

Are you prepared for a disaster?

Who depends on you during an emergency? CERT Lite is a great training opportunity where you can develop your disaster preparedness skills, so you will be ready to help yourself and your loved ones. Want to learn CERT skills but can't spare eight weeks?

Our three-hour CERT Lite program might be just right for you!

CERT Lite is a station-style training that educates Bellevue residents in four critical lifesaving medical skills: personal preparedness, light disaster medical, fire safety, and light search and rescue. The program circulates throughout different Bellevue neighborhoods. Check to see when it will be offered in your community!

To register for an upcoming CERT Lite, go to www.eventbrite.com and search for "CERT Lite." Events will be posted online one month in advance.
