it has some good wildlife habitat - would like to see that retained

The meadow habitat is important

the park doesn't currently offer an attraction for family

sports facility could be valuable - and there is a changing demographic that might want to use it

the location makes the park seem underutilized - it needs more attractive facilities to draw people in

restrooms are good

consider sound and light mitigation

not sure how many sports fields are needed

likes flexible fields in anticipation changes in athletic priorities

would love to see water play and playground areas

the existing picnic pavilion and trail area is very large - there is a large buffer between the picnic area and the residences

2012 MASTER PLAN

GROUP 3

WHAT WAS SUCCESSFUL ABOUT THE 2012 MASTER PLAN?

somewhat familiar w/ 2012 plan - like mix of activities/passive/recreative balance

not familiar - like mix of uses; lacking racquet sports (pickleball)

similar - not enough emphasis on trees in future iterations to have a mix of trees and water

presenting natural area, less density of activities, more and enjoyment of nature, less water park or athletic complex

not familiar - what is demand for it across fields? (high) loss of trees - trees are key

need of water garden, better atmosphere, do it a park level, rethink entire question

City: demand is high; pickleball and cricket new program;
