required preparation of an Environmental Impact Statement (EIS) under Revised Code of Washington (RCW) 43.21C.030(2)(c). On January 28, 2016, the lead agency issued a Phase 1 Programmatic Draft EIS, which evaluated alternative methods to achieve PSE's project objectives. A Phase 2 Draft EIS has been prepared to analyze PSE's proposal and alternatives proposed by PSE. The EIS is not a permit - it is one of many sets of information permitting agencies will consider as they decide whether to approve the project and issue necessary permits.

Approvals required: Local permit review and approval within each affected jurisdiction. The Energize Eastside EIS is not a permit - it is one
