

CFH Eastside Men's Shelter

“A Path Toward Stable Living”

Creating a welcoming community is essential to the life of our shelter. The housed and unhoused community working together in healthy, relational, respectful ways is part of CFH’s mission and values because we know it leads to transformative changes. Change is slow and difficult. We strive to create an environment that serves as a launching pad, a place for growth, opportunity, education and getting healthy again, not a place of stagnation. Our program prioritizes empowering men by providing a place where people can be part of the support system and not just a recipient. Men share the responsibilities for cleaning the spaces, helping prepare the meals, maintaining the outdoor space, creating a garden, and serving on committees that benefit their path to stability. We engage the wider community through the sharing of meals, helping men to learn to cook, giving business and employment advice and support, money management, relationship and mental health support, and holding AA and NA meetings. We seek to inspire people to want to do more. The goal is not simply to get men off the streets but to provide opportunities, build relationships and engage the men in moving toward stable living.

On a square footage basis, we are investing in the following areas:

- Multipurpose flexible spaces
- Food storage, preparation, serving and dining areas
- Program service delivery spaces
- Reception, intake areas
- Respite rooms
- Laundry and bathrooms
- Storage for the guys
