Subject: Disapprove PSE's build energize Eastside application

I am writing to ask that the city NOT approve PSE's application to build Energize Eastside because: 1. It is unnecessary and wasteful of ratepayer funds. 2. It is risky to install tall power poles within feet of two half-century-old petroleum pipelines. 3. It damages communities and the environment by removing thousands of valuable urban trees. 4. There are less costly ways to enhance the reliability and resiliency of the Eastside power grid.

Please notify me when any Bellevue public hearing for this project is announced.

Sincerely,
Ying Worries

Subject: Don't cut the trees

I don't know why the city ever sold PSE to a foreign country for them to make profits on our loss. If you cut 300 trees, not only will it destroy PSE reputation but there will be follow up ramifications. What you propose is unnecessary, will destroy our environment, will ruin the privacy and Health of residents in the area. Since you live in another country, it doesn't affect you. I pray you will do the right thing and instead of destroying trees, property values, the environment and the city in which WE live select the alternative method presented to you. Do the right thing. Greed always has ramifications in one's life. Please keep me posted When you change your mind so I can post around the neighborhoods that you turned out to be a good neighbor instead of a foreign nightmare.

All the best,
Michele

Subject: Opposition to Energize Eastside

Dear Ms. Bedwell,

I am writing to voice my STRONG opposition to the new Energize Eastside project proposed by Puget Sound Energy. I am raising a family in the city of Bellevue and was born and raised in this city many decades ago. Bellevue has always represented a clean, safe, beautiful city to me and I want to continue that legacy for my family. I am currently serving the City of Bellevue as a Bellevue Diversity Advisory Network member and contribute to the vibrancy of Bellevue.

Energize Eastside is a disastrous, unnecessary plan. It will destroy beautiful neighborhoods and pose a SIGNIFICANT safety risk to our children via the exponential increase in voltage (EMF and other carcinogenic triggers). There is also a significant fire risk as the project is close to a petroleum pipeline.

There is no need for Energize Eastside to proceed in Bellevue. I am joining a huge number of concerned citizens to oppose this plan.

Regards,
Seema Bahl

Subject: Power lines on 148th

Hello, my property backs up to 148th Ave. and I am person of record from going to the meetings about power lines for a few years. A few years ago I requested someone come and see if the cedar tree would be saved behind out property. Someone came and looked at it and I was told it would be saved. Now I feel like I haven't heard much on the latest plan for the power lines after it was held up in court. Are there the same plans as before? Will the tree be saved? I haven't received much information lately, am I still a person of record, or is that expired?

As well, I have now been told that because of the proximity to power lines, people with FHA loans are no longer able to buy property close to power lines. Is this something that has been looked at by the city now? I was told that this was not the case before, but new regulations have been put in place for home loans.

If this is not the correct email for these questions, please let me know who to forward them to, are there construction signs up with phone numbers about who to contact?

Thanks for your time,
Lynette Friesen

Subject: RE: Energize Eastside CUP and CALUP

Mr. McFarland:

We strongly object to the timeframe that is outlined in your letter.

As you know, this matter has been pending for about five years. The staff recommendation is a critical element in these proceedings and to allow only six days between that recommendation and a prehearing conference is highly prejudicial and inappropriate, as well as only 21 days between the recommendation and the public hearing. We note that the staff has had years to work on its report and the public should have a reasonable time for review of that document. We request a minimum of sixty days between the recommendation and the public hearing to allow for reasonable preparation for a hearing and review of the staff recommendation. Because the staff report will apparently only analyze the south segment of the project, there is certainly no reason for a rush in decision making.

In addition, please be advised that as soon as the Hearing Examiner takes jurisdiction of this matter we will be making a motion to dismiss or for continuance because the current proposal only includes one segment of the project and not the whole proposal as discussed in over four years of review. We have made this objection continuously for the past sixteen months without reply from the City.

Mr. Aramburu,

In response to your November 21, 2018 email correspondence with Heidi Bedwell, please note that the City of Bellevue's Development Services Department (DSD) anticipates that it will publish the Staff Report and Director's Recommendation for the Energize Eastside South Bellevue Segment Conditional Use Permit (CUP), along with the Director's Decision for the Critical Areas Land Use Permit (CALUP), on Thursday, January 10, 2019. DSD also anticipates that it will notice the public hearing on the Process I CUP for Thursday, January 31, 2019, with a pre-hearing conference before the Hearing Examiner calendared for Wednesday, January 16, 2019 at 10:00 a.m. Official notice of both the pre-hearing conference and the public hearing will be provided upon publication of the Director's Recommendation/Decision.

DSD is providing you with this information as a courtesy and per your request, so that you can plan your schedule around the above-listed dates accordingly. If anything changes regarding the anticipated schedule noted above, then I will provide you with an update.

Sincerely,

Matt McFarland

Subject: RE: Energize Eastside CUP and CALUP

Mr. McFarland:

Will you kindly clarify who you are representing in this matter, DCD or the Hearing Examiner? Please also advise how the Hearing Examiner for this proceeding will be selected and by whom. Has any decision been made on which Examiner will be assigned to this matter?

Thank you.

Subject: RE: Energize Eastside CUP and CALUP

Mr. Aramburu,

Thank you for your comment, which DSD will include in the Department file that will be lodged with the Hearing Examiner prior to the public hearing. Also, I appreciate your advanced notice that your clients intend to bring a Motion before the Hearing Examiner to change, continue, or dismiss the Process I public hearing date. As explained below, DSD anticipates the January 10th (publication), January 16th (pre-hearing conference), and January 31st (Process I public hearing) dates provided below, but I will let you know if these anticipated dates change so that you and your clients can plan accordingly.

Best regards,

Matt McFarland

Subject: RE: Energize Eastside CUP and CALUP

Mr. McFarland:

We strongly object to the timeframe that is outlined in your letter.

As you know, this matter has been pending for about five years. The staff recommendation is a critical element in these proceedings and to allow only six days between that recommendation and a prehearing conference is highly prejudicial and inappropriate, as well as only 21 days between the recommendation and the public hearing. We note that the staff has had years to work on its report and the public should have a reasonable time for review of that document. We request a minimum of sixty days between the recommendation and the public hearing to allow for reasonable preparation for a hearing and review of the staff recommendation. Because the staff report will apparently only analyze the south segment of the project, there is certainly no reason for a rush in decision making.

In addition, please be advised that as soon as the Hearing Examiner takes jurisdiction of this matter we will be making a motion to dismiss or for continuance because the current proposal only includes one segment of the project and not the whole proposal as discussed in over four years of review. We have made this objection continuously for the past sixteen months without reply from the City.

Mr. Aramburu,

In response to your November 21, 2018 email correspondence with Heidi Bedwell, please note that the City of Bellevue's Development Services Department (DSD) anticipates that it will publish the Staff Report and Director's Recommendation for the Energize Eastside South Bellevue Segment Conditional Use Permit (CUP), along with the

Director's Decision for the Critical Areas Land Use Permit (CALUP), on Thursday, January 10, 2019. DSD also anticipates that it will notice the public hearing on the Process I CUP for Thursday, January 31, 2019, with a pre-hearing conference before the Hearing Examiner calendared for Wednesday, January 16, 2019 at 10:00 a.m. Official notice of both the pre-hearing conference and the public hearing will be provided upon publication of the Director's Recommendation/Decision.

DSD is providing you with this information as a courtesy and per your request, so that you can plan your schedule around the above-listed dates accordingly. If anything changes regarding the anticipated schedule noted above, then I will provide you with an update.

Sincerely,

Matt McFarland

Subject: RE: PSE North/Bridle Trails

Keri,
As I stated in my message to Heidi below, I would like to know when PSE will file an application for the Northern segment of the PSE project.

If you do not know an approximate date, then let me know who I should contact. I assume that someone at PSE has an answer to my question.

I cannot imagine that PSE does not know an approximate date or date range of filing.

Thank you.

Loretta

Subject: RE: PSE North/Bridle Trails

Hi Loretta,
We do not know when PSE will be submitting their permits. PSE staff are your best sources of information on this topic. As before, please contact Keri Pravitz (cc'd on this message) regarding PSE's intentions for permit submittal.

Subject: PSE North/Bridle Trails

Hi Heidi,

I want to provide the Board of the Bridle Trails Community Club with a timetable of the PSE project.

PSE filed an application in September 2017. Later we learned that PSE decided, unilaterally with no notice to the residents, to divide the PSE project into two segments – South and North.

We are waiting for PSE to file an application for the North segment which includes the Bridle Trails area. Do you have a date by which PSE will file the application. If you do not, then who should I contact.

Thank you.

Loretta
