Subject: Additional Bike Bellevue feedback

[EXTERNAL EMAIL Notice!] Outside communication is important to us. Be cautious of phishing attempts. Do not click or open suspicious links or attachments.

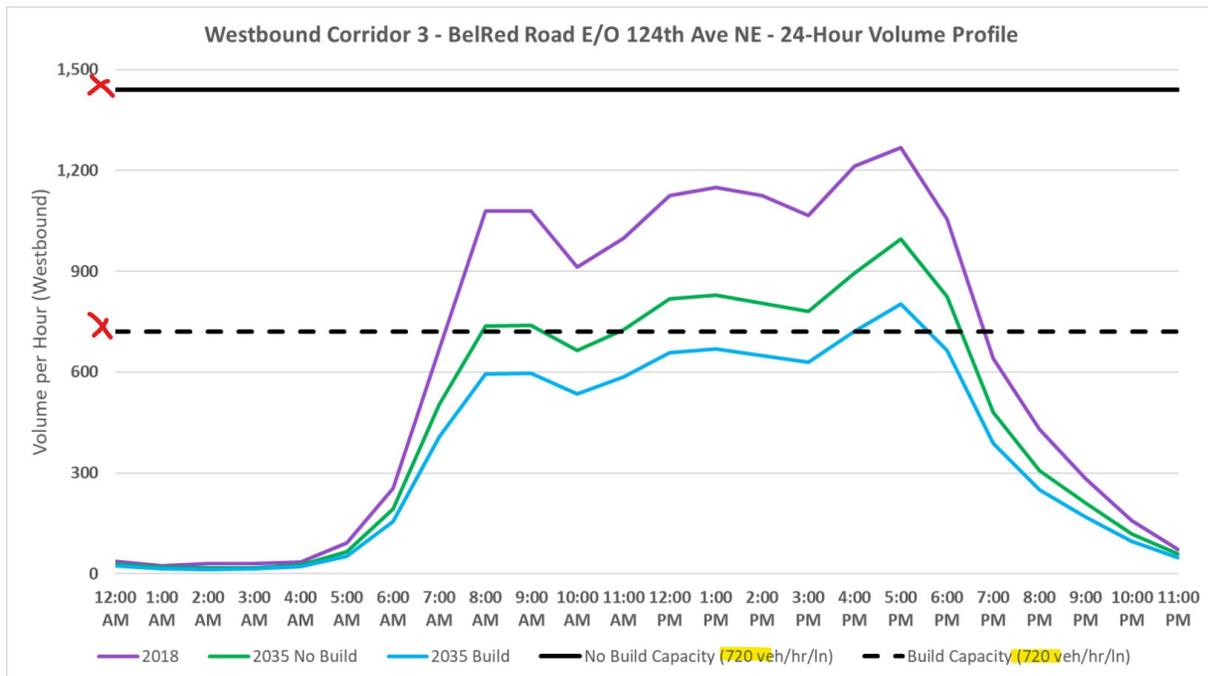

Franz,

A few additional suggestions I wanted to send your way for consideration:

- 1. In the design guide next to each corridor project, there is a list like the one below showing street classification, posted speed limit, and other details. I noticed that traffic volume (ADT) is listed, but anticipated bike volume is not. I am wondering if bike volume can be listed (projected for 2035). This would help the public better understand how the 210 additional bike trips generated in the project area are distributed between the 11 corridors, and have the added benefit of assisting the Commission prioritize projects.

Street Classification	Minor arterial
Traffic Volume (ADT)	21,000 - 25,000
Posted Speed Limit	30 mph
Existing Bicycle Facility	<ul style="list-style-type: none">• Conventional bike lane (Northbound)• Sharrow (Southbound)
Existing Bike LTS	<ul style="list-style-type: none">1 2 3 4 (Northbound)1 2 3 4 (Southbound)
Target Bike LTS	1 2 3 4
Safety Data	On the Vision Zero High Injury Network
Major Nearby Destinations	Highland Park, grocery stores and other retail
Population (600 Foot Buffer)	9,300 (2019) 9,600 (2050)
Employment (600 Foot Buffer)	15,900 (2019) 31,400 (2050)
Transit Route	King County Metro 249

- 2. I noticed in the directional volume/capacity line graphs you sent me that both Build and No Build capacity is shown at 720 vehicles/hour/lane in each. Should the No Build capacity be listed as 1,450 or so? (example below)

- Could you please double check the safety data for the projects against the crash data you sent me? I think a couple of the corridors don't match up, either showing more or less crashes for the respective time period. The rest appear to match. For example, Northup Way (#1) in the design guide shows "4 severe or fatality crashes (2011-2022), and the crash data you've sent shows 3 suspected serious injury crashes (2 auto, 1 bike, no fatalities). Bel-Red Road (#5) in the design guide shows "2 severe or fatality crashes (2011-2022), and the crash data shows 6 suspected serious injury crashes (5 auto, 1 pedestrian, no fatalities).

I hope this is helpful, and look forward to getting your thoughts on this.

Subject: I Support Bike Bellevue's Rapid Implementation

[EXTERNAL EMAIL Notice!] Outside communication is important to us. Be cautious of phishing attempts. Do not click or open suspicious links or attachments.

Dear . Bellevue Transportation Commission,

Thank you for your work in the last several years to improve biking in downtown Bellevue and the surrounding neighborhoods. Bike connections like the 108th bike lane and 12th St shared use path required leadership to follow through on, as well as a clear eyed focus on the data that really matters. These routes have made a big difference to the safety of Bellevue streets and my travel experiences.

I'm excited about the Bike Bellevue proposal. The plan is the necessary next step in making Bellevue work better for all transportation users, whether you walk, bike, bus, or drive. And, frankly, we must implement all these routes AND MORE to truly make Bellevue safe for all people, regardless of how we get around.

Next year, the Link Eastside Starter Line will begin running, and projects like Eastrail regional trail and the Grand Connection are also moving forward. The street-based bike network that Bike Bellevue advances will complement these regional assets, and means that Bellevue residents, workers and visitors can better access them.

Please move forward and rapidly implement all of the proposed corridors in Bike Bellevue. Please identify dollars, including seeking grant funding, to implement improvements as quickly as possible. Our city can't wait for safer access to biking.

Sincerely,

Regards,
Addison Allred

[EXTERNAL EMAIL Notice!] Outside communication is important to us. Be cautious of phishing attempts. Do not click or open suspicious links or attachments.

Dear . Bellevue Transportation Commission,

Thank you for your work in the last several years to improve biking in downtown Bellevue and the surrounding neighborhoods. Bike connections like the 108th bike lane and 12th St shared use path required leadership to follow through on, as well as a clear eyed focus on the data that really matters. These routes have made a big difference to the safety of Bellevue streets and my travel experiences.

I'm excited about the Bike Bellevue proposal. The plan is the necessary next step in making Bellevue work better for all transportation users, whether you walk, bike, bus, or drive. And, frankly, we must implement all these routes AND MORE to truly make Bellevue safe for all people, regardless of how we get around.

Next year, the Link Eastside Starter Line will begin running, and projects like Eastrail regional trail and the Grand Connection are also moving forward. The street-based bike network that Bike Bellevue advances will complement these regional assets, and means that Bellevue residents, workers and visitors can better access them.

Please move forward and rapidly implement all of the proposed corridors in Bike Bellevue. Please identify dollars, including seeking grant funding, to implement improvements as quickly as possible. Our city can't wait for safer access to biking.

Sincerely,

Regards,
Francis Barber

Subject: I Support Bike Bellevue's Rapid Implementation

[EXTERNAL EMAIL Notice!] Outside communication is important to us. Be cautious of phishing attempts. Do not click or open suspicious links or attachments.

Dear . Bellevue Transportation Commission,

Thank you for your work in the last several years to improve biking in downtown Bellevue and the surrounding neighborhoods. Bike connections like the 108th bike lane and 12th St shared use path required leadership to follow through on, as well as a clear eyed focus on the data that really matters. These routes have made a big difference to the safety of Bellevue streets and my travel experiences.

I'm excited about the Bike Bellevue proposal. The plan is the necessary next step in making Bellevue work better for all transportation users, whether you walk, bike, bus, or drive. And, frankly, we must implement all these routes AND MORE to truly make Bellevue safe for all people, regardless of how we get around.

Next year, the Link Eastside Starter Line will begin running, and projects like Eastrail regional trail and the Grand Connection are also moving forward. The street-based bike network that Bike Bellevue advances will complement these regional assets, and means that Bellevue residents, workers and visitors can better access them.

Please move forward and rapidly implement all of the proposed corridors in Bike Bellevue. Please identify dollars, including seeking grant funding, to implement improvements as quickly as possible. Our city can't wait for safer access to biking.

Sincerely,

Regards,
Kay Williams

After review it does not make any sense to close arterial traffic lanes for bikes. Traffic flow is already slowed at times.

[EXTERNAL EMAIL Notice!] Outside communication is important to us. Be cautious of phishing attempts. Do not click or open suspicious links or attachments.

Dear Mr. Loewenherz, I wanted to ask if any bike improvements are under consideration for 156th Ave NE between Crossroads Mall and Microsoft Main Campus/Redmond Technology Light Rail station? I don't find 156th Ave NE to be bike-friendly, but I am not aware of any alternatives, but I (and many others) often have a reason to go to Crossroads (restaurants, shopping, DMV, etc). So I think that making 156th Ave NE more bike friendly would help a lot of people to consider biking, especially considering all the apartments they've built along 156th. I am a full-time bike commuter and LTS4 rider so I do ride 156th in its current form. If it were more bike-friendly I would take my young son along with me too!

Thanks!

...Cheng

Next year, the Link Eastside Starter Line will begin running, and projects like Eastrail regional trail and the Grand Connection are also moving forward. The street-based bike network that Bike Bellevue advances will complement these regional assets, and means that Bellevue residents, workers and visitors can better access them.

Please move forward and rapidly implement all of the proposed corridors in Bike Bellevue. Please identify dollars, including seeking grant funding, to implement improvements as quickly as possible. Our city can't wait for safer access to biking.

Sincerely,

Regards,

Dear . Bellevue Transportation Commission,

Thank you for your work in the last several years to improve biking in downtown Bellevue and the surrounding neighborhoods. Bike connections like the 108th bike lane and 12th St shared use path required leadership to follow through on, as well as a clear eyed focus on the data that really matters. These routes have made a big difference to the safety of Bellevue streets and my travel experiences.

I'm excited about the Bike Bellevue proposal. The plan is the necessary next step in making Bellevue work better for all transportation users, whether you walk, bike, bus, or drive. And, frankly, we must implement all these routes AND MORE to truly make Bellevue safe for all people, regardless of how we get around.

Next year, the Link Eastside Starter Line will begin running, and projects like Eastrail regional trail and the Grand Connection are also moving forward. The street-based bike network that Bike Bellevue advances will complement these regional assets, and means that Bellevue residents, workers and visitors can better access them.

Please move forward and rapidly implement all of the proposed corridors in Bike Bellevue. Please identify dollars, including seeking grant funding, to implement improvements as quickly as possible. Our city can't wait for safer access to biking.

Subject: RE: Bike Bellevue
Date: Friday, October 27, 2023 12:54:00 PM

Hello Ed,

Thank you for contacting the City of Bellevue and sharing your interest in the Bike Bellevue project. We value your input as we strive to develop a safe and comfortable bicycle network.

Ensuring the public's safety is the highest responsibility of city government which is why [Bellevue is committed to Vision Zero](#). Bellevue's approach to bikeway design in the [Bike Bellevue project](#) draws inspiration from other Vision Zero cities and countries including the Netherlands, Sweden, and Denmark. The trailblazing effort in those countries is now more commonplace in North American cities especially those, like the City of Bellevue, who are members of the [National Association of City Transportation Officials \(NACTO\)](#).

Last month the [DRAFT Design Concepts Guide](#) was published and is available on the [Bike Bellevue](#) webpage. The [main section](#) is about 45 pages while the [appendices](#) are about 310 pages.

There will be a variety of ways to get involved over the upcoming months including:

- The [Bike Bellevue online engagement tool](#) is live until Friday, November 17th, 2023. All users can provide feedback (in the form of comments, questions, and buttons to agree or disagree with others) on the candidate designs for each Bike Bellevue corridor. All comments received will be reviewed and considered by the Bellevue Transportation Department and Transportation Commission.
- In addition, staff will be discussing Bike Bellevue at [Transportation Commission](#) meetings, including providing engagement summaries. Meetings are open to the public and are held in-person and online.

Please note that this response will be shared with the City Council and Transportation Commission. Feel free to contact me at 425-452-4077 if you have additional inquiries.

Feel free to contact me at 425-452-4077 if you have additional inquiries.

Thank you,
Franz

Subject: Bike Bellevue

Bellevue City Councilmembers,

I have been a resident of Bellevue for over ten years and have regularly cycled for both transportation and leisure during this time. My wife and I recently had a baby boy, and the area we are able to safely access by bike as a family has suddenly and dramatically shrunk. In areas without good bike facilities, we are forced onto bumpy sidewalks that jar our baby and are too narrow to comfortably pass pedestrians. Building out the Bike Bellevue project would be immensely valuable not just to us, as existing cyclists, but for anyone else who may want to access Downtown and Bel-Red without a car -- whether that is with a scooter, bicycle, e-bike, or walking.

As residents of the Bridle Trails area, we regularly drive on Northup Way, 140th Ave NE, and Bel-Red Rd at all hours of the day. I can personally confirm the results of the traffic studies which found excess lane capacity on these roads. In particular, Bel-Red Rd has already had a westbound lane closed for over a year for construction, and has been operating perfectly fine.

When we drive, these roads are merely one of many alternative routes to Downtown. We typically drive Bel-Red Rd or Northup Way simply because Google Maps tells us it is a few seconds faster than SR 520. Is scarce and valuable road space in a (soon-to-be) mixed-use urban neighborhood really best dedicated to providing a high speed thru route for drivers to bypass freeway traffic?

Thank you,

Ed Wang

And, frankly, we must implement all these routes AND MORE to truly make Bellevue safe for all people, regardless of how we get around.

Next year, the Link Eastside Starter Line will begin running, and projects like Eastrail regional trail and the Grand Connection are also moving forward. The street-based bike network that Bike Bellevue advances will complement these regional assets, and means that Bellevue residents, workers and visitors can better access them.

Please move forward and rapidly implement all of the proposed corridors in Bike Bellevue. Please identify dollars, including seeking grant funding, to implement improvements as quickly as possible. Our city can't wait for safer access to biking.

Sincerely,

Regards,

Dear . Bellevue Transportation Commission,

Thank you for your work in the last several years to improve biking in downtown Bellevue and the surrounding neighborhoods. Bike connections like the 108th bike lane and 12th St shared use path required leadership to follow through on, as well as a clear eyed focus on the data that really matters. These routes have made a big difference to the safety of Bellevue streets and my travel experiences.

I'm excited about the Bike Bellevue proposal. The plan is the necessary next step in making Bellevue work better for all transportation users, whether you walk, bike, bus, or drive. And, frankly, we must implement all these routes AND MORE to truly make Bellevue safe for all people, regardless of how we get around.

Would it be possible to get the existing bike corridors and the proposed Bike Bellevue Corridors into GIS layers that are viewable on Bellevue Map Viewer?

Can you send me the Conceptual Plans in PDF, DWG and or KMZ formats? I'm fine with records requesting if necessary.

It would also be helpful to be able to do have the existing bike infrastructure in KMZ format, if such information is available. Is this available?

Has the City considered any alternatives to the 11 segments?

If I need to records request any of the above that's fine, but I try to make Clarence's life easier, so if you can provide guidance on how to make the request I'd appreciate it, and I'm sure he would too.
