

**2027-2032**  
**Capital Improvement Program**  
**Project Detail Sheets**

This report includes details about the city's Capital Improvement Program projects over the period 2027-2032. These projects are included in the proposed Preliminary Budget as submitted to the City Council. They are organized by CIP portfolio. Each project detail sheet includes a description of the project, the project's status, location, and strategic target area, the proposed project spending by phase, and a funding plan.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### G-125-Innovation

|                                          |                                            |
|------------------------------------------|--------------------------------------------|
| Strategic Target Area: Vibrant Economy   | Status: In Progress                        |
| Department: 090 - Information Technology | Location: City Hall                        |
| Portfolio: General                       | Program: G - Transformation and Innovation |

#### Description and Scope

This proposal seeks to establish a citywide Innovation fund to allow city staff to pilot new innovative approaches to service delivery. Governed by a new multi-departmental steering team, pilots would be approved by the steering team and seeks to fund 2-5 innovative pilots per biennium, giving staff the ability to try new technologies, systems, and processes. If successful, staff can propose ongoing funding sources in subsequent budget cycles.

While we expect each program that is approved to be different, they will be required to 1) support and drive innovation in service delivery 2) show clear goals, objectives and innovation 3) Pilot specific things within a well defined timeframe 4) Have endorsements from impacted departments for staff time and needs 5) Address what happens when the pilot concludes.

This CIP seeks to drive and support enhanced innovation across the city and to fund it at a level that encourage approved teams and projects to explore news ways of working.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### G-94-Enterprise Application Replacement Reserve

Strategic Target Area: High Performance Government

Status: In Progress

Department: 090 - Information Technology

Location: City Hall

Portfolio: General

Program: G - Transformation and Innovation

#### Description and Scope

This proposal supports Council vision of High-Performance Government, specifically the long-term financial strategy to respond to future operating and capital needs of the City. The City of Bellevue relies on enterprise applications used by all staff and are necessary for the efficient and effective operation of the city. The CIP will be used to support planned replacements of the Financial and Human Resources Information System (JD Edwards), the Enterprise Asset Management System (Maximo), the city-wide Point of Sale (POS) system, city website, engagement platforms, and data platforms. Collectively these applications cost around \$30 million to procure and implement in 2022 dollars. Inadequate replacement funding hampers the ability to respond to future business needs in an ever-changing technology industry. Most enterprise applications are moving to subscription models, which will require adjusted funding models in subsequent budget cycles.

| Portfolio:             | General                          | Program:  | G - Predevelopment Investment |

#### Description and Scope

Establishes a CIP funding mechanism for early-stage analysis of strategic initiatives before formal project adoption. Supports feasibility, business case development, due diligence, and early sustainability and resilience planning. This request will support predevelopment work that occurs before a project is formally established in the CIP. These efforts are often driven by executive priorities and require staff time for analysis, coordination, and evaluation that cannot be charged to an existing project.

| Department: 065 - Finance & Asset Management       | Location: Citywide                                    |
| Portfolio: General Municipal Facilities            | Program: GMF - Facility Systems Lifecycle Replacement |

#### Description and Scope

This proposal will fund the replacement of underground fuel storage tanks at the Bellevue Service Center and the emergency backup diesel generator tank at City Hall. These tanks will enable fuel to be accessible for vehicles, equipment, and emergency generators so they can deliver services. Replacement reduces the potential risk of contaminants leaking into the environment and reduces the financial costs to the City should tanks experience issues.

### G-113-Facility Operations Major Maintenance Plan

|                                                    |                                                       |
|----------------------------------------------------|-------------------------------------------------------|
| Strategic Target Area: High Performance Government | Status: In Progress                                   |
| Department: 065 - Finance & Asset Management       | Location: City Hall                                   |
| Portfolio: General Municipal Facilities            | Program: GMF - Facility Systems Lifecycle Replacement |

#### Description and Scope

Projects in the Major Maintenance Plan include equipment & building system replacements, repairs and upgrades, and minor remodels at City Hall and the Bellevue Service Center that are beyond the scope of normal maintenance and operations. In 2024, and again in 2025/6 as part of our City Hall remodel master planning efforts, an updated professional facility condition assessment was conducted to evaluate the current condition of building structures, site pavement, roofing, building envelopes, and equipment. This proposed CIP budget incorporates the information from these assessments, which identified high priority projects and a recommended time frame for completion. Projects have been planned each year to address the highest priorities and align with other projects to reduce rework and create efficiencies.

### G-121-Electric Vehicle Infrastructure

|                                                                 |                                                      |
|-----------------------------------------------------------------|------------------------------------------------------|
| Strategic Target Area: High Quality Built & Natural Environment | Status: In Progress                                  |
| Department: 065 - Finance & Asset Management                    | Location: City Hall                                  |
| Portfolio: General Municipal Facilities                         | Program: GMF - Sustainability and Climate Resilience |

#### Description and Scope

This project will repair City Hall's broken EV stations, standardize software and maintenance, maximize parking space access to charging ports, increase access to underserved departments, and add high speed charging for enhanced performance and system redundancy. Adding 20 electric vehicle charging ports will allow departments to purchase EVs for light-duty fleet, which will further the achievement of ESI goals.

| Department:            | 065 - Finance & Asset Management         | Location: | Bellevue Service Center (BSC)               |
| Portfolio:             | General Municipal Facilities             | Program:  | GMF - Sustainability and Climate Resilience |

#### Description and Scope

This project upgrades equipment that is at the end of its useful life into a state-of-the-art heating and cooling system that employs renewable electricity instead of fossil fuels. An advanced heat recovery system will provide cooling in the Fleet Maintenance Shop, increasing productivity during summer heat waves. Adding 20 electric vehicle charging ports will allow departments to purchase EVs for light-duty fleet, which will further the achievement of ESI goals and compliance with the WA state Clean Buildings Act.

### G-124-City Hall Remodel

|                                                    |                               |
|----------------------------------------------------|-------------------------------|
| Strategic Target Area: High Performance Government | Status: In Progress           |
| Department: 065 - Finance & Asset Management       | Location: City Hall           |
| Portfolio: General Municipal Facilities            | Program: GMF - Major Projects |

#### Description and Scope

The proposal covers the comprehensive efforts required for the Bellevue City Hall remodel. Key activities include addressing needed major maintenance to maintain operational continuity, strategizing project roadmap, and managing implementation from design through construction, along with change and move management to support staff transition. It is assumed that existing City facilities will be utilized as temporary workplace during construction, with the potential need for limited off-site leased space for specialty groups.

It also funds interim space optimization at both City Hall and Bellevue Service Center to augment space capacity during the remodel while long-range planning is underway, addressing immediate needs and laying the groundwork for a future workplace strategy. Physical modifications in existing public areas and workplace are not currently included in the proposal but are being considered and evaluated separately. Increasing parking space capacity is also excluded.

| Portfolio: General Municipal Facilities            | Program: GMF - Sustainability and Climate Resilience |

#### Description and Scope

This CIP project provides phased expansion of EV charging infrastructure at City Hall and BSC. Scope includes installation of additional Level 2 and potential high speed chargers, upgrades to electrical service and distribution panels, conduit and trenching work, software and management systems, backup power generation (at BSC), utility coordination, and commissioning. Work also includes load analysis, engineering, permitting, procurement, construction, and integration with existing EV infrastructure. Project sequencing will align with facility improvements and fleet replacement cycles to minimize rework and optimize deployment. Priorities are based on projected fleet demand, electrical capacity, and readiness of each site.

| Portfolio: General Municipal Facilities            | Program: GMF - Tenant-Driven Improvements |

#### Description and Scope

This project funds tenant driven improvements at General Municipal facilities. Current scope includes ADA assessments, remediation of identified accessibility barriers, installation of new employee parking gate systems at the Bellevue Service Center, and security enhancements at City Hall such as upgraded access control, cameras, and related improvements. Work includes planning, assessments, design, permitting (if needed), procurement, installation, commissioning, and closeout. Prioritization is based on safety, compliance requirements, operational needs, and coordination with other CIP projects to avoid rework and maintain continuity of operations.

# 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

## G-126-I-405 Non-Motorized Crossing

Strategic Target Area: Safe & Efficient Transportation System Status: In Progress  
 Department: 040 - City Manager Location: Downtown  
 Portfolio: Grand Connection Program: GC - Grand Connection

### Description and Scope

This project funds the City of Bellevue's participation in the design development of a new non-motorized crossing (multi-purpose path) of I-405 in the vicinity of NE 6th Street to be implemented through a public-private partnership. Funding created a new project manager position within the Transportation Department who is Bellevue's point of contact and a collaborative member of the team responsible for the design of the new crossing. Bellevue's project manager will be a project advocate helping to advance the project's design phase and facilitate coordination between the design team, WSDOT, Bellevue staff, and other stakeholders. This proposal also funds staff time from various departments for project review and coordination, permitting, property acquisition, outreach and communications, and also funds independent review and design services confirming that the proposed design is compatible with the Grant Connection Framework and other city plans and standards

### G-130-East Landing

|                                                               |                                |
|---------------------------------------------------------------|--------------------------------|
| Strategic Target Area: Safe & Efficient Transportation System | Status: In Progress            |
| Department: 040 - City Manager                                | Location: Downtown             |
| Portfolio: Grand Connection                                   | Program: GC - Grand Connection |

#### Description and Scope

The East Landing project completes the transition from the Grand Connection Crossing project to Eastrail regional trail. Specifically, this project will design, permit, and construct a non-motorized bridge segment linking the Grand Connection Crossing from 116th Ave NE to the proposed elevated structure on the adjacent parcel to the east. This CIP is crucial in connecting the work of G-126 to Eastrail.

| Department: 040 - City Manager                                | Location: Downtown             |
| Portfolio: Grand Connection                                   | Program: GC - Grand Connection |

#### Description and Scope

Portfolio Contingency provides funding to address unforeseen costs, emerging needs, and scope changes that arise with the Grand Connection Crossing CIP portfolio. Funding will be allocated as needs are identified and evaluated through established capital planning and budget processes. The contingency is intended to provide flexibility and financial capacity to maintain project schedules, address critical risks, and support successful delivery of the adopted CIP.

### G-117-Parks Operations Facility

|                                                                 |                                             |
|-----------------------------------------------------------------|---------------------------------------------|
| Strategic Target Area: High Quality Built & Natural Environment | Status: In Progress                         |
| Department: 100 - Parks & Community Services                    | Location: Bridle Trails                     |
| Portfolio: Parks & Community Services                           | Program: PCS - Park Development & Expansion |

#### Description and Scope

The proposal funds the planning, design, and construction of a new park operation and maintenance facility. The current facilities housing staff and equipment are inefficient and inadequate in size. The deteriorated structures are well beyond their useful life. They do not meet ADA or current land use requirements. A well-maintained parks system is highly valued by the community and park operating and maintenance staff are crucial to ensuring that parks are effectively and safely managed and maintained. The new facility currently in design will improve the performance of municipal buildings and sites (ESI Strategy). New building design and construction will ensure the facility meets current building code, Clean Building Act and Green Building LEED O&M Gold performance standards.

| Portfolio: Parks & Community Services                           | Program: PCS - Park Development & Expansion |

#### Description and Scope

Current redevelopment in BelRed has resulted in new residential neighborhoods growing up around light rail stations. The BelRed Subarea Plan directs parks and trails to be built alongside restored creeks to serve these new neighborhoods. This project advances that goal through property acquisition and park design and construction. Project goals include, but are not limited to, the West Tributary corridor, Goff Creek Corridor, the 130th Civic Plaza, and Eastrail connections.

| Department: 100 - Parks & Community Services                    | Location: Northwest Bellevue                  |
| Portfolio: Parks & Community Services                           | Program: PCS - Waterfront & Destination Parks |

#### Description and Scope

Funding of this project supports planning, design and construction for phased implementation of the Meydenbauer Bay Park adopted master plan. Elements of the master plan include marina reconfiguration, parking, shelters, shoreline restoration, boardwalks, viewing platforms, and the Grand Connection park entry. The City Council defined a scope for the second phase of development of June 3, 2025, and directed staff to proceed to the design. Grants to support future phased development will be sought to further leverage local funding.

| Department: 100 - Parks & Community Services                    | Location: West Lake Sammamish                 |
| Portfolio: Parks & Community Services                           | Program: PCS - Waterfront & Destination Parks |

#### Description and Scope

This proposal funds the continued acquisition, planning and development of Bellevue's first public park on Lake Sammamish. Increasing public access to Bellevue's abundant, but mostly privately owned waterfront, is consistently identified in resident surveys as a top desire for future park development. The park, when developed, will complete the eastern terminus of the city's Lake to Lake Greenway Trail providing public access to 390 linear feet of public water access where none currently exists.

### P-AD-107-Ashwood Park Development

|                                                                 |                                             |
|-----------------------------------------------------------------|---------------------------------------------|
| Strategic Target Area: High Quality Built & Natural Environment | Status: In Progress                         |
| Department: 100 - Parks & Community Services                    | Location: Downtown                          |
| Portfolio: Parks & Community Services                           | Program: PCS - Park Development & Expansion |

#### Description and Scope

This project funds a re-envisioning of Ashwood Park. Ashwood Park is a 3.5-acre parcel located in the Ashwood District in Downtown Bellevue, with Bellevue Regional Library to the east, KidsQuest Children's Museum and multi-family housing to the west, McCormick Park to the north and additional multi-family housing (both existing and additional in permitting pipeline) to the south. An update of the 1990 adopted master plan has begun. Due to growth since that time, the amount of park space per Downtown resident has decreased from 800sf to 100sf – driving significant need to this partially developed park space. Tasks include broad public outreach, site analysis, park program planning, and concept designs. With an updated master plan, the project then funds further design, permitting and initial developed improvements.

| Portfolio: Parks & Community Services                           | Program: PCS - Waterfront & Destination Parks |

#### Description and Scope

This proposal provides funding to further progress toward design and development of the Council preferred new Bellevue Aquatic Center concept. Aquatic center site selection and design continues implementation of a long-time City Council Vision Priority project (2018 to 2023). Funds support schematic design and cost projections along with continued collaboration with community stakeholders and partners for the new facility.

| Department: 100 - Parks & Community Services                    | Location: Eastgate & Factoria               |
| Portfolio: Parks & Community Services                           | Program: PCS - Park Development & Expansion |

#### Description and Scope

The Parks & Open Space System Plan level of Service analysis identifies significant gaps in walkable access to parks and trails in the Eastgate Area. This project provides funds to support acquisition, design, and development of park property to address gaps in this underserved area of the City. In addition to acquiring real property, funding supports developing and implementing broad public outreach, site analysis, park program planning, and design alternatives. The preferred park design for the new park was reviewed and advanced by the City Council in November 2025. The project will continue through design, permitting and then construction.

### P-AD-110-Factoria Neighborhood Park

|                                                                 |                                             |
|-----------------------------------------------------------------|---------------------------------------------|
| Strategic Target Area: High Quality Built & Natural Environment | Status: On Hold                             |
| Department: 100 - Parks & Community Services                    | Location: Eastgate & Factoria               |
| Portfolio: Parks & Community Services                           | Program: PCS - Park Development & Expansion |

#### Description and Scope

The Parks & Open Space System Plan level of Service analysis identifies significant gaps in walkable access to parks and trails in the Factoria Area. This project provides funds to support acquisition, design, and development of park property to address gaps in this underserved area of the City. Once suitable property is identified and acquired, funding will support developing and implementing broad public outreach, site analysis, park program planning, and design alternatives. The park design will then be approved, permitted and constructed.

| Portfolio: Parks & Community Services                           | Program: PCS - Park Development & Expansion |

#### Description and Scope

The demographic composition of Bellevue residents is changing year over year at a high rate. With this comes a change in the type of recreational pursuits that are desired within the community. This project provides funds to nimbley identify, plan and construct sport and recreation facilities to meet changing needs throughout the city. Examples include, but are not limited to, off-leash dog areas, pickleball and recreational cricket facilities. This project provides the flexibility to track and respond to future recreational facility demands that are as yet unknown over the course of the 10-year CIP planning timeframe.

| Portfolio: Parks & Community Services                           | Program: PCS - Trails & Natural Systems |

#### Description and Scope

This project acquires property rights for and develops trails to and through parks with a goal to bring a park or trail access point within 1/3-mile of every Bellevue resident. Trails meet passive and active recreation needs, protect critical habitat and wildlife corridors, and provide links between parks and commercial or residential neighborhoods. In surveys, developing more trails is the top priority for residents. Trails are also the topmost used element of the city's parks and open space system. This project improves existing parks such as Mercer Slough, Coal Creek, and Weowna. It also supports neighborhood connections to trail systems such as Lake to Lake, Easttrail and the Grand Connection.

#### Description and Scope

Bellevue Botanical Garden is one of the top visitor attractions in the city. A unique public-private partnership with the Botanical Garden Society maintains and operates this community treasure. For decades, this partnership has planned and funded phased improvements for the Garden. This proposal funds the design and development of the Wetland-Sun Terraced Garden. This next phase of development is identified in the Council-adopted 2008 Bellevue Botanical Garden Master Plan. The Wetland-Sun Terraced Garden is located on south and west facing slopes that overlook a wetland. The garden will demonstrate successful uses of native plant communities in gardens and the retention of lowland Puget Sound ecosystem functions within developed areas. The site will provide education on maintenance and horticultural techniques to conserve water and energy resources. A Bellevue Botanical Garden Society fundraising campaign is anticipated to contribute to the construction of this garden extension.

| Department: 100 - Parks & Community Services                    | Location: Citywide                            |
| Portfolio: Parks & Community Services                           | Program: PCS - Waterfront & Destination Parks |

#### Description and Scope

Many Bellevue beach parks were constructed decades ago with shoreline armoring methods that are no longer permitted. Extensive work is required to redesign and construct shoreline improvements that promote water access, recreation, and ecological function with more natural shoreline gradients, stabilized by anchored large wood, boulders, and gravel. This ongoing CIP program prioritizes this work. Redesigning the shoreline attenuates wave energy, restores sediment transport processes, provides shallow water shoreline habitat for native fish, and increase accessibility for park visitors.

| Portfolio: Parks & Community Services                | Program: PCS - Park Development & Expansion |

#### Description and Scope

This proposal is responsive to community interest in planning for a future permanent, publicly accessible interpretive and commemorative site where the history of the contributions of Japanese-American families living and working in Bellevue during the first half of the 20th Century and the impacts of racism and forced incarceration can be told and memorialized.

### P-AD-116-Kelsey Creek Farm Major Renovation

|                                                                 |                                               |
|-----------------------------------------------------------------|-----------------------------------------------|
| Strategic Target Area: High Quality Built & Natural Environment | Status: On Hold                               |
| Department: 100 - Parks & Community Services                    | Location: Wilburton                           |
| Portfolio: Parks & Community Services                           | Program: PCS - Waterfront & Destination Parks |

#### Description and Scope

This proposal funds a comprehensive renovation of Kelsey Creek Farm Park. The barns and small animal viewing areas are not universally physically accessible for many who visit. The last significant renovation to the 1930-era barns in 1993 addressed structural issues and few significant improvements have been made since. Work will address non-conforming issues that range from accessibility to fire safety, to decomposing ceiling material, major mechanical systems, and lack of insulation.

| Department: 100 - Parks & Community Services                    | Location: Downtown                          |
| Portfolio: Parks & Community Services                           | Program: PCS - Park Development & Expansion |

#### Description and Scope

This project funds planning and development of a neighborhood park along NE 2nd St in the southeast quadrant of Downtown. This neighborhood does not currently have a park despite the existence of hundreds of high-density housing units nearby. Planning for the site includes community outreach as part of the design process. When constructed, the park will provide a needed green area and gathering space. The site includes two parcels owned by the city, totaling .4 acres. Additional property rights may be pursued, such as vacation of the adjacent right-of-way for NE 2nd Pl. If included, the park area will double. Use of a small, adjacent parcel will also be explored with Transportation. Tasks will include developing and implementing a broad public outreach program, site analysis, park program planning, and design alternatives. After the planning phase, the park will be designed undergo land use review approval and permitting.

| Portfolio: Parks & Community Services                           | Program: PCS - Park Development & Expansion |

#### Description and Scope

The Wilburton TOD neighborhood will soon be transformed into a vibrant area served by mass transit with high density development. The setting for any vibrant neighborhood requires parks and trails. There is a community park (Wilburton Hill) in the vicinity, but there are no neighborhood parks in the Wilburton TOD. The spine of the community is the Eastrail corridor. This property is owned by King County and Sound Transit. King County is currently building the trail, but the city will need to take the lead in planning and developing the corridor into a linear park. The Grand Connection will be a focal point of this area in need of integration with adjacent development. This proposal will support three necessary moves: (1) Acquisition and development of neighborhood parks, (2) planning of linear park facilities within/along the Eastrail Corridor and Grand Connection, and (3) planning for trail connections to Eastrail, Grand Connection, and adjacent community parks.

| Portfolio: Parks & Community Services                | Program: PCS - Renovation & Renewal |

#### Description and Scope

This proposal accelerates the city's removal or reconstruction of features and elements within the parks system that are barriers to physical accessibility. Improving physical accessibility is a citywide goal in alignment with DEI principles and progress on such is a federal compliance requirement. An ongoing and dedicated funding stream, above and beyond current investments, will increase the pace of overall project delivery for the benefit of our community and our legal compliance status.

#### Description and Scope

This proposal funds planning, design and initial phased construction of Bellevue Airfield Park. The re-envisioned park plan is the result of a community-based planning effort, based on current and future park and recreation needs. This initial phase of park development is supported by the 2008 voter-approved parks levy and will include natural area conservation, trails, picnic areas, and active recreation features and facilities.

This brownfield site is one of the few remaining undeveloped large (27 acre) tracts of land in Bellevue. The City Council directed purchase of the property to provide an active recreation community park. The site includes a grass meadow over a 10-acre landfill with aging gas migration systems and monitoring wells, 15 acres of forested natural area, and a 2-acre City stormwater collection system.

| Department: 100 - Parks & Community Services                    | Location: Citywide                  |
| Portfolio: Parks & Community Services                           | Program: PCS - Renovation & Renewal |

#### Description and Scope

This proposal provides ongoing funding to systematically renovate, replace or refurbish existing park infrastructure to preserve the safety, integrity, accessibility, efficiency, and functionality of park facilities. Capital projects are beyond the scope of normal ongoing maintenance and operations, covering non-routine major renovations such as roof, HVAC, dock and playground replacements. Work addresses liabilities, improves accessibility and enhances recreational programming for the public. Operational and functioning parks facilities are integral to the City's vision of maintaining Bellevue as "A City in a Park".

## Approved Budget Adjustments

**2027-2032 Capital Improvement Program (CIP) Project Information Sheet**

**PS-16-Fire Facility Major Maintenance**

Strategic Target Area: Community Safety & Health

Status: In Progress

Department: 070 - Fire

Location: Citywide

Portfolio: Public Safety Facilities

Program: PSF - Facility Systems Lifecycle Replacement

**Description and Scope**

This proposal provides funding for major repairs and/or upgrades required at 9 Fire Stations and the Public Safety Training Center (PSTC) which are not of sufficient magnitude to warrant a separate capital investment project. The facilities are unique and have special requirements necessary to operate efficiently and respond to fire and medical emergencies twenty-four hours a day, seven days a week. The Fire Department Long Range Facility Plan and facility survey documented numerous deferred maintenance issues and facility renovations needed to stop the deterioration of fire facilities and provide for the safety of personnel. While the annual allocation was raised in the last budget cycle from \$1M to \$2M, it is not sufficient to adequately maintain the remaining aging fire stations and training center. This includes an incremental increase of funding annually to move towards the maintenance plan to extend the safe occupancy of existing fire station facilities.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### PS-66-Fire Station 5

Strategic Target Area: Community Safety & Health

Status: In Progress

Department: 070 - Fire

Location: Downtown

Portfolio: Public Safety Facilities

Program: PSF - Major Projects

#### Description and Scope

The Bellevue City Council authorized the development of a Fire Facility Master Plan to meet the changing emergency response needs of the community. The Fire Facility Master Plan was published in May 2014. The consultant study analyzed population, fire risk, service demand, emergency response performance, firefighter health & safety, operations, training requirements, and functional space needs at nine fire stations and the Public Safety Training Center. Due to fiscal constraints, only the most critical needs were funded in the PS-63 project. One of the most critical needs identified in the study was rebuilding Fire Station 5.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### PS-67-Fire Warehouse & Special Projects

Strategic Target Area: Community Safety & Health

Status: On Hold

Department: 070 - Fire

Location: Citywide

Portfolio: Public Safety Facilities

Program: PSF - Major Projects

#### Description and Scope

This proposal would allow for the first right of refusal for the existing warehouse and property adjacent to the current training center. This acquisition would allow the BFD to make positive strides in fulfilling the Fire Facility Master Plan. The warehouse would support other station renovations, the training center as well as being a central warehouse for equipment and supplies.

#### Approved Budget Adjustments

Revised 4/23/24 (Ord. 6784): Decrease budget by \$5,100,000 and transfer to the Fire Station 10 (Levy) Project (PS-64).

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### PS-68-Fire Station 6 Renovations

Strategic Target Area: Community Safety & Health

Status: On Hold

Department: 070 - Fire

Location: Northeast Bellevue

Portfolio: Public Safety Facilities

Program: PSF - Major Projects

#### Description and Scope

This project provides funding for a feasibility study to determine site layout, design, and construction of Fire Station 6, which was constructed in 1983. Due to limited site capacity, the design will incorporate current best practices to improve firefighter health and wellness and the operational work efficiency of the department by including a dedicated bunker gear storage room, a dedicated medical clean-up and medical supply storage room, individual sleeping quarters and inclusive restroom facilities, an appropriately sized fitness room, and a dedicated in-house training space.

### PS-69-Fire Station 1 Fuel Tank

|                                                  |                                                       |
|--------------------------------------------------|-------------------------------------------------------|
| Strategic Target Area: Community Safety & Health | Status: In Progress                                   |
| Department: 070 - Fire                           | Location: Citywide                                    |
| Portfolio: Public Safety Facilities              | Program: PSF - Facility Systems Lifecycle Replacement |

#### Description and Scope

This proposal will fund the replacement of 16 underground fuel storage tanks at nine of the City's fueling sites, including the Bellevue Service Center, several fire stations, and City Hall. These tanks will enable fuel to be accessible for vehicles, equipment, and emergency generators so they can deliver services. Replacement reduces the potential risk of contaminants leaking into the environment and reduces the financial costs to the City should tanks experience issues. The nine sites will be scheduled out over a period generally matching their 30-year useful life.

### PS-77-Fire Sustainability & Resilience

Strategic Target Area: Community Safety & Health Status: In Progress  
 Department: 070 - Fire Location: Citywide  
 Portfolio: Public Safety Facilities Program: PSF - Sustainability and Climate Resilience

#### Description and Scope

This CIP project provides phased expansion of EV charging infrastructure at our Public Safety facilities. Scope includes installation of additional Level 2 and potential high speed chargers, upgrades to electrical service and distribution panels, conduit and trenching work, software and management systems, utility coordination, and commissioning. Work also includes load analysis, engineering, permitting, procurement, construction, and integration with existing EV infrastructure. Project sequencing will align with facility improvements and fleet replacement cycles to minimize rework and optimize deployment. Priorities are based on projected fleet demand, electrical capacity, and readiness of each site.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### PS-78-Fire Tenant Improvements

Strategic Target Area: Community Safety & Health

Status: In Progress

Department: 070 - Fire

Location: Citywide

Portfolio: Public Safety Facilities

Program: PSF - Tenant-Driven Improvements

#### Description and Scope

This Change Request is needed because tenant driven improvements in Fire facilities require a capital program structure to address safety, operational, and regulatory needs that exceed routine maintenance. The CIP Program designation reflects the scale and complexity of upgrades such as decontamination improvements, security enhancements, workspace reconfigurations, and specialty equipment installations required to support mission critical operations.

| Portfolio: Transportation Mobility & Safety                   | Program: TR - Major Projects |

#### Description and Scope

This project funds the completion of design and acquisition of permanent property rights to support future construction. The project will widen 120th Ave NE between the NE 1600 block and Northup Way to provide additional vehicle capacity and construct separated/buffered bike lanes and sidewalks. The project will also change the grade of 120th Ave NE to accommodate a fish-passable culvert. This project may be phased.

### MP-002-Bellevue College Connection

Strategic Target Area: Safe & Efficient Transportation System

Status: In Progress

Department: 130 - Transportation

Location: Eastgate & Factoria

Portfolio: Transportation Mobility & Safety

Program: TR - Major Projects

#### Description and Scope

This project provides funding to advance design for a new roadway and sidewalk connection through the Bellevue College campus along Snoqualmie River Road from SE 24th St to SE 32nd St. This project is a partnership between King County Metro, Bellevue College and the City of Bellevue and is intended to improve transit speed and reliability and provide improved access to Bellevue College.

### MP-003-NE Spring Blvd (Zone 3) - 124th Ave to 130th Ave NE

Strategic Target Area: Safe & Efficient Transportation System

Status: In Progress

Department: 130 - Transportation

Location: BelRed

Portfolio: Transportation Mobility & Safety

Program: TR - Major Projects

#### Description and Scope

This project funds the remaining design and provides partial ROW and/or partial construction funding for NE Spring Boulevard between 124th Ave NE and 130th Ave NE. This new roadway will provide single westbound and eastbound travel lanes, sidewalk, separated bicycle facilities and a bridge over the West Tributary to Kelsey Creek. The project will be designed in coordination with the Sound Transit 2-Line, the City of Bellevue Parks Master Plan Project and potential future private development. This project may be implemented in phases.

### MP-006-Transportation Master Plan

|                                                               |                              |
|---------------------------------------------------------------|------------------------------|
| Strategic Target Area: Safe & Efficient Transportation System | Status: In Progress          |
| Department: 130 - Transportation                              | Location: Citywide           |
| Portfolio: Transportation Mobility & Safety                   | Program: TR - Major Projects |

#### Description and Scope

A Transportation Master Plan will guide future development of Bellevue's multimodal transportation system. This plan will consolidate and update the policy implementation strategies outlined in the Comprehensive Plan Transportation Element and various planning documents and modal plans used by the City, and it will coordinate and provide guidance for the transportation system corridor buildout for all modes for use by both City and developer-initiated projects.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### NM-001-Parking and Curb Management Implementation

Strategic Target Area: Safe & Efficient Transportation System      Status: New

Department: 130 - Transportation      Location: Citywide

Portfolio: Transportation Mobility & Safety      Program: TR - Neighborhood Mobility

#### Description and Scope

In 2023 the council adopted the Curb Management Plan, which included 28 initiatives to improve the management of the curb environment. One of the high priority initiatives was to study the concept of paid on-street parking. This study was completed in December of 2025. Council provided direction in December to move forward with the code changes for this program. It is anticipated it will launch in Q2 of 2027. This CIP will cover all the upfront costs associated with launching this program, including the installation of new signage and pay stations in the curb pricing areas. Once the system has been operational for a year, it will start generating revenue that can be reinvested into the other 27 initiatives in the Curb Management Plan. This CIP will cover those future investments.

| Portfolio:             | Transportation Mobility & Safety       | Program:  | TR - Neighborhood Mobility |

**Description and Scope**

This project will implement the recommendations of Safe Speeds Bellevue to improve safety by updating speed limits on all 30+ mph streets. This will include removal of existing signs, installation of new signs, and replacing and adding new sign posts where necessary. Most 30+ mph streets will be signed for a reduced speed limit but all streets may require larger signs per MUTCD recommendations for multilane streets and/or additional signs to increase sign density. Implementation may occur in up to three phases focusing first on the urban core, other streets on Bellevue's High Injury Network, and finally remaining 30+ mph streets.

| Portfolio:             | Transportation Mobility & Safety       | Program:  | TR - Neighborhood Mobility |

**Description and Scope**

This project will advance design (concept through advertisement) and construct the first phase of improvements identified through Bellevue's Corridor Study Program and a prior Road Safety Assessment along 156th Ave NE from NE 8th St to NE 24th St. The project supports the City's Vision Zero goals by addressing safety needs and improving multimodal access. Improvements may include up to three new signalized pedestrian crossings (one near NE 18th St and two between NE 20th St and NE 24th St), raised crosswalks on the east legs of NE 10th St, NE 13th St, and NE 15th St, and signal operation enhancements such as phasing modifications and real-time signal safety improvements (RTSSI). These treatments aim to reduce conflicts, improve visibility, and enhance crossing safety. Temporary and permanent right-of-way acquisition will be required.

| Department: 130 - Transportation                              | Location: West Lake Sammamish       |
| Portfolio: Transportation Mobility & Safety                   | Program: TR - Neighborhood Mobility |

#### Description and Scope

This project funds design and construction of a raised crosswalk at existing marked crosswalk on 161st Ave SE at SE 33rd Pl by Spiritridge Park, replace existing three speed humps along 161st Ave SE between SE 31st St and SE 24th St with speed cushions, and install additional speed cushions to ensure spacing of roughly 300'-500' between cushions along the corridor. The project will help to reduce vehicle speeds on a corridor with high measured operating speeds and support a safer pedestrian crossing from Spiritridge Park to the trail network on the west side of 161st Ave SE.

### NM-012-DT Bellevue Signal Safety Interventions

Strategic Target Area: Safe & Efficient Transportation System      Status: New  
 Department: 130 - Transportation      Location: Downtown  
 Portfolio: Transportation Mobility & Safety      Program: TR - Neighborhood Mobility

#### Description and Scope

This project will install real-time signal safety intervention technology at all signalized intersections in the downtown core to enhance safety for vulnerable road users. One of the primary safety features is the pedestrian walk time extension feature which grants additional walk time where more time is needed.

### NM-013-High Injury Network Speed Feedback Signs

Strategic Target Area: Safe & Efficient Transportation System      Status: New  
 Department: 130 - Transportation      Location: Citywide  
 Portfolio: Transportation Mobility & Safety      Program: TR - Neighborhood Mobility

#### Description and Scope

This project funds design and construction to install multiple dynamic speed feedback radar signs on the city's high injury network (HIN) corridors. Installation type—which generally includes one sign per direction of travel— may include shoulder mounted locations on new poles/foundations, mast arm locations to provide over-lane feedback to people driving and/or affixing to city-owned street lights. Location and installation type to be determined by available budget.

| Portfolio: Transportation Mobility & Safety                   | Program: TR - Neighborhood Mobility |

#### Description and Scope

Fund design and construction of five rows of speed cushions and 900 feet of lane narrowing shoulders on 166th Way. Fund design and construction of four rows of speed cushions, two neighborhood entrances, one paint and post traffic circle, and 1400 feet of lane narrowing shoulders on NE 28th Street. The project will help to reduce vehicle speeds on two corridors with high measured operating speeds.

### NM-015-Project Development - Corridor Safety Improvements

|                                                               |                                     |
|---------------------------------------------------------------|-------------------------------------|
| Strategic Target Area: Safe & Efficient Transportation System | Status: In Progress                 |
| Department: 130 - Transportation                              | Location: Citywide                  |
| Portfolio: Transportation Mobility & Safety                   | Program: TR - Neighborhood Mobility |

#### Description and Scope

This funding will enable the city to complete Road Safety Assessments (RSAs) along all corridors of the 2015-2024 High Injury Network (HIN), including the remaining 8.1 miles of HIN corridors citywide, following the FY2023 SS4A-funded RSAs in Performance Management Area 1 (Downtown, Wilburton and BelRed). RSAs are a FHWA Proven Safety Countermeasure and have supported successful city grant applications for safety-related national and state funding. The budget will also be used to develop conceptual designs, as well as advance full design and construction of corridor safety projects on (1) the High Injury Network and High Injury Intersections, (2) corridors and intersections with a history of fatal and serious injury crashes, and (3) corridors and intersections for proactive safety treatments, based on near-miss or other analyses.

### NM-018-Safe Route to School - SE 46th

|                                                               |                                     |
|---------------------------------------------------------------|-------------------------------------|
| Strategic Target Area: Safe & Efficient Transportation System | Status: On Hold                     |
| Department: 130 - Transportation                              | Location: Cougar Mountain/Lakemont  |
| Portfolio: Transportation Mobility & Safety                   | Program: TR - Neighborhood Mobility |

#### Description and Scope

This project will fund design and construction, as feasible, of school zone safety elements that improve the frontage and pedestrian access to Cougar Ridge Elementary school by improving several intersections. The project elements include but are not limited to:

- SE 46th Way and 164th Ave SE, SE 46th St and 164th Ave SE – relocate existing crossing across 164th Ave SE at SE 46th Way to be at SE 46th St with rapid rectangular flashing beacon (RRFB).
- SE 46th St at 167th Ave SE– install a School Zone Flashing No U-Turn sign in the eastbound direction.
- SE 46th St at 169th Ave SE– sidewalk on north side of SE 46th St between 168th Ave and 169th Aves SE and improve crossing across SE 46th St at 169th Ave SE.
- SE 47th St and 171st Ave SE – evaluate all-way stop and redesign of curb extensions and/or channelization on all legs.
- 164th Ave SE north of SE 45th PI – sidewalk for one parcel length the west side of 164th Ave SE.

| Portfolio:             | Transportation Mobility & Safety       | Program:  | TR - Neighborhood Mobility |

**Description and Scope**

This project funds design and construction of a crossing with curb extensions across Main St and 158th Pl and a sidewalk on the north side of Main St between 156th Ave and 158th Pl. This is a Safe Routes to School project for Phantom Lake Elementary, Tillicum Middle, and Puesta del Sol schools, falling in all three schools' walksheds and connecting significantly sized areas of where students walk to school.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### NM-020-2029-2030 Traffic Calming Overlay Coordination

Strategic Target Area: Safe & Efficient Transportation System      Status: New

Department: 130 - Transportation      Location: Citywide

Portfolio: Transportation Mobility & Safety      Program: TR - Neighborhood Mobility

#### Description and Scope

This project aligns with the city's annual Pavement Preservation Program (Overlay) by coordinating the installation of traffic-calming treatments during the 2029–2030 construction cycle. The identified corridors include several neighborhood streets that currently experience high operating speeds and have a documented history of community requests for safety improvements.

This coordination will help to realize substantial cost savings, accelerate the delivery of traffic calming devices, improve community responsiveness, and minimize overall construction impacts to the community. Features could include speed humps, speed cushions, channelization, and retrofitting existing traffic calming features to modern standards.

| Portfolio: Transportation Mobility & Safety                   | Program: TR - Neighborhood Mobility |

#### Description and Scope

This funding will enable the city to complete planning, demonstration, and implementation activities along the 2015-2024 High Injury Network (HIN). This includes completion of the FY2023 SS4A planning and demonstration activities in 2027-2028, as well as new road safety-related grant applications and associated local match, where awarded (e.g. FY2026 SS4A grant, FY2028 HSIP, and more). The budget will also be used to develop conceptual designs and advance the implementation of smaller Vision Zero actions, such as spot improvements and rapid-build actions. The fund is intended for demonstrations and projects on (1) the High Injury Network and High Injury Intersections, (2) corridors and intersections with a history of fatal and serious injury crashes, and (3) corridors and intersections for proactive safety treatments, based on near-miss or other analyses.

#### Approved Budget Adjustments

**2027-2032 Capital Improvement Program (CIP) Project Information Sheet**

**PB-002-Eastrail to Mountain to Sound Greenway Trail Connection**

Strategic Target Area: Safe & Efficient Transportation System

Status: In Progress

Department: 130 - Transportation

Location: West Bellevue

Portfolio: Transportation Mobility & Safety

Program: TR - Pedestrian & Bicycle Mobility

**Description and Scope**

The project will construct a shared use path on the west side of 118th Ave SE. The path will extend from the Mountains to Sound Greenway Trail (north of the I-90 overcrossing) to SE 32nd St. An RRFB crossing of 118th Ave SE will also be installed, providing a connection to the south side of SE 32nd St.

Along the south side of SE 32nd St, from 118th Ave SE to the west side of the Eastrail trestle, the project will address shoulder cross-slope issues where feasible and will add paving and striping to create a wide, dedicated pedestrian shoulder. As an enhanced option, curb, gutter, and sidewalk may be included. Within the SE 32nd St project limits, the project will also install bicycle sharrow markings in the travel lane.

| Department: 130 - Transportation                              | Location: Eastgate & Factoria               |
| Portfolio: Transportation Mobility & Safety                   | Program: TR - Pedestrian & Bicycle Mobility |

#### Description and Scope

The project provides for full implementation including design and construction of sidewalk on the north side of SE Eastgate Way between Richards Road and the driveway at 13202 Eastgate Way. The project also includes the construction of walls, barrier, railing, pavement grind and overlay, and wetland mitigation.

### PB-004-NE 8th St High Visibility Crosswalk Upgrades

Strategic Target Area: Safe & Efficient Transportation System

Status: In Progress

Department: 130 - Transportation

Location: Citywide

Portfolio: Transportation Mobility & Safety

Program: TR - Pedestrian & Bicycle Mobility

#### Description and Scope

This project funds remaining design and construction of bike lanes along NE 8th Street between 156th Ave NE and 164th Ave NE, a new crosswalk with Rectangular Rapid Flashing Beacons near 160th Ave NE, and upgrade over 30 other intersections with high visibility crosswalk markings and green intersection bike markings.

| Department: 130 - Transportation                              | Location: Lake Hills                        |
| Portfolio: Transportation Mobility & Safety                   | Program: TR - Pedestrian & Bicycle Mobility |

#### Description and Scope

The project provides for the design of sidewalks and bicycle facilities on both sides of SE 16th Street between 148th Avenue and 156th Avenue SE. The design elements will evaluate adding street lighting, raised crosswalks, retaining walls, landscaped planter strips, and storm drainage improvements. Coordination with Puget Sound Energy is needed for the southeast corner parcel at 15555 SE 16th Street. A feasibility assessment will determine if sidewalk and bicycle facilities or a wide, shared use lane will be implemented on the south side of SE 16th Street from 148th Avenue NE to 156th Avenue NE.

| Portfolio: Transportation Mobility & Safety                   | Program: TR - Pedestrian & Bicycle Mobility |

#### Description and Scope

This project funds the remaining design, property acquisition, and construction of a new sidewalk along the north side of NE 40th St from 140th Ave NE to 145th PI NE. The project includes pavement overlay from 140th Ave NE to 148th Ave NE (coordinated with City of Redmond) and will install new bicycle facilities for the length of the project. This project may be constructed in phases.

| Strategic Target Area: Safe & Efficient Transportation System | Status: New                                 |
| Department: 130 - Transportation                              | Location: Northeast Bellevue                |
| Portfolio: Transportation Mobility & Safety                   | Program: TR - Pedestrian & Bicycle Mobility |

#### Description and Scope

This project will include design, right-of-way and a phased approach to the construction of sidewalk facilities along the east side of 173rd Avenue NE from Northup Way to the north city limits. Project elements include landscape strips, speed cushions, upgraded curb ramps, and bicycle facilities, if feasible. A survey and feasibility assessment will determine if shifting the roadway to the west, north of Tam O'Shanter Park to the north city limit, can be accommodated to provide a contiguous sidewalk on the east side of 173rd Avenue NE.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### PB-013-2026 Citywide Pedestrian Facility Spot Improvements

Strategic Target Area: Safe & Efficient Transportation System

Status: In Progress

Department: 130 - Transportation

Location: Citywide

Portfolio: Transportation Mobility & Safety

Program: TR - Pedestrian & Bicycle Mobility

#### Description and Scope

This project includes pedestrian crossing improvements at 3 intersections (NE 15th St and 158th PL NE, Main St and 158th PI, NE 16th St and 180th Ave NE), adding stop bars and crosswalk markings along SE 8th St between 140th Ave SE and 148th Ave SE, ADA curb ramp upgrades on the north side of Northup Way at 161st Ave NE, a short rechannelization of 156th Ave NE north of Bel-Red Rd, and updated school zone signage near Lake Hills Elementary and Phantom Lake Elementary.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### PB-015-116th vic Overlake Hospital - Signalized X-walk

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Wilburton

Portfolio: Transportation Mobility & Safety

Program: TR - Pedestrian & Bicycle Mobility

#### Description and Scope

This project will advance the design (concept through advertisement) of a signalized pedestrian crossing with a landscaped median on 116th Avenue NE near Felix Terry Swistak Dr NE, and close a sidewalk accessibility gap with a wider, landscape-buffered sidewalk adjacent to Overlake Medical Center. These improvements require modifications to the adjacent Overlake Medical Center parking lot. Temporary and permanent right-of-way acquisition will be required.

The project improves reliable access for healthcare personnel, emergency responders and the public traveling between parking, medical offices and hospital facilities. The project also strengthens connections to nearby transit (i.e. the 2 Line Wilburton Station, future RapidRide K Line) and surrounding services.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### PB-016-NE Bellevue Crosswalk Improvements (NE 28th St/Bel-Red Rd, NE 24th St/171st Ave NE)

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Northeast Bellevue

Portfolio: Transportation Mobility & Safety

Program: TR - Pedestrian & Bicycle Mobility

#### Description and Scope

This project funds the completion of design, property acquisition and funds partial construction of a signalized crosswalk at the 2800 block of NE Bel-Red Rd, along with paving an existing trail to become a shared-use path. It also funds the completion of design and construction of a RRFB crosswalk at NE 24th St and 171st Ave NE.

**Description and Scope**

This project funds the construction of a raised crosswalk and flashing crosswalk system for Eastrail at the crossing of Lake Washington Blvd SE near Newcastle Beach Park and removes abandoned railroad gantries in the vicinity.

Implementation of this project is planned with the 2027-2028 Overlay project that is scheduled to resurface Lake Washington Blvd SE.

### PB-019-NE 8th St near Vuecrest Crosswalk Improvements

|                                                               |                                             |
|---------------------------------------------------------------|---------------------------------------------|
| Strategic Target Area: Safe & Efficient Transportation System | Status: On Hold                             |
| Department: 130 - Transportation                              | Location: Northwest Bellevue                |
| Portfolio: Transportation Mobility & Safety                   | Program: TR - Pedestrian & Bicycle Mobility |

#### Description and Scope

This project will advance the design (concept through advertisement) of upgrades to two existing pedestrian crossings with Rectangular Rapid Flashing Beacons (RRFBs) on NE 8th St at 95th Ave NE and 98th Ave NE, including installation of a luminaire at each location. Improvements at 98th Ave NE also include replacing the eastbound left-turn lane with landscaped medians, upgrading sidewalk along the south side, and enhancing accessibility (i.e. curb ramps) at the north and southeast corners.

Together these improvements will enhance pedestrian visibility and provide safer and more predictable crossing opportunities.

### PB-020-132nd Ave NE near Bridle Trails Crosswalks and Speed Reduction

Strategic Target Area: Safe & Efficient Transportation System

Status: In Progress

Department: 130 - Transportation

Location: Bridle Trails

Portfolio: Transportation Mobility & Safety

Program: TR - Pedestrian & Bicycle Mobility

#### Description and Scope

This project funds design for two RRFB crosswalks along with the associated ADA Curb Ramps at 132nd Ave NE and NE 51st and near 13236 NE 40th St. and two feedback radar signs along 132nd Ave NE near 132nd Ave NE and NE 47th St. and NE 56th Lane.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### PB-021-NE 10th St/110th Ave NE Crosswalk Improvements

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Downtown

Portfolio: Transportation Mobility & Safety

Program: TR - Pedestrian & Bicycle Mobility

#### Description and Scope

The proposed RRFB would remove sidewalk panels on the east and west sides of 110th Ave NE and construct ADA curb ramps. The sidewalk panel on the east side of the street would extend and include the joint past the existing junction box. City crews have confirmed that the existing junction box powers the existing city street light and has capacity for powering the RRFB, as long as the junction box is upsized. The median island will take the left turn pocket and feature irrigation, plants, and a dual sided RRFB pole. and would be compatible with incoming K-line BAT lanes to be constructed in 2028-2030. This location was brought to conceptual design in the 2024 crossing Report. In early 2026, it was requested by residents during the 2026 Downtown Neighborhood Enhancement Program project submissions.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### PB-022-SE 8th St from 114/118 to LHC Complete Street

Strategic Target Area: Safe & Efficient Transportation System

Status: In Progress

Department: 130 - Transportation

Location: Lake Hills

Portfolio: Transportation Mobility & Safety

Program: TR - Pedestrian & Bicycle Mobility

#### Description and Scope

This project funds advancing design of new and enhanced bicycle infrastructure along SE 8th from 112th Ave SE to Lake Hills Connector. The project also adds a shared use path on the west side of 114th Ave SE from SE 8th St to SE 6th St and adds vehicle capacity to the 114th Ave SE and 8th St intersection.

### PB-023-SE 22nd St, 150th to 156th Ave SE Sidewalk

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Lake Hills

Portfolio: Transportation Mobility & Safety

Program: TR - Pedestrian & Bicycle Mobility

#### Description and Scope

This proposal funds the construction of a new sidewalk on the south side of SE 22nd Street between 150th and 156th Avenue SE, where missing.

### PB-024-SE 36th St, w/o 142nd PI SE Sidewalk

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Eastgate & Factoria

Portfolio: Transportation Mobility & Safety

Program: TR - Pedestrian & Bicycle Mobility

#### Description and Scope

This project will construct a sidewalk on the north side of SE 36th Street from 142nd Place SE to the commercial driveway to the west.

| Department: 130 - Transportation                              | Location: Citywide                          |
| Portfolio: Transportation Mobility & Safety                   | Program: TR - Pedestrian & Bicycle Mobility |

#### Description and Scope

This is a demonstration project that will add vertical protection along select corridors with existing buffered bike lanes or lanes with excess width. Different types of vertical protection will be tested for functionality and maintainability. The first phase of the project will focus on testing and identifying the preferred treatment types. Once identified, the second phase will focus on scaling the preferred vertical separation types, to start improving the Bicycle Level of Traffic Stress (LTS) of bicycle facilities citywide. Corridors will be prioritized based on criteria such as LTS target gaps, speeds, volumes, crash data, equity, network priority and feasibility. The feasibility of corridors will be informed by the mini street sweeper range, maintenance staff capacity, existing conditions of bicycle facilities, and operational needs of the selected roadways.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### PR-002-SE 36th Street Medians Modifications

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Eastgate & Factoria

Portfolio: Transportation Mobility & Safety

Program: TR - Preservation & Reconstruction

#### Description and Scope

The MTSG project did an outstanding job creating well landscaped features along the existing trail that runs from Factoria Blvd to 142nd Pl SE. Most of the landscaping can be maintained from the trail or from a turn lane of the roadway. There is one stretch of landscaping, however, that has proven to be extremely difficult and expensive to maintain because it is run along a wall to the north and is in the center of the roadway with no space to work on the roadway side of the strips. We have also found it is difficult to establish plants in these strips due to their width, but weeds grow profusely. To maintain these planter areas, we must close the road in one direction and run alternating traffic which costs over \$3000 every time we need to trim back the weeds. The solution is to remove the landscaping, cap the irrigation and cover the planters with a hardscape material.

### PR-003-Northrup Way/116th Ave NE Traffic Signal Upgrade

Strategic Target Area: Safe & Efficient Transportation System

Status: On Hold

Department: 130 - Transportation

Location: Northwest Bellevue

Portfolio: Transportation Mobility & Safety

Program: TR - Preservation & Reconstruction

#### Description and Scope

This project reconstructs the SE corner of the intersection and associated signal equipment that is frequently damaged by turning vehicles. It will also eliminate the northbound right turn slip lane to reduce the speed of turning vehicles. A concept plan for this intersection improvement was developed in 2025, which will advance to PS&E

### PR-004-Lake WA Blvd/NE 10th St Intersection Rebuild

Strategic Target Area: Safe & Efficient Transportation System

Status: On Hold

Department: 130 - Transportation

Location: West Bellevue

Portfolio: Transportation Mobility & Safety

Program: TR - Preservation & Reconstruction

#### Description and Scope

This project replaces an aging span wire traffic signal system with new roundabout or traffic signal system. This is a joint project with City of Medina, as the intersection is within both jurisdictions. In addition to replacing the traffic signal system, this project will also address ADA and sidewalk needs at the intersection. Concept drawings were developed for low, med and high cost options that range between a traffic signal and roundabout option. This project will advance one of the concepts prepared to PS&E.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### PR-006-Coal Creek Rockery Repair

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Somerset

Portfolio: Transportation Mobility & Safety

Program: TR - Preservation & Reconstruction

#### Description and Scope

This project funds the completion of design and construction of a project to stabilize the existing rockery along Coal Creek Pkwy SE, just northeast of its intersection with Forest Dr SE, extending the wall's service life. The rockery will be reinforced to reduce the risk of rock movement until a permanent wall can be built.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### PR-008-Major Sidewalk Repairs

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Citywide

Portfolio: Transportation Mobility & Safety

Program: TR - Preservation & Reconstruction

#### Description and Scope

As a "City in a Park," Bellevue has developed beautiful tree lined streets that contribute toward our goal of maintaining a tree canopy of over 40% of the city. The one downside to these trees is they can do significant damage to our sidewalk infrastructure. Every year we replace about 8000sf of sidewalk but the backlog grows at a rate of over 30,000sf a year. The total backlog is over 500,000sf so there is no way to stay on top of this need with our current in-house staff. To combat this issue, we put together large CIP projects to tackle big chunks of deficient sidewalks through contracted services. This CIP would cover the design and construction of these projects.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### PR-009-112th Street Lighting - NE 12th to NE 24th

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Northwest Bellevue

Portfolio: Transportation Mobility & Safety

Program: TR - Preservation & Reconstruction

#### Description and Scope

This project funds the design and replacement of aging street lights with new street lighting on 112th Ave NE between NE 12th St and NE 24th St.

### PR-010-NE 8th St/164th Ave NE Traffic Signal Upgrade

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Crossroads

Portfolio: Transportation Mobility & Safety

Program: TR - Preservation & Reconstruction

#### Description and Scope

This project will upgrade aged traffic signal infrastructure at NE 8th St and 164th Ave NE and AC power conversion for the RRFB at NE 24th St and 161st Ave SE. The traffic signal upgrades will include the addition of signal infrastructure to support flashing yellow arrow operations.

### TR-001-Grant Match

|                                                               |                                     |
|---------------------------------------------------------------|-------------------------------------|
| Strategic Target Area: Safe & Efficient Transportation System | Status: In Progress                 |
| Department: 130 - Transportation                              | Location: Citywide                  |
| Portfolio: Transportation Mobility & Safety                   | Program: TR - Portfolio Assumptions |

#### Description and Scope

Allocation of local funds to this program has the intended outcome of leveraging the award of grants or securing other non-local funding commitments, often achieving returns of 1:1 to more than 4:1 on the local commitment. Most grant programs require a minimum local match of 13.5%–20% of project phase costs, and many prioritize applications that offer match amounts above the minimum. Maintaining a flexible yet committed funding source allows the city to evaluate current and emerging capital priorities, determine which projects are most competitive, and position proposals to align with granting agency goals and criteria. This fund may also be used to support costsharing or partnership opportunities with neighboring jurisdictions and regional agencies such as King County, Sound Transit, and WSDOT. Formal commitment of funds may be made contingent on approval by the City Council or City Manager's Office.

### VM-001-Smart Mobility Technology & Infrastructure

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Citywide

Portfolio: Transportation Mobility & Safety

Program: TR - Vehicle Mobility

#### Description and Scope

This project provides funding for non-project CIP work that supports Smart Mobility, NTSS and Traffic Engineering. This includes work orders in response to resident requests, equipment upgrades, small traffic studies and system upgrades needed to meet standards. In addition, funding is provided for Smart Mobility partnerships and innovation work performed to improve efficiency and safety of traffic signals.

### VM-002-Lk Hills Conn & SE 8th St Intersection Improvements

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Wilburton

Portfolio: Transportation Mobility & Safety

Program: TR - Vehicle Mobility

#### Description and Scope

This project funds design and construction of a second northbound left turn lane at the intersection of Lake Hills Connector and SE 8th Street to improve capacity for vehicles.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### VM-004-W Lake Samm Pkwy/Northup Way New Traffic Signal

|                        |                                        |           |                       |
|------------------------|----------------------------------------|-----------|-----------------------|
| Strategic Target Area: | Safe & Efficient Transportation System | Status:   | New                   |
| Department:            | 130 - Transportation                   | Location: | West Lake Sammamish   |
| Portfolio:             | Transportation Mobility & Safety       | Program:  | TR - Vehicle Mobility |

#### Description and Scope

This project adds a new traffic signal at W Lk Samm Pkwy and Northup Way to address traffic demands. Construction of a traffic signal at this location involves potential regrading given the challenging topography and intersection geometry at this location. Additional scope may involve establishing fiber optic communications to this location to integrate this signal into the city's SCATS adaptive signal control system.

**2027-2032 Capital Improvement Program (CIP) Project Information Sheet**

**VM-006-Forest Dr, SE 63rd to Lakemont City Services Communication**

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Cougar Mountain/Lakemont

Portfolio: Transportation Mobility & Safety

Program: TR - Vehicle Mobility

**Description and Scope**

This project constructs a communication conduit system along Forest Dr SE (between SE 63rd St and Lakemont Blvd) and on Lakemont Blvd (between Forest Dr and Cougar Mountain Way) to enable future interconnectivity with the planned traffic signal at the Forest Dr & Lakemont Blvd intersection and provide city-owned fiber optic connectivity to the Lakemont Blvd traffic signals.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### VM-008-Factoria Blvd/SE 38th St Intersection Improvements

Strategic Target Area: Safe & Efficient Transportation System

Status: New

Department: 130 - Transportation

Location: Eastgate & Factoria

Portfolio: Transportation Mobility & Safety

Program: TR - Vehicle Mobility

#### Description and Scope

This project will modify the traffic signal to widen the west leg of the intersection to support unsplitting the E/W signal phasing at Factoria Blvd and SE 38 and provide pedestrian improvements as identified in the city's 2004 Factoria Area Transportation Study (FATS).

### S-108-Advanced Metering Infrastructure (AMI) Implementation

|                                                                 |                                         |
|-----------------------------------------------------------------|-----------------------------------------|
| Strategic Target Area: High Quality Built & Natural Environment | Status: In Progress                     |
| Department: 140 - Utilities                                     | Location: Citywide                      |
| Portfolio: Utilities - Sewer                                    | Program: Sewer - Operational Efficiency |

#### Description and Scope

This proposal is for a new Utilities CIP Program. Implementation involves: Replacing almost all Utilities meters, total of 39,436 out of 40,804; Replacing half of the meter boxes, approximately 20,000 out of 40,804; Replacing the lids for the other half of the meter boxes, approximately 20,000 lids; Installing Meter Interface Units (MIU); Installing Communication equipment, 100 collectors and 25 repeaters; Implementation of an AMI Meter Data Management Software (MDMS); Systems Integration and Implementation services. This project will be funded 70 percent by water and 30 percent by sewer rates. The budget is based on a 2015 AMI feasibility study. Rapid implementation is planned to realize the maximum benefit from labor savings that will be realized by replacing the current manually-read meters, to minimize the time two systems need to be supported, and to deliver a common service level to all customers as rapidly as possible.

### S-111-Maintenance and Operations Yard

|                                                                 |                                         |
|-----------------------------------------------------------------|-----------------------------------------|
| Strategic Target Area: High Quality Built & Natural Environment | Status: In Progress                     |
| Department: 140 - Utilities                                     | Location: Citywide                      |
| Portfolio: Utilities - Sewer                                    | Program: Sewer - Operational Efficiency |

#### Description and Scope

As the City of Bellevue continues to grow, there is a critical need for long range operational facilities planning to ensure that the Utilities Department (Utilities) can meet the community's current and future needs in an efficient and timely manner. The current service locations are functioning at or near capacity, and there is significant risk that they will not be sufficient to meet Utilities' growing operational needs. To address this, Utilities initiated the development of a long range Operations and Maintenance (O&M) Facilities Plan.

Programs included in this proposal are:

- S-111 Operations and Maintenance Land Acquisition - Sewer

### S-112-Sewer Planning Program

Strategic Target Area: High Quality Built & Natural Environment

Status: In Progress

Department: 140 - Utilities

Location: Citywide

Portfolio: Utilities - Sewer

Program: Sewer - Replacement of Aging Infrastructure

#### Description and Scope

This program is for sewer planning projects, including alternatives analyses and programmatic planning for the wastewater sewer system, and an update to the Wastewater System Plan.

| Portfolio: Utilities - Sewer                                    | Program: Sewer - Replacement of Aging Infrastructure |

#### Description and Scope

The City of Bellevue Utilities Department utilizes a supervisory control and data acquisition (SCADA) system to control and monitor the potable water, wastewater and storm water systems. Since the initial installation in the 1970s, this system has utilized leased copper telephone lines as the SCADA communications media. With age, the copper phone lines used for communicating vital control logic and retrieving precious data have become increasingly unreliable. Any break in communications within our SCADA network increases the risk and cost of providing essential Utility services to our customers.

The family of projects under the SCADA Infrastructure Upgrades program will improve the reliability and security of the SCADA system across 32 potable water sites, 48 wastewater sites and 11 storm water sites. These projects will install a private, secure cellular and fiber-optic communications network and optimize the operation of the cities three utilities.

| Portfolio: Utilities - Sewer                                    | Program: Sewer - Operational Efficiency |

#### Description and Scope

This program is for projects that are constructed in critical areas (streams, wetland, steep slopes or floodplains) or critical area buffers. The projects require, by permit from a variety of natural resource agencies, re-planting of native vegetation after construction and monitoring of capital projects to ensure the vegetation survives. Some stream projects require monitoring of the streambed after construction. Compliance with permitting requirements ensures the City maintains strong relationships with environmental permitting agencies that can benefit future projects. The adopted CIP funds the current monitoring and maintenance activities on 17 separate sites throughout the City

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### S-16-Sewer Pump Station & Force Main Improvements

Strategic Target Area: High Quality Built & Natural Environment

Status: In Progress

Department: 140 - Utilities

Location: Citywide

Portfolio: Utilities - Sewer

Program: Sewer - Replacement of Aging Infrastructure

#### Description and Scope

This ongoing program funds rehabilitation of the 36 pump and 10 flush stations in Bellevue's wastewater system. Stations are prioritized based on the risk and consequence of failure, maintenance and operations experience, pump station age, and coordination with other projects. Stations scheduled for work in 2023-2029 include: Wilburton, Newport, Cozy Cove, Pump Station 12, Parkers, South Ridge, Evergreen East, Evergreen West, and Fairweather.

| Department: 140 - Utilities                                     | Location: Citywide                                   |
| Portfolio: Utilities - Sewer                                    | Program: Sewer - Replacement of Aging Infrastructure |

#### Description and Scope

This program funds major repairs to sewer pipes where there is a cost-effective solution to extend the pipe's service life. Most defects are identified from the Utility's infrastructure condition assessment (video) program. Pipes are prioritized for repair based on risk of failure (likelihood and consequence), failure history, and to coordinate with other construction such as planned street overlays, which reduces restoration costs.

| Portfolio:             | Utilities - Sewer                        | Program:  | Sewer - Replacement of Aging Infrastructure |

#### Description and Scope

This ongoing program pays for minor improvements to Bellevue's sewer system to resolve deficiencies, improve efficiencies, or resolve maintenance problems, often in conjunction with other programs such as the Transportation overlay program. The program also investigates the feasibility of possible sewer extensions. Projects are prioritized based on criteria including public safety/property damage, maintenance frequency, operator safety, environmental risk, reliability and efficiency gains, coordination with other city projects or development activity, and level of service impact.

| Department: 140 - Utilities                                     | Location: Citywide                                   |
| Portfolio: Utilities - Sewer                                    | Program: Sewer - Replacement of Aging Infrastructure |

#### Description and Scope

This program is for the development of the Lake Lines Management Plan that will analyze the condition assessment and other available data on the Lake Washington lake lines, to develop a strategy for the rehabilitation, replacement, or continued condition assessment of the Lake Washington Lake Lines. This management plan will also perform alternatives analysis and evaluation of projects for the 14.5 miles of sewer pipe along Lake Washington Shoreline and in future years, design, and construction for portions of the lake lines.

| Portfolio:             | Utilities - Sewer                        | Program:  | Sewer - Replacement of Aging Infrastructure |

#### Description and Scope

This program replaces poor condition sewer pipe throughout the service area. Pipes are replaced when life cycle cost analysis indicates replacement is more economical than continuing to make point repairs. Replacement methods may include trenchless rehabilitation techniques such as cured-in-place pipe, and pipe bursting, and/or open trench replacement. Sewer System Pipeline Repair, which repairs pipes to extend their service life. This program implements Bellevue's asset management program strategy to meet expected and required customer service levels at the lowest life cycle cost.

| Portfolio: Utilities - Storm & Surface Water                    | Program: Storm - Environmental Preservation |

#### Description and Scope

This program focuses on improving water quality in the storm system and ultimately Bellevue's streams and lakes. Early information from the Watershed Management Plan indicates water quality issues are a major limiting factor in Bellevue's streams. This Program will expand once more projects are identified in the City's on-going Watershed Management Plan effort (expect to be completed in late 2022 or early 2023).

Three projects address runoff from WSDOT freeways, some of the most contaminated in the city.

### D-111-Maint and Operations Facility Land Acquisition and Dev

|                                                                 |                                         |
|-----------------------------------------------------------------|-----------------------------------------|
| Strategic Target Area: High Quality Built & Natural Environment | Status: In Progress                     |
| Department: 140 - Utilities                                     | Location: Citywide                      |
| Portfolio: Utilities - Storm & Surface Water                    | Program: Storm - Operational Efficiency |

#### Description and Scope

As the City of Bellevue continues to grow, there is a critical need for long range operational facilities planning to ensure that the Utilities Department (Utilities) can meet the community's current and future needs in an efficient and timely manner. The current service locations are functioning at or near capacity, and there is significant risk that they will not be sufficient to meet Utilities' growing operational needs. To address this, Utilities initiated the development of a long range Operations and Maintenance (O&M) Facilities Plan.

Programs included in this proposal are:

- D-111 Operations and Maintenance Land Acquisition - Storm

| Department: 140 - Utilities                                     | Location: Citywide                                   |
| Portfolio: Utilities - Storm & Surface Water                    | Program: Storm - Replacement of Aging Infrastructure |

#### Description and Scope

The City of Bellevue Utilities Department utilizes a supervisory control and data acquisition (SCADA) system to control and monitor the potable water, wastewater and storm water systems. Since the initial installation in the 1970s, this system has utilized leased copper telephone lines as the SCADA communications media. With age, the copper phone lines used for communicating vital control logic and retrieving precious data have become increasingly unreliable. Any break in communications within our SCADA network increases the risk and cost of providing essential Utility services to our customers.

The family of projects under the SCADA Infrastructure Upgrades program will improve the reliability and security of the SCADA system across 32 potable water sites, 48 wastewater sites and 11 storm water sites. These projects will install a private, secure cellular and fiber-optic communications network and optimize the operation of the cities three utilities.

| Portfolio: Utilities - Storm & Surface Water                    | Program: Storm - Environmental Preservation |

#### Description and Scope

This program is for projects that are constructed in critical areas (streams, wetland, steep slopes or floodplains) or critical area buffers. The projects require, by permit from a variety of natural resource agencies, re-planting of native vegetation after construction and monitoring of capital projects to ensure the vegetation survives. Some stream projects require monitoring of the streambed after construction. Compliance with permitting requirements ensures that the City maintains strong relationships with environmental permitting agencies that can benefit future projects. The adopted CIP funds the current monitoring and maintenance activities on 17 separate sites throughout the City.

| Department: 140 - Utilities                                     | Location: Citywide                                   |
| Portfolio: Utilities - Storm & Surface Water                    | Program: Storm - Replacement of Aging Infrastructure |

#### Description and Scope

This ongoing program repairs defective storm drainage pipelines, culverts and ditches identified in the Utility's condition assessment program or other means. Projects are prioritized based on the severity of deterioration, the risk and consequence of failure, and coordination with planned street improvement projects. As the system ages, costs are expected to increase. The Utilities' Asset Management Program is evaluating when system replacement will require significant increases to the budget.

| Department: 140 - Utilities                                     | Location: Citywide                          |
| Portfolio: Utilities - Storm & Surface Water                    | Program: Storm - Environmental Preservation |

#### Description and Scope

This ongoing program provides funding to remove fish passage barriers such as impassable culverts, debris jams, or accumulated sediment, allowing access to critical spawning and rearing habitat for salmon populations. Typical projects include culvert replacement or modification, debris removal, or installation of logs and boulders to improve access at low stream flows. Grant money is pursued to supplement Bellevue's investment whenever possible.

| Portfolio: Utilities - Storm & Surface Water                    | Program: Storm - Environmental Preservation |

#### Description and Scope

This ongoing program resolves unstable stream sections that reduce salmon spawning or rearing habitat or increase Bellevue Utilities maintenance requirements. Stream stability problems include stream sections with excessive erosion or sediment deposition. Stabilizing the stream channel consists primarily of placing large woody debris and boulders in the stream channel, and re-vegetating stream banks, commonly called bioengineering.

| Department: 140 - Utilities                                     | Location: Citywide                          |
| Portfolio: Utilities - Storm & Surface Water                    | Program: Storm - Environmental Preservation |

#### Description and Scope

This ongoing program constructs improvements to reduce or eliminate flooding caused by insufficient public drainage system capacity. Projects involve enlarging pipes or culverts to convey more stormwater, re-routing drainage to pipes with more capacity, adding detention or infiltration facilities, or other runoff control strategies.

This program is funded in part by King County Flood Control District sub-regional opportunity fund dollars at approximately \$650,000 per year.

**W-103-Increase Drinking Water Storage Availability for West Operating Area**

Strategic Target Area: High Quality Built & Natural Environment

Status: In Progress

Department: 140 - Utilities

Location: Citywide

Portfolio: Utilities - Water

Program: Water - Capacity for Growth

**Description and Scope**

This project is for design and construction of facilities to increase the drinking water storage available for anticipated population growth in Downtown, Bel-Red, and Wilburton areas. System improvements will be made in this CIP window to allow transfer of surplus water stored in East Bellevue to the growth areas, assuring emergency storage is available for near-term growth. These improvements include upgrades to transmission mains in NE 8th Street and at SE 7th and 140th Ave SE, and upgrades to system Pressure Reducing Valves. The project also includes analysis of emergency well capacity to supplement regional supply in case of an outage, which may offset or reduce the need for added storage. The 2015 Water System Plan update analyzed required timing and volume as well as siting considerations for storage to meet the needs of planned growth..

| Portfolio: Utilities - Water                                    | Program: Water - Capacity for Growth |

#### Description and Scope

This proposal is for design and construction of new water pipes under the new NE Spring Boulevard Multi Modal Corridor, to provide water service for the redevelopment of the Bel-Red Corridor. This proposal is required as a result of Transportation's ongoing, phased development of the Spring Blvd right-of-way. No new sewer pipes are needed in this section of the corridor.

### W-108-Advanced Metering Infrastructure (AMI) Implementation

|                                                                 |                                         |
|-----------------------------------------------------------------|-----------------------------------------|
| Strategic Target Area: High Quality Built & Natural Environment | Status: In Progress                     |
| Department: 140 - Utilities                                     | Location: Citywide                      |
| Portfolio: Utilities - Water                                    | Program: Water - Operational Efficiency |

#### Description and Scope

This proposal is for a Utilities CIP Program. Implementation involves: Replacing almost all Utilities meters, total of 39,436 out of 40,804; Replacing half of the meter boxes, approximately 20,000 out of 40,804; Replacing the lids for the other half of the meter boxes, approximately 20,000 lids; Installing Meter Interface Units (MIU); Installing Communication equipment, 100 collectors and 25 repeaters; Implementation of an AMI Meter Data Management Software (MDMS); Systems Integration and Implementation services. This project will be funded 70 percent by water and 30 percent by sewer rates. The budget is based on a 2015 AMI feasibility study. Rapid implementation is planned to realize the maximum benefit from labor savings that will be realized by replacing the current manually-read meters, to minimize the time two systems need to be supported, and to deliver a common service level to all customers as rapidly as possible.

| Portfolio: Utilities - Water                                    | Program: Water - Replacement of Aging Infrastructure |

#### Description and Scope

This program is for the renewal and replacement of water supply Inlet stations, where Bellevue draws water from the regional water transmission system. Bellevue manages 14 inlet stations, and shares ownership in 3 other inlet stations operated by adjacent utilities. Projects are proposed to maintain reliability, improve safety, reduce risk, and renew aging infrastructure.

| Portfolio: Utilities - Water                                    | Program: Water - Operational Efficiency |

#### Description and Scope

As the City of Bellevue continues to grow, there is a critical need for long range operational facilities planning to ensure that the Utilities Department (Utilities) can meet the community's current and future needs in an efficient and timely manner. The current service locations are functioning at or near capacity, and there is significant risk that they will not be sufficient to meet Utilities' growing operational needs. To address this, Utilities initiated the development of a long range Operations and Maintenance (O&M) Facilities Plan.

Programs included in this proposal are:

- W-111 Operations and Maintenance Land Acquisition - Water

| Portfolio: Utilities - Water                                    | Program: Water - Replacement of Aging Infrastructure |

#### Description and Scope

This program funds early capital project planning, which is applicable to both existing CIP programs and future capital projects yet to be identified. The proposed budget includes a new Water System Plan, which is required every ten years by the Washington State Department of Health and Bellevue City Code. Also included is assistance preparing applications for Federal Emergency Management Agency grants for seismic mitigation projects.

### W-115-SCADA Upgrade - Water

|                                                                 |                                                      |
|-----------------------------------------------------------------|------------------------------------------------------|
| Strategic Target Area: High Quality Built & Natural Environment | Status: In Progress                                  |
| Department: 140 - Utilities                                     | Location: Citywide                                   |
| Portfolio: Utilities - Water                                    | Program: Water - Replacement of Aging Infrastructure |

#### Description and Scope

The City of Bellevue Utilities Department utilizes a supervisory control and data acquisition (SCADA) system to control and monitor the potable water, wastewater and storm water systems. Since the initial installation in the 1970s, this system has utilized leased copper telephone lines as the SCADA communications media. With age, the copper phone lines used for communicating vital control logic and retrieving precious data have become increasingly unreliable. Any break in communications within our SCADA network increases the risk and cost of providing essential Utility services to our customers.

The family of projects under the SCADA Infrastructure Upgrades program will improve the reliability and security of the SCADA system across 32 potable water sites, 48 wastewater sites and 11 storm water sites. These projects will install a private, secure cellular and fiber-optic communications network and optimize the operation of the cities three utilities.

| Department: 140 - Utilities                                     | Location: Somerset                                   |
| Portfolio: Utilities - Water                                    | Program: Water - Replacement of Aging Infrastructure |

#### Description and Scope

This program is proposed to address level of service deficiencies identified in the 2016 Water System Plan. During a fire event in Somerset Highlands, when high flows are drawn from local hydrants, customers at high elevations are likely to lose water service due to capacity bottlenecks. This loss of pressure would also create water quality risks, which may require boil water orders over a larger area to avoid contamination. Existing capacity was acceptable during original construction (late 1960s), but the flow available is inadequate based on City policy and current Washington State Department of Health minimum requirements. The proposed improvements will add capacity to meet the minimum level of service and resolve these deficiencies.

## 2027-2032 Capital Improvement Program (CIP) Project Information Sheet

### W-119-Groundwater Well Improvements

Strategic Target Area: Community Safety & Health

Status: In Progress

Department: 140 - Utilities

Location: Citywide

Portfolio: Utilities - Water

Program: Water - Emergency Water Supply

#### Description and Scope

Bellevue Utilities maintains four groundwater wells for municipal water purposes, including non-potable or potable uses, and emergency water supplies. These wells were the sole supply of water to the Lake Hills and Crossroads neighborhoods in the 1950s and 1960s, before purchasing water from Seattle. This program is proposed to fund projects that maintain readiness, protect water quality, and optimize use of groundwater. Well assessment and rehabilitation work will restore and maintain well condition and yield. Improvements at the Crossroads site will increase access to groundwater for irrigation and tanker truck filling, improve well head protection measures, and improve response time and capacity to augment normal supplies in an emergency. An emergency well siting study will evaluate option to install additional, emergency-only wells throughout the service area, as recommended by the City's Water Distribution System Seismic Vulnerability Assessment.

| Portfolio: Utilities - Water                                    | Program: Water - Replacement of Aging Infrastructure |

#### Description and Scope

This program focuses on replacing water mains that have reached their useful life, with the goal of reducing risk. Additional benefits include increasing the firefighting flow available to neighborhoods, improve reliability with additional valves (to limit service shutdowns), and improving earthquake resiliency with more robust pipe. This investment funds pipeline replacement at a rate of 5 miles/year, adjusted with inflation. At that rate, water pipe will need to last on average 100-125 years to sustainably maintain the entire 608-mile water distribution system. Pipes are prioritized for replacement based on risk of failure (likelihood and consequence), break history, potential for cost savings or reduced neighborhood impacts by coordinating with other construction projects (e.g., planned street overlays), and opportunities to address level of service deficiencies (low flow or pressure) or vulnerable pipes in poor soils.

### W-67-Pressure Reducing Valve (PRV) Station Rehabilitation

|                                                                 |                                                      |
|-----------------------------------------------------------------|------------------------------------------------------|
| Strategic Target Area: High Quality Built & Natural Environment | Status: In Progress                                  |
| Department: 140 - Utilities                                     | Location: Citywide                                   |
| Portfolio: Utilities - Water                                    | Program: Water - Replacement of Aging Infrastructure |

#### Description and Scope

This ongoing program rehabilitates or replaces aging, obsolete pressure reducing valve (PRV) stations throughout the water service area. It will also add remote flow and pressure sensors to monitor these stations. The number of PRV stations that are rehabilitated varies from year to year based on the annual program budget and the rehabilitation costs, but over the long term should average about 3 PRVs per year to sustainably rehabilitate over 150 stations on a roughly 25-year cycle. Prioritization criteria include access requirements, safety, maintenance history, age, and efficiencies gained with overlapping or adjacent projects.

| Portfolio: Utilities - Water                                    | Program: Water - Replacement of Aging Infrastructure |

#### Description and Scope

This ongoing program pays for small improvements to Bellevue's water system to resolve deficiencies, improve efficiencies, or resolve maintenance problems, often in conjunction with other programs such as the Transportation overlay program. Projects are prioritized based on criteria including public safety/property damage, maintenance frequency, operator safety, environmental risk, reliability and efficiency gains, coordination with other city projects or development activity, and level of service impact.

| Portfolio: Utilities - Water                                    | Program: Water - Replacement of Aging Infrastructure |

#### Description and Scope

This program funds recoating, rehabilitation, seismic retrofits and/or replacement of drinking water reservoirs to maintain these facilities for reliable operation. Bellevue operates and maintains 24 active drinking water reservoirs and shares partial ownership (and access to water) in 4 other reservoirs maintained and operated by neighboring utilities.

| Department: 140 - Utilities                                     | Location: Citywide                                   |
| Portfolio: Utilities - Water                                    | Program: Water - Replacement of Aging Infrastructure |

#### Description and Scope

This program was established in 2005 to rehabilitate or replace drinking water pump stations. Bellevue operates and maintains 21 pump stations, and shares partial ownership in a separate pump station operated by Coal Creek Utility District. Based on a needs assessment of each pump station, investments can range from basic improvements to complete reconstruction. The rehabilitation work may include capacity, safety and reliability improvements, new mechanical and electrical equipment, on-site emergency power generation, and seismic retrofits.

| Department: 140 - Utilities                                     | Location: Citywide                                   |
| Portfolio: Utilities - Water                                    | Program: Water - Replacement of Aging Infrastructure |

#### Description and Scope

This program systematically replaces aging, obsolete vaults housing high-volume commercial water meters (3" and larger). Due to their location and condition, these meters pose safety and access concerns and are generally beyond the ability of O&M crews to replace. Improved performance accuracy is a secondary benefit of the program. This ongoing program replaces approximately 4 commercial meter vaults each year.

| Department: 140 - Utilities                                     | Location: Citywide                                   |
| Portfolio: Utilities - Water                                    | Program: Water - Replacement of Aging Infrastructure |

#### Description and Scope

This program replaces aging and deteriorating water service saddles (the component connecting the service line to the water main), and water service lines (the City-owned pipe between the main and the meter), in response to known deficiencies and/or in advance of planned street improvements. Annual expenditures can vary widely depending on the condition of saddles and service lines where street improvement projects are planned.
