Tank Name: EBFW013
Tag Number: A0300
Tank Status: Operational
Tank Status Date: 01/01/1991
Tank Install Date: 00/01/1989
Tank Closure Date: Not reported
Capacity Range: 10,000 to 19,999 Gallons
Tank Permit Expiration Date: 06/30/2014
Tank Upgrade Date: 01/01/1991
Tank Spill Prevention: Spill Bucket/Spill Box
Tank Overfill Prevention: Automatic Shutoff (fill pipe)
Tank Material: Dielectric Coated Steel
Tank Construction: Double Wall Tank
Tank Tightness Test: Not reported
Tank Corrosion Protection: Sacrificial Anode
Tank Manifold: Not reported
Tank Release Detection: Interstitial Monitoring
Tank SFC Type: Sump
Pipe Material: Fiberglass
Pipe Construction: Double Wall Pipe
Pipe Primary Release Detection: Interstitial Monitoring (or Sump Sensor)
Pipe Second Release Detection: Automatic Line Leak Detector (ALLD)
Pipe Corrosion Protection: Corrosion Resistant
Pipe Pumping System: Pressurized System

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: WSQG
Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

COCA COLA BOTTLING CO BELLEVUE (Continued)

1000251918

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 11/20/2006
Evaluation: FOCUSED COMPLIANCE INSPECTION
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State

Evaluation date: 08/01/1996
Evaluation: COMPLIANCE ASSISTANCE VISIT
Area of violation: Not reported
Date achieved compliance: Not reported

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Registry ID: 110005305981

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

HAZARDOUS WASTE BIENNIAL REPORTER

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

Map ID

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D007

Waste name: CHROMIUM

Waste code: D022

Waste name: CHLOROFORM

Waste code: F002

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EPA Region: 10
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 07/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 10/20/2014
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 07/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 10/20/2014
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 07/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 10/20/2014
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 08/28/2014
Number of Days to Update: 94	Next Scheduled EDR Contact: 12/08/2014
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/01/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/08/2014	Telephone: 703-603-8704
Date Made Active in Reports: 08/22/2014	Last EDR Contact: 07/08/2014
Number of Days to Update: 45	Next Scheduled EDR Contact: 10/20/2014
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/11/2014

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014
Date Made Active in Reports: 04/09/2014
Number of Days to Update: 27

Source: Environmental Protection Agency
Telephone: (206) 553-1200

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014
Date Made Active in Reports: 04/09/2014
Number of Days to Update: 27

Telephone: (206) 553-1200
Last EDR Contact: 07/02/2014
Next Scheduled EDR Contact: 10/13/2014
Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014
Date Made Active in Reports: 04/09/2014

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/19/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 703-603-0695
Date Made Active in Reports: 07/15/2014	Last EDR Contact: 09/08/2014
Number of Days to Update: 116	Next Scheduled EDR Contact: 12/22/2014
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/19/2014	Source: Environmental Protection Agency

	Data Release Frequency: Semi-Annually

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Records of Emergency Release Reports

HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 03/31/2014	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 04/01/2014	Telephone: 202-366-4555
Date Made Active in Reports: 07/15/2014	Last EDR Contact: 07/01/2014
Number of Days to Update: 105	Next Scheduled EDR Contact: 10/13/2014
	Data Release Frequency: Annually

SPILLS: Reported Spills

Spills reported to the Spill Prevention, Preparedness and Response Division.

Date of Government Version: 06/12/2014	Source: Department of Ecology
Date Data Arrived at EDR: 06/13/2014	Telephone: 360-407-6950
Date Made Active in Reports: 07/11/2014	Last EDR Contact: 09/08/2014
Number of Days to Update: 28	Next Scheduled EDR Contact: 12/22/2014
	Data Release Frequency: Semi-Annually

SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> KING, WA	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map

<u>NWI Quad at Target Property</u> KIRKLAND	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/8 - 1/4 Mile WSW
Site Name:	BELLEVUE PLATING CO INC
Site EPA ID Number:	WAD078194107
Groundwater Flow Direction:	NOT AVAILABLE
Inferred Depth to Water:	15 feet to 25 feet
Hydraulic Connection:	The uppermost water-bearing strata is a glacial drift composed of sands, gravel, and clay with lenses of consolidated till.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
---------------	-------------------------	---

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
9	1/4 - 1/2 Mile SW	E
E18	1/2 - 1 Mile ENE	SE
E19	1/2 - 1 Mile ENE	ENE
23	1/2 - 1 Mile SE	NW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Everett

Soil Surface Texture: gravelly sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6.5 Min: 5.1
2	16 inches	31 inches	very gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141 Min: 42	Max: 6.5 Min: 5.1
3	31 inches	59 inches	very gravelly coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Clean gravels, Poorly Graded Gravel. COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel.	Max: 705 Min: 141	Max: 6.5 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Alderwood

Soil Surface Texture: gravelly sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 84 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 42 Min: 14	Max: 6 Min: 5.1
2	11 inches	26 inches	very gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 42 Min: 14	Max: 6 Min: 5.1
3	26 inches	59 inches	very gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 0.42 Min: 0.01	Max: 6 Min: 5.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 3

Soil Component Name: Indianola

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6.5 Min: 6.1
2	5 inches	29 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 6.5 Min: 6.1
3	29 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 705 Min: 141	Max: 6.5 Min: 6.1

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells

Source: Department of Health

Telephone: 360-236-3148

Group A and B well locations.

Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EDR Inquiry # 4066188.3

Contact: Lisa Kollasch

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EHS International, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

EHS International, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Independent Remedial Action Report

**The Journal American Facility
Bellevue, Washington**

**Prepared for
Persis Corporation
Honolulu, Hawaii**

Prepared by

CH2M HILL

August 1995

1 Introduction

This Independent Remedial Action Report (IRAR) describes the results of the soil and groundwater investigations completed at The Journal American facility in Bellevue, Washington. This investigation has been conducted for Persis Corporation, the former owner of the property, by CH2M HILL. This IRAR has been completed in accordance with the Washington Department of Ecology (Ecology) Guidance on Preparing Independent Remedial Action Reports Under the Model Toxics Control Act (MTCA), Chapter 70.105D RCW (DRAFT, March 1, 1994).

2 Executive Summary

The Journal American is an operating newspaper printing and publishing facility located at 1705 132nd Avenue NE, Bellevue, King County, Washington. The vicinity of The Journal American facility and the facility layout are shown in Figures 1 and 2, respectively. Prior to the construction of the newspaper publishing facility, the site was occupied by Whitescarver Brothers Trucking and the Ace Bulldozing Company. The existing press building (southern building) was constructed in 1983 on the portion of the site historically used by the trucking and bulldozing companies.

Petroleum hydrocarbon contaminated soils (gasoline and diesel) were encountered at The Journal American facility in the vicinity of two decommissioned underground fuel storage tank areas and an associated fuel dispensing island. One underground storage tank area is north of the press building (north underground storage tank). This area consisted of two 5,000-gallon gasoline storage tanks. The other tank area is located south of the press building (south underground storage tank); this area consisted of a single tank. The fuel dispensing island for this tank was located beneath the press building in the area of the current maintenance bay. Figure 3 shows the former tank locations and the areas of investigation.

Initially, 12 borings and one test pit were completed to investigate soils in the area of the two former underground storage tank farms (north and south of the press building). In addition, four shallow soil borings were completed around the printing press. Figure 4 identifies the initial soil boring and test pit locations.

Sample results from the initial borings and test pit detected petroleum-related contamination in soils in the vicinity of both the decommissioned tank locations. Approximately 75 tons of petroleum hydrocarbon contaminated soil was removed from the north underground storage tank area and taken to Regional Disposal Company for disposal at a (Resource Conservation and Recovery Act (RCRA) Subtitle D) landfill. Soil samples collected from the sidewalls and bottom of the soil excavation confirmed the removal of the contamination. No additional investigation or remedial action in the vicinity of the north underground storage tank area is planned.

Four groundwater monitoring wells were installed in the vicinity of the former south underground storage tank to determine the possible presence of petroleum-related products in the site groundwater. A groundwater monitoring program was implemented because analysis of a non-water quality reconnaissance water sample taken from an open borehole in the press building detected petroleum-related parameters for gasoline, diesel, and xylene in excess of the MTCA Method A cleanup level for groundwater (TPH-G). However, monthly groundwater sampling events conducted from September 1994 (date of well installation) through February 1995 detected no petroleum-related contaminant constituents in site groundwater in concentrations that approach or exceed MTCA Method A cleanup levels.

Sixty subsequent soil borings were completed within the press building and the area south of the press building to further delineate the horizontal and vertical depth of the petroleum hydrocarbon contamination detected in the south underground storage tank area. Approximately 40 tons of petroleum-contaminated soil was removed from the area immediately south of the press building in the vicinity of the former underground storage tank. Additional soil removal in this area was not possible because of concerns regarding the structural stability of the press building foundation wall by the excavation.

The majority of the remaining petroleum hydrocarbon contamination (approximately 430 cubic yards) associated with the south underground storage tank is located beneath the press building. Additional soil removal of contaminated soil is not possible at this time because of the potential impacts to the structural integrity of the press building and the operational constraints associated with publishing and distribution of The Journal American newspaper. Upon issuance of a No Further Action determination by Ecology, a 4-inch asphalt cap will be placed over the parking lot south of the press building to effectively "cap" the contamination left in place. Given that the continuing source of the contamination (the underground storage tank) was removed some time prior to construction of the press building in 1983 and that groundwater contamination is not present above cleanup levels after 12 years of presence in the soil, the cap is anticipated to be an effective containment measure.

Subject: Summary of Third (Final) Quarter 1996 Groundwater Sampling at The Journal American Site, Bellevue, Washington [TCP ID No. 309717]

Dear Ms. Atkinson:

This letter summarizes the analytical results from the third quarter 1996 (August 1996) groundwater monitoring at The Journal American Newspaper facility, Bellevue, Washington. An Independent Remedial Action Report (IRAR) was submitted to the Washington Department of Ecology (Ecology) on August 17, 1995. This letter supplements that IRAR submittal and our discussion on August 29, 1996.

As agreed during that discussion, this report represents the final monitoring episode at The Journal American prior to the issuance of the No Further Action letter from Ecology.

All monitoring wells were abandoned on September 16, 1996 by Cascade Drilling. As described in this letter, the abandonment work included casing removal, overdrilling the borehole, followed by placement of a grout seal and restoration of the surface paving.

Quarterly Groundwater Monitoring

In accordance with Ecology's September 28, 1995 interim letter, Persis Corporation completed short-term performance groundwater monitoring of four monitoring wells (MW-1, MW-2, MW-3, and MW-4) for three additional quarters (fourth quarter 1995 and first and second quarters of 1996). Previous groundwater sampling and analysis of monitoring wells MW-1, MW-2, MW-3, and MW-4 included total petroleum hydrocarbons (TPH) by analytical method WTPH-G, total petroleum hydrocarbons (TPH) by analytical method WTPH-D extended (or WTPH-D and WTPH-418.1) and total lead EPA Method 7421. Results from the first and second quarter 1996 monitoring indicated a minor exceedance of the MTCA Method A concentration limit of 1 mg/L for TPH at MW-3.

RECEIVED

SEP 23 1996

DEPT. OF ECOLOGY

CH2M HILL performed third quarter 1996 groundwater monitoring at two wells (MW-1 and MW-3) on August 22, 1996, as noted below. Monitoring wells MW-2 and MW-4 were not sampled based on their past monitoring record.

Groundwater Sampling Protocol

Groundwater samples were collected in accordance with the Workplan developed for the groundwater monitoring program at the site. The static groundwater levels in all four monitoring wells were measured to confirm groundwater flow direction. The static groundwater levels in MW-1, MW-2, MW-3, and MW-4 were measured before initiating purging using an electronic water level indicator. The water level in these wells was measured at least twice and was repeated if the two readings did not agree to within 0.02 feet. Groundwater static water levels are presented in Table 1. Monitoring well locations and groundwater flow gradients are presented in Figure 10 of the IRAR (CH2M HILL, August 1995).

TABLE 1
August 22, 1996 Groundwater Static Levels
The Journal American

Monitoring Well Number	Time	Depth to Water (feet)	Water Level Elevation ¹ (feet)
MW-1	1105	11.30	88.22
MW-2	1108	7.83	92.55
MW-3	1110	7.98	92.41
MW-4	1112	9.57	90.87

¹Water level elevations are based on an arbitrary site datum of 100 feet.

Purge volumes for monitoring wells MW-1 and MW-3 were calculated based on well total depth and measured water levels. The two monitoring wells were purged and sampled using a Grundfos Rediflo 2 sampling pump. A Honda generator was used to power the Grundfos unit. The gasoline engine driven generator was positioned downwind from purging and sampling activities. The pump was run at the lowest possible setting that still produced flow in each of the wells. Wells were purged a minimum of three casing volumes. The field parameters temperature, pH, and conductivity were within 10% between the second and third casing volume, therefore it was not necessary for an additional casing volume to be purged from either well.

Pump speed is measured in Hz on the Grundfos control panel. The following settings were used for purging and sampling: MW-1, 87 Hz maximum; MW-3, 80 Hz maximum. MW-1 and MW 3 required an increasing pump speed as the water level dropped to overcome the hydraulic head.

During sampling at MW 3 the pump had to gradually be lowered in order to keep it submerged. When the pump was within approximately two feet of the bottom, pumping ceased and the well was allowed to recover.

The Grundfos pump was decontaminated by thoroughly washing in a solution of tap water and Liquinox detergent. The pump circulated this solution for approximately 5 minutes. After washing the pump was submerged in tap water and allowed to pump for approximately 5 minutes. The pump was then sprayed with a 10% nitric acid solution

followed by a thorough rinse with 1 gallon of distilled water. HDPE discharge tubing was replaced with new tubing between each well.

A field duplicate sample was obtained at well MW-3. The duplicate sample was designated JA-MW-5 and was given a sample time of 1400.

An equipment blank sample was obtained after MW-1 and MW-3 were sampled. The pump was decontaminated as described above. Then ASTM Type II water was poured over and pumped through the pump. The rinsate was collected into appropriate sample containers. The equipment blank sample was designated JA-EB with a sample time of 1430.

The ASTM Type II water was produced by RICCA, catalog number 9150-1, lot number E-171.

Analytical Results

Samples were transported in a cooler containing sufficient double bagged ice to maintain an internal temperature of 4°C. The sample cooler was transported under chain-of-custody by CH2M HILL to Analytical Resources, Inc., Seattle, Washington on August 22, 1996. Standard CH2M HILL chain-of-custody procedures were followed at all times. Samples from monitoring wells MW-1 and MW-3 were analyzed using the following methods:

- TPH, (WTPH-G)
- TPH, diesel-extended (WTPH-D extended)
- Total lead (EPA Method 7421)
- Volatile Organic Compounds (VOCs, EPA Method 8260)
- Polynuclear Aromatic Hydrocarbons (PAH, EPA Method 8270-SIM)

Analytical results from the August 1996 groundwater sampling indicate no petroleum hydrocarbon-related parameter levels and no lead concentrations in excess of Model Toxic Control Act (MTCA) Method A cleanup levels for groundwater. The "basic" (TPH-G, TPH-D, and lead) analytical results for monitoring wells MW-1 and MW-3 and a duplicate of MW-3 are summarized in Table 2.

TABLE 2
Groundwater Analytical Results, August 22, 1996 (micrograms per liter, µg/L)
The Journal American

Monitoring Well	Total Petroleum Hydrocarbon (diesel)	Total Petroleum Hydrocarbon (gasoline)	Total Lead
MTCA Method A Cleanup Level	1,000 ¹	1,000 ¹	5
MW-1	250 U	250 U	2
MW-3	580	400	1 U
MW-3 Duplicate	490	400	2

¹Cleanup level of 1,000 µg/L is based on the sum of TPH-D and TPH-G.
 U = Compound not detected at given detection limit

Because the MTCA Method A cleanup level for TPH is based on qualitative taste and odor considerations, CH2M HILL also completed analysis for the following other MTCA Method A risk or standard-based constituents:

- Principal gasoline constituents: benzene, toluene, ethyl benzene, xylene (BTEX),
- Gasoline additives: 1,2-dichloroethane and ethylene dibromide, and
- Diesel carcinogenic PAHs: benzo(a)pyrene, benzo(a)anthracene, benzo(b)fluoranthene, benzo(k)fluoranthene, chrysene, dibenzo(a,h)anthracene, pyrene, and indeno(1,2,3-c,d)pyrene.

The results of this analysis for MW-3 is presented in Table 3. The additional constituents noted above were not detected in the sample from MW-1, the downgradient well near the south property boundary. Complete laboratory analytical summary reports are included in Attachment A.

TABLE 3
Summary of Groundwater Monitoring Program at MW-3
The Journal American
 (All units in µg/L)

Constituent	Cleanup	MW-3 Monitoring Results	
	Criteria/Standard	August 1996 (average)	Previous Maximum
Total Petroleum Hydrocarbons	1,000	935	1,170
Gasoline Hydrocarbons			
Benzene	5	0.85	1.2
Ethyl Benzene	30	5.3	7.8
Toluene	40	0.4	<1.0
Xylenes	20	12.7	20.3
Gasoline Additives			
1,2-Dichloroethane	5	<0.2	--
Ethylene Dibromide	0.01	<0.2	--
Lead	5	1.5	5
Diesel Hydrocarbons			
Total Carcinogenic PAHs	0.1	<0.1*	--
Benzo(a)anthracene	--	<0.1	--
Benzo(b)fluoranthene	--	<0.1	--
Benzo(k)fluoranthene	--	<0.1	--
Benzo(a)pyrene	--	<0.1	--
Chrysene	--	<0.1	--
Dibenzo(a,h)anthracene	--	<0.1	--
Indeno(1,2,3-c,d)pyrene	--	<0.1	--
Pyrene	--	<0.1	--

Notes:

August 1996 results are the average constituent concentrations between primary sample and blind duplicate from MW-3.

*Total carcinogenic PAH value computed by summing individual constituents.

As agreed to during our August 29, 1996 discussion, the analytical results from the August 1996 groundwater sampling event supports the IRAR conclusions that no further action is necessary at this facility.

Well Abandonment Procedures

CH2M HILL contracted Cascade Drilling Inc. of Woodinville WA (Cascade) to perform the well abandonments at the Journal American site. Well abandonment was completed on September 16, 1996. Cascade was the drilling contractor that installed the wells and was familiar with the well construction and the Journal American site.

All four monitoring wells were abandoned by the following steps:

- Jackhammer out the flush monuments and surrounding concrete;
- Overdrill the borehole using a CME 55 hollow-stem-auger drilling rig (includes drilling out the PVC casing, bentonite seals and sand pack);
- Drum the cuttings generated from the overdrilling activities;
- Install hydrated bentonite chips to within three feet of land surface (chips were hydrated with potable water at a minimum, every five feet and at the top of the seal); and
- Install a three-foot thick concrete seal (dyed black to match the asphalt) as the surface completion

Construction and abandonment information for the four monitoring wells at the Journal American site is provided in Table 4 below. Cascade Drilling has sent the abandonment reports to Ecology as required under WAC 173-160-560.

TABLE 4
Well Construction and Abandonment Information
The Journal American

Monitoring Well Number	Depth to Water ¹ (ft.)	Total Well Depth (ft.)	Overdrilled Depth (ft.)	Backfill Material
MW-1	11.30	19.52	20	hydrated bentonite chips, concrete
MW-2	7.83	13.60	15	hydrated bentonite chips, concrete
MW-3	7.98	15.69	20	hydrated bentonite chips, concrete
MW-4	9.57	19.25	20	hydrated bentonite chips, concrete

¹Depth to water data from the August 22, 1996 sampling event

Conclusions

As noted in our August 1995 IRAP report, the majority of the remaining petroleum hydrocarbon contaminated soil (approximately 430 cubic yards) associated with the former south underground storage tank at The Journal American is located beneath the press building. Additional soil removal is not possible because of potential impacts to the structural integrity of the press building and the operational constraints associated with publishing and distributing The Journal American newspaper. Given that the source of the contamination (i.e., the underground storage tank) was removed some time prior to construction of the press building in 1983; that source area is capped by the press building,

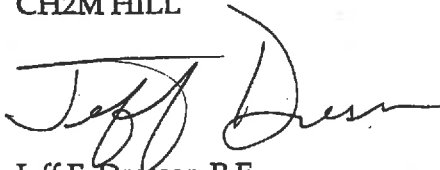

that the surrounding area is covered with a 4" asphalt cap; and that groundwater contamination for any constituent is not present above MTCA Method A cleanup levels after 13 years of presence in the soil, the cap has demonstrated its effectiveness as an effective containment measure. Accordingly, a No Further Action determination should be issued by Ecology for this site.

As discussed on August 29, 1996, the Restrictive Covenant that will be recorded in the property's deed has been separately communicated to you through Persis' outside counsel on this matter.

If you have any questions on the information contained in this letter report, or the attached analytical reports, please feel free to telephone me at 503/235-5022, extension 4467.

Sincerely,

CH2M HILL

TOXICS CLEANUP PROGRAM

October 2009

1.0 INTRODUCTION

This document is a review by the Washington State Department of Ecology (Ecology) of post-cleanup site conditions and monitoring data to ensure that human health and the environment are being protected at the Journal American (Site). Cleanup at this Site was implemented under the Model Toxics Control Act (MTCA) regulations, Chapter 173-340 Washington Administrative Code (WAC).

Cleanup activities at this Site were completed under the Independent Remedial Action Program (IRAP). The cleanup actions resulted in concentrations of petroleum hydrocarbons remaining at the Site which exceed MTCA cleanup levels. The MTCA cleanup levels for soil are established under WAC 173-340-740. The MTCA cleanup levels for groundwater are established under WAC 173-340-720. WAC 173-340-420 (2) requires that Ecology conduct a periodic review of a site every five years under the following conditions:

- (a) Whenever the department conducts a cleanup action
- (b) Whenever the department approves a cleanup action under an order, agreed order or consent decree
- (c) Or, as resources permit, whenever the department issues a no further action opinion;
- (d) and one of the following conditions exists:
 - 1. Institutional controls or financial assurance are required as part of the cleanup
 - 2. Where the cleanup level is based on a practical quantitation limit
 - 3. Where, in the department's judgment, modifications to the default equations or assumptions using site-specific information would significantly increase the concentration of hazardous substances remaining at the site after cleanup or the uncertainty in the ecological evaluation or the reliability of the cleanup action is such that additional review is necessary to assure long-term protection of human health and the environment.

When evaluating whether human health and the environment are being protected, the factors the department shall consider include [WAC 173-340-420(4)]:

- (a) The effectiveness of ongoing or completed cleanup actions, including the effectiveness of engineered controls and institutional controls in limiting exposure to hazardous substances remaining at the site;
- (b) New scientific information for individual hazardous substances of mixtures present at the site;
- (c) New applicable state and federal laws for hazardous substances present at the Site;
- (d) Current and projected site use;
- (e) Availability and practicability of higher preference technologies; and
- (f) The availability of improved analytical techniques to evaluate compliance with cleanup levels.

The Department shall publish a notice of all periodic reviews in the Site Register and provide an opportunity for public comment.

Site groundwater in concentrations that approach or exceed MTCA Method A cleanup levels. Sixty subsequent soil borings were completed within the press building and the area south of the press building to further delineate the horizontal and vertical depth of the petroleum hydrocarbon contamination detected in the south underground storage tank area. Approximately 40 tons of petroleum-contaminated soil was removed from the area immediately south of the press building in the vicinity of the former underground storage tank. Additional soil removal in this area was not possible because of concerns regarding the structural stability of the press building foundation wall by the excavation.

The majority of the remaining petroleum hydrocarbon contamination (approximately 430 cubic yards) associated with the south underground storage tank is located beneath the press building. Additional soil removal of contaminated soil was not possible because of the potential impacts to the structural integrity of the press building. Prior to issuance of a 'No Further Action' (NFA) determination by Ecology, a 4-inch asphalt cap was placed over the parking lot south of the press building to effectively "cap" the contamination left in place. Given that the source of the contamination (the underground storage tank) was removed some time prior to construction of the press building in 1983, most of the contaminated soil was removed, and that groundwater contamination is not present above cleanup levels, the cap is an effective containment measure.

Ecology issued a NFA letter on October 7, 1996, after the restrictive covenant was recorded.

2.3 Sample Results

Please see the preceding section as well as Ecology files for information regarding sample results.

2.4 Cleanup Levels

MTCA Method A cleanup levels were not met at a standard point of compliance, but a conditional point of compliance was established which was determined to be protective of human health and the environment.

2.5 Restrictive Covenant

Based on the site use, surface cover and cleanup levels, it was determined that the Site was eligible for a 'No Further Action' determination if a Restrictive Covenant was recorded for the property. A Restrictive Covenant was recorded for the Site in 1996 which imposed the following limitations:

- a) No activities may be conducted at the property that may interfere with the groundwater monitoring and the continued protection of the Independent Remedial Action;
- b) No activities may be conducted that may result in the release of the petroleum hydrocarbon contamination capped by the press building, loading dock and asphalt paving identified as capping the petroleum hydrocarbon contamination;
- c) Water well(s) shall not be installed on the property for purpose of domestic water use;

3.0 PERIODIC REVIEW

3.1 Effectiveness of completed cleanup actions

The Restrictive Covenant for the Site was recorded and is in place. This Restrictive Covenant prohibits activities that will result in the release of contaminants at the Site without Ecology's approval, and prohibits any use of the property that is inconsistent with the Covenant. This Restrictive Covenant serves to ensure the long term integrity of the asphalt and building as a cap.

Based upon the site visit conducted on November 4, 2009, the remedy at the Site continues to eliminate exposure to contaminated soils by ingestion and contact. The asphalt appears in satisfactory condition and no repair, maintenance, or contingency actions have been required. The Site is operating as an appliance store and warehouse. A photo log is available as Appendix 6.5.

Soils with TPH concentrations higher than MTCA cleanup levels are still present at the Site. However, the remedy, Site structure and asphalt surface, prevent human exposure to this contamination by ingestion and direct contact with soils. The Restrictive Covenant for the property will ensure that the contamination remaining is isolated, contained and controlled.

3.2 New scientific information for individual hazardous substances for mixtures present at the Site

There is no new scientific information for the contaminants related to the Site.

3.3 New applicable state and federal laws for hazardous substances present at the Site

The cleanup at the Site was governed by Chapter 173-340 WAC (1996 ed.). WAC 173-340-702(12) (c) [2001 ed.] provides that,

“A release cleaned up under the cleanup levels determined in (a) or (b) of this subsection shall not be subject to further cleanup action due solely to subsequent amendments to the provision in this chapter on cleanup levels, unless the department determines, on a case-by-case basis, that the previous cleanup action is no longer sufficiently protective of human health and the environment.”

Although cleanup levels changed for petroleum hydrocarbon compounds as a result of modifications to MTCA in 2001, contamination remains at the site above the new MTCA Method A and B cleanup levels. Even so, the cleanup action is still protective of human health and the environment. A table comparing MTCA cleanup levels from 1991 to 2001 is available below.

4.0 CONCLUSIONS

The following conclusions have been made as a result of this periodic review:

- The cleanup actions completed at the Site appear to be protective of human health and the environment.
- Soils cleanup levels have not been met at the standard point of compliance for the Site; however, the cleanup action has been determined to comply with cleanup standards since the long-term integrity of the containment system is ensured, and the requirements for containment technologies are being met.
- The Restrictive Covenant for the property is in place and continues to be effective in protecting public health and the environment from exposure to hazardous substances and protecting the integrity of the cleanup action.

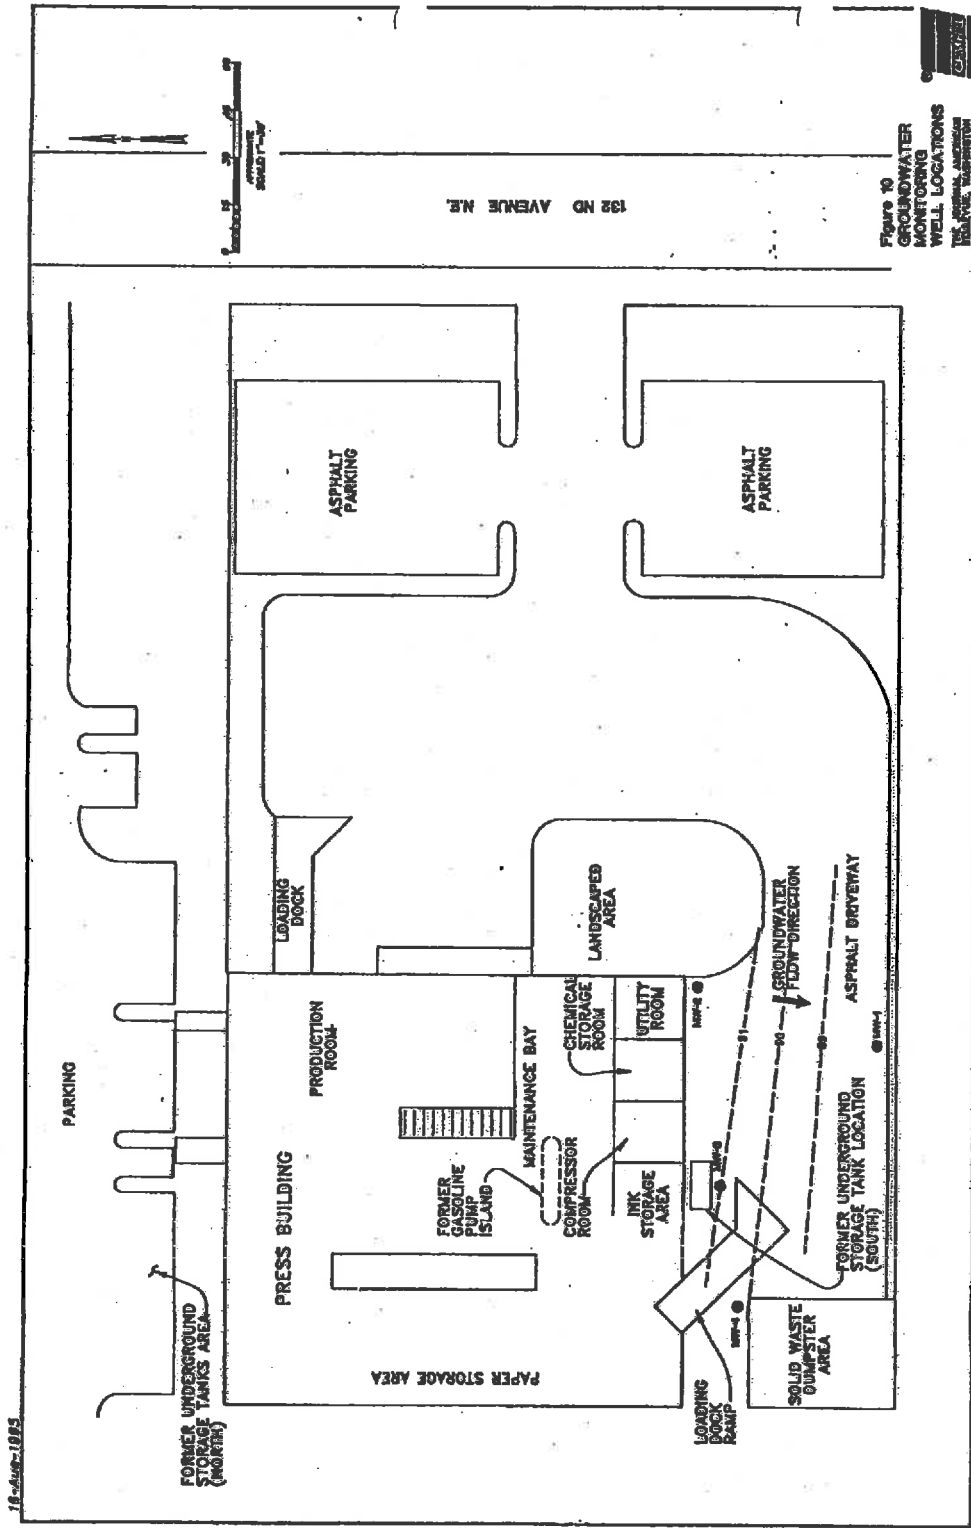

Based on this periodic review, the Department of Ecology has determined that the requirements of the Restrictive Covenant continue to be met. No additional cleanup actions are required by the property owner. It is the property owner's responsibility to continue to inspect the site to assure that the integrity of the remedy is maintained.

4.1 Next Review

The next review for the site will be scheduled five years from the date of this periodic review. In the event that additional cleanup actions or institutional controls are required, the next periodic review will be scheduled five years from the completion of those activities.

6.0 APPENDICES

6.2 Site Plan

6.4 Environmental Covenant

COPY

RESTRICTIVE COVENANT

Notice is hereby given that the property described on Exhibit "A" attached hereto and known as, the press building of The Journal American newspaper property, located at 1705 132nd Avenue, Bellevue, Washington, 98005, has been the subject of an Independent Remedial Action conducted under Wash. Rev. Code Section 70.105D (1993). Certain of the on-site soils are contaminated with petroleum hydrocarbons and are capped by the press building and its parking lot area, as depicted by Figures 6 through 9 of the INDEPENDENT REMEDIAL ACTION REPORT: The Journal American Facility, Bellevue, Washington (the "Report"), prepared by CH2M HILL, dated August 1995 and submitted to the Washington Department of Ecology's (WDOE), Northwest Region, Bellevue Washington. At the time of the Report, the maximum residual soil concentration of total petroleum hydrocarbon (TPH) gasoline was 1,200 milligrams per kilogram (mg/kg) at boring locations B04 at the 10 foot depth and B10 at the 7.5 foot depth and the maximum residual concentration of TPH diesel was 12,000 mg/kg at B04 at the 10 foot depth. These maximum soils concentrations exceed the Washington State Models Toxics Control Act (MTCRA) Level A cleanup standards of 100 mg/kg gasoline in soil and 200 mg/kg diesel in soil. Until such time as this covenant is removed according to its terms, use of this property is restricted in accordance with Wash. Admin. Code (WAC) 173-340-440, which is incorporated here by reference, as follows:

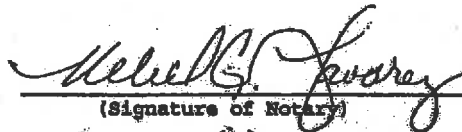

- a) No activities may be conducted at the property that may interfere with the groundwater monitoring and the continued protection of the Independent Remedial Action;
- b) No activities may be conducted that may result in the release of the petroleum hydrocarbon contamination capped by the press building, loading dock and asphalt paving identified as capping the petroleum hydrocarbon contamination in Figures 6 through 9 above;
- c) Water wall(s) shall not be installed on the property for purpose of domestic water use;
- d) Written notification must be given to the WDOE or its successor agency before excavating, moving or removing the soils or material beneath the press building, loading dock, and asphalt paving which are capped by these structures. In the event the cement flooring and foundation of the press building or the loading dock are demolished, all TPH contaminated soils above applicable WAC 173-340-700 through 173-340-760 cleanup standards shall be removed and disposed of in accordance with applicable law or, in the alternative, appropriate sampling and testing shall be completed that documents that the remaining TPH contaminated soils are below applicable cleanup criteria. 8 FINDINGS & CONCLUSIONS

JMK performed a Phase I ESA of the property and determined the following.

8.1 On-Site Findings

8.1.1 Property Reconnaissance

The subject site property consists of a car dealership offices and a service garage located at the central northwestern portion of site, with an in line carwash located at the central southern property line. Paved parking is found to the east and south of the subject site buildings.

8.1.2 Standard Historical Source Inquiry

Based on available historical records, the subject property was developed with a commercial building in the northwest corner of the site by 1965 and was occupied by Ace Bulldozing and Whitescarver Brothers Trucking. Two underground fuel tank areas were located on the subject property including three underground storage tanks (USTs). The fuel tanks were removed when the property was redeveloped with the current commercial building for a newspaper manufacturer in 1983. In 1995, 40- tons of hydrocarbon contaminated soil remaining from the previous fuel tanks was removed from south of the subject building. Approximately 430-cubic yards of TPH contaminated soil associated with the south previous tank storage area remains beneath the subject building. The newspaper manufacturer occupied the property from 1983 until approximately 2002. In 2003, the subject building was reconfigured for the Lexus dealership that currently occupies the subject property.

According to a previous Independent Remedial Action Report conducted in 1995 by CHM Hill, Inc., two decommissioned tank areas were located on the subject property from the previous trucking company that operated at the subject property prior to 1983. One of the tank areas was located north of the press building and the other was located south of the press building. Twelve soil borings and one test pit around the previous tank farms were advanced and samples collected and analyzed for TPH. Four soil borings were also advanced in the area of the printing press. Four monitoring wells were installed in the vicinity of the south storage tank. Monthly groundwater monitoring was conducted for six months and indicated that no petroleum related concentrations met or exceeded MTCA methods. Sixty borings were advanced within the press building and south of the press building. 40- tons of soil was removed from south of the press building. Additional removal was not possible due to concerns regarding the structural integrity of the building during removal. Approximately 430-cubic yards of TPH contaminated soil associated with the south tank storage area is located beneath the building.

According to a Phase I Environmental Site Assessment conducted in September of 2002 by Adapt, no ongoing or past conditions that would constitute recognized environmental conditions (RECs) was found. Adapt identified a "suspect environmental condition" regarding a previous report that estimated that 550-cubic yards of TPH impacted soil remains under the subject building. Despite a NFA letter from the department of Ecology, a certain amount of risk remains onsite. Adapt recommended that if any future excavation under the building generates an odor or impacted soils that need to be removed offsite, that the materials need to be handled as petroleum contaminated materials.

A 4-inch asphalt cap was to be placed over the parking lot south of the press building to effectively "cap" off the remaining contamination.

A limited Phase II investigation was conducted during JMK's Phase I site investigation on January 5, 2007 to assess the subsurface condition at the property. This was a preliminary investigation to determine if shallow soils at the property have been impacted by former operations by The Journal American (newspaper manufacturer) and Ace Bulldozing and Whitescarver Brothers Trucking. JMK prepared the Scope of Work based on a review of the 2002 LSI Adapt Phase I ESA and 1995 CH2M Hill Independent Remedial Action reports. Three soil borings were advanced to a depth of 20-feet below ground surface (bgs) in the

southwestern portion of the subject site in the areas of the former USTs, ink and chemical storage areas. Groundwater was encountered at approximately 20-feet below ground surface (bgs). Soil and water samples were collected and submitted for analysis by EPA Method 8012B (TPH Gasoline Including BETX). Results of the laboratory analysis of the samples indicated non-detectable concentrations of the constituents. Field screening of samples also showed no evidence of significant soil or groundwater contamination. Based on JMK's subsurface investigation, any remaining TPH contamination found in previous investigations has not migrated from beneath the subject building and did not affect adjacent soils or groundwater.

8.1.3 Government Records Inquiry

The subject property was listed with the RCRA and FINDS databases as *Eastside Journal* as a small quantity generator of hazardous waste with no reported violations. This listing alone does not indicate an environmental concern with regard to the subsurface condition at the subject property.

8.2 Off-Site Issues

No nearby properties were identified that could potentially impact the subject property.

8.3 Conclusions

JMK performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E-1527-00 for the subject property. Any exceptions to, or deletions from, this practice are described in Section 11 of this report.

No evidence of recognized environmental conditions (RECs) was identified at the property.

4.0 RESULTS AND CONCLUSIONS

4.1 Results

The results of JMK's subsurface investigation are summarized as follows:

- Field screening of samples showed no evidence of significant soil contamination.

Laboratory Test Results:

Methods	B1-20' Soil	B1-20' GW	B2-20' Soil
Units in $\mu\text{g}/\text{Kg}$ or parts per billion 8021B TPH + GAS, BTEX	ND	ND	ND

Methods	B2-20' GW	B3-20' Soil	B3-20' GW
Units in $\mu\text{g}/\text{Kg}$ or parts per billion 8021B TPH + GAS, BTEX	ND	ND	ND

4.2 Conclusions and Recommendations

Based on the analytical results and field observations for the sampling locations, No evidence of significant soil or groundwater contamination was found at the property.

Based on our investigation, No further action is required at the subject property.

Re: Restrictive Covenant for 1625 – 132nd Ave NE, Bellevue, Washington

Ladies and Gentlemen:

The undersigned is the owner of OB Bellevue Properties, LLC, the owner of certain real property and improvements commonly known as 1625 – 132nd Ave. NE, Bellevue, Washington (the "1625 Property"). Northwest Media (Washington), L.P., an Ohio limited partnership ("NMW") owns the immediately adjacent real property and improvements commonly known at 1705 – 132nd Ave NE, Bellevue, Washington (the "1705 Property"). NMW is the previous owner of the 1625 Property together with the 1705 Property, but conveyed the 1625 Property to OB Bellevue Properties II, LLC on or about April 1, 2003. OB Bellevue Properties II, LLC subsequently transferred the 1625 Property to the undersigned (OB Bellevue Properties, LLC) on June 16, 2004.

The 1625 Property and the 1705 Property are each currently encumbered by that certain Restrictive Covenant, dated September 25, 1996 and recorded under King County Recording No. 9609271199 (the "Restrictive Covenant"). The Restrictive Covenant states that the soil contamination is located at the site known as the "press building of the Journal American newspaper property." The map attached to the Restrictive Covenant indicates that the affected property is the 1625 Property only. The map does not indicate any contamination on the 1705 Property. Accordingly, NMW has requested that Washington State Department of Ecology ("DOE") consent to the release of the Restrictive Covenant from the 1705 Property. As a condition of its consent DOE has requested this letter from the undersigned.

The undersigned hereby consents to the release of the 1705 Property from the Restrictive Covenant for the purposes of correcting and clarifying the real property encumbered by the Restrictive Covenant. The undersigned confirms that the 1625 Property remains subject to the Restrictive Covenant and that the Restrictive Covenant is in full force and effect.

Very truly yours,

OB Bellevue Properties, LLC

Michael O'Brien

DEPT OF ECOLOGY

RESTRICTIVE COVENANT

Notice is hereby given that the property described on Exhibit "A" attached hereto and known as, the press building of The Journal American newspaper property, located at 1705 132nd Avenue, Bellevue, Washington, 98005, has been the subject of an Independent Remedial Action conducted under Wash. Rev. Code Section 70.105D (1993). Certain of the on-site soils are contaminated with petroleum hydrocarbons and are capped by the press building and its parking lot area, as depicted by Figures 6 through 9 of the **INDEPENDENT REMEDIAL ACTION REPORT: The Journal American Facility, Bellevue, Washington (the "Report")**, prepared by CH2M HILL, dated August 1995 and submitted to the Washington Department of Ecology's (WDOE), Northwest Region, Bellevue Washington. At the time of the Report, the maximum residual soil concentration of total petroleum hydrocarbon (TPH) gasoline was 1,200 milligrams per kilogram (mg/kg) at boring locations B04 at the 10 foot depth and B10 at the 7.5 foot depth and the maximum residual concentration of TPH diesel was 12,000 mg/kg at B04 at the 10 foot depth. These maximum soils concentrations exceed the Washington State Models Toxics Control Act (MPCA) Level A cleanup standards of 100 mg/kg gasoline in soil and 200 mg/kg diesel in soil. Until such time as this covenant is removed according to its terms, use of this property is restricted in accordance with Wash. Admin. Code (WAC) 173-340-440, which is incorporated here by reference, as follows:

- a) No activities may be conducted at the property that may interfere with the groundwater monitoring and the continued protection of the Independent Remedial Action;
- b) No activities may be conducted that may result in the release of the petroleum hydrocarbon contamination capped by the press building, loading dock and asphalt paving identified as capping the petroleum hydrocarbon contamination in Figures 6 through 9 above;
- c) Water well(s) shall not be installed on the property for purpose of domestic water use;
- d) Written notification must be given to the WDOE or its successor agency before excavating, moving or removing the soils or material beneath the press building, loading dock, and asphalt paving which are capped by these structures. In the event the cement flooring and foundation of the press building or the loading dock are demolished, all TPH contaminated soils above applicable WAC 173-340-700 through 173-340-760 cleanup standards shall be removed and disposed of in accordance with applicable law or, in the alternative, appropriate sampling and testing shall be completed that documents that the remaining TPH contaminated soils are below applicable cleanup criteria. A report documenting

these facts shall be submitted to WDOE or its successor agency for review and approval.

- e) Written notification must be given to WDOE or its successor agency before removal or destruction of those areas of the existing press building, loading dock, or asphalt paving identified as capping the petroleum hydrocarbon contamination in Exhibit "B";
- f) Written notification must be given to the WDOE or its successor agency of owner's intent to convey any interest in the property. Further, no conveyance of title, easement, lease, or other interest in the property will be consummated by the owner of the property without notice of this Restrictive Covenant;
- g) The owner must notify WDOE or its successor agency, prior to any use of the property that is inconsistent with the terms of this Restrictive Covenant.
- h) The WDOE or successor agency or its designated representative shall have the right to enter the property after 24-hour prior notice, at reasonable times for the purpose of evaluating compliance with the terms of this Restrictive Covenant, to take samples and to inspect records related to the Independent Remedial Action;
- i) Upon remediation (by removal or otherwise) of the petroleum contaminated soil to below those levels set forth in Wash. Admin. Code 173-340-700 through 173-340-760, the owner may record an instrument stating that this restrictive covenant is of no further force or effect, provided the owner has the consent of the WDOE or its successor agency to so do.

IN WITNESS WHEREOF, the undersigned has executed this instrument as of the 25 day of September, 1996.

UNDERGROUND STORAGE TANK

30-Day Notice of Intent to Close/Decommission Tanks

Lewis Spitzer
007359

The purpose of this form is to provide the Department of Ecology with notice of intent to close/decommission an UST. It must be received 30 days prior to the closure activities. It must be signed and dated by either the owner/operator of the UST to be closed or his/her authorized representative. (This could be the firm contracted to do the work.) Ecology will notify the identified person of the earliest date closure/decommissioning activities may commence.

For questions on completing this form please call (206) 459-6293.

Please type or use ink.

The completed checklist should be mailed to:

Underground Storage Tank Section

October 31, 1986

Dear *Mr. Kelly,*

Your Underground Storage Tank Notification Form is being returned to you for completion or correction. The form was returned for the reason(s) indicated below. Please complete or correct the form and resubmit it to the Department of Ecology (ATTN: Melany Vorass) by Nov. 14, 1986.

1. [] The information regarding individual tanks was entered incorrectly. The proper way to enter this information is to put the tank identification code for the first tank on the first row of column "a" and the additional information regarding that tank (age, capacity, etc.) on the first row of the remaining columns (use "1" - "n" only if the tank is permanently out of service). Information for each additional tank should be entered in the same way, using separate rows for each. Please carefully read and follow the instructions above each column. AN EXAMPLE, IN RED, IS ENTERED ON THE FORM WE ARE RETURNING TO YOU. PLEASE CORRECTLY COMPLETE THE BLANK FORM WE HAVE ENCLOSED.

2. [X] The following section(s) of the form were not completed, or were completed incorrectly.

I. OWNERSHIP OF THE TANK(S) (Page 1)

- ___ Ownership Status (current owner, former owner, etc.)
- ___ Owner's Name
- ___ Owner's Address (please give full mailing address)
- ___ Owner's Phone Number
- ___ Type of Owner or Facility (correct code(s))

II. CONTACT PERSON AT THE TANK LOCATION (Page 1)

- ___ Contact Person's Name (we need at least a name or a job title)
- ___ Contact Person's Job Title
- ___ Contact Person's Phone Number

III. SITE OF THE TANKS (Page 1)

- ___ Facility Name or Company Site Identifier

____ Location of Tanks (Street Address, State Road, Latitude
and Longitude, or Township, Range and Quarter Section)
____ Phone Number

IV. THE TOTAL NUMBER OF TANKS AT THIS SITE (Page 1)

____ Number of Tanks, Line(s)

V. CERTIFICATION (Page 1)

Name and Title of Owner
 Date Signed
 Signature

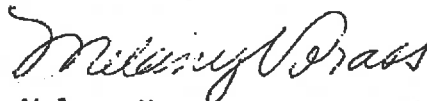

VI. INFORMATION REGARDING INDIVIDUAL TANKS (Pages 2 and 3)

____ Column(s) _____, Page 2
____ Column(s) _____, Page 3

3. Other: _____

If you have any questions, call 1-800-826-7716 (in Washington only) or (206) 459-6300. Please be certain to send your forms to my attention when you return them. Thank you.

Sincerely,

Melany Vorass
Underground Storage Tank Program

MV/sr

Enclosure

INSTRUCTIONS FOR MAILING THE FORM

When the notification form is fully completed and signed, staple any photocopies of Section VI to page one of the form (not the instructions), with page one in the front. (Please staple once in the upper right corner.) The forms may then be folded and placed in an envelope for mailing or may be folded as described below for mailing without an envelope. FOR MAILING WITHOUT AN ENVELOPE: Fold the form(s) in half along the line in the center of the page, so that these instructions are on the outside, at the top. Then fold in half again, so that these instructions are still on the outside. When you turn the folded form(s) over, Ecology's address should be in the center, with blank lines for the return address in the upper left corner. Please enter your return address, staple once where shown, place the correct postage in the upper right corner, and mail.

PLEASE INDICATE THE NUMBER OF PHOTOCOPIED SHEETS ATTACHED (IF ANY) _____

Attention: Judy Smith

Subject: Phase 1 Environmental Site Assessment Update
Office/Warehouse Building
1600 - 132nd Avenue Northeast
Bellevue, Washington

Dear Ms. Smith:

Geotech Consultants, Inc. is pleased to present the results of our Phase 1 Environmental Site Assessment Update for the subject property. For this update, we revisited the property on March 25, 1997 to note any changes in site and area development and to assess the potential for adverse environmental impact to the subject property from any of these potential changes. This update also included a review of current state and federal databases of hazardous sites and the preparation of this summary letter to document our findings. We conducted this update in accordance with the terms of our proposal dated March 4, 1997. The information provided herein is to be used in conjunction with relevant information presented in our earlier reports, which are dated December 18, 1992 and October 26, 1989. In all of our work, we have intended to be consistent with ASTM Standard E 1527-94 for conducting a Phase 1 Environmental Site Assessment.

FINDINGS

Project Background

In October of 1989, our firm completed an environmental audit of the subject property. At that time, the property was developed with a mixed-use office and warehouse building. The single-story, concrete, tilt-up building has a footprint of 30,000 square feet, and at that time the building was vacant. According to our historical research, the building was constructed in 1970. Northern Merchandise Company, a shipping and distribution firm, occupied the building from 1970 until 1981. Advanced Technology Laboratories (ATL), a manufacturer electronic circuit boards, occupied the building from 1981 to 1985, after which Melco, Incorporated briefly occupied the building from 1985 to 1987. Asphalt driveways and parking or gravel-paved parking areas covered the remainder of the property.

An underground storage tank was removed from the northeastern corner of the property in 1988 by Raxbury Construction. The tank was reportedly in good condition with no apparent signs of leakage.

The results of laboratory analysis of two soil samples obtained from the tank excavation indicated that very low levels of residual petroleum hydrocarbons were present. The levels detected were well below concentrations that would require a cleanup under current Washington Department of Ecology guidelines. With the exception of the potential that the fluorescent light ballasts contained cooling fluid contaminated with polychlorinated biphenyls (PCBs), our earlier audit identified no on-site or off-site environmental conditions that may have adversely affected the subject property.

We conducted an update of our previous audit in December of 1992. At that time the building had been recently remodeled, and the old PCB-containing fluorescent light ballasts had been replaced. Two tenants leased the building. ServiceMaster of Seattle occupied approximately the western two-thirds of the building, while Graybar Electric Company, occupied the eastern one-third of the building. Both businesses maintained offices and warehousing facilities at the subject property. ServiceMaster of Seattle provides specialty cleaning services to residences and businesses damaged by water, smoke, or fire. Hazardous materials were stored in a locked container that was positioned on the asphalt parking lot near the northwestern corner of the property. We were informed that limited volumes of used solvents were reclaimed by a settling process for reuse. Graybar Electric Company is a wholesale supplier of electrical equipment to contractors. No hazardous materials were noted at the Graybar facility. With the exception of a very slight potential that asbestos fibers were present in the vinyl flooring, adhesives, or the paper-like backing of the sheet vinyl in the building, no recognized environmental conditions were noted in connection with the subject property.

Current Site Development

The subject property remains developed with the single-story office and warehouse building, and ServiceMaster of Seattle and Graybar Electric Company are still the tenants. When we visited the property on March 25, 1997, Michael Mack of ServiceMaster and Fred Jarman of Graybar Electric Company arranged access to their respective spaces. We observed representative interior offices, the employee lunch rooms, rest rooms, and the warehouses.

The building has poured concrete foundations, slab-on-grade floors, and the exterior walls are of reinforced concrete walls frame the exterior. The roof is flat and covered with a built-up coating. The interior walls of the offices have a wood-framed construction with dry wall. Floors on the mezzanine level in the ServiceMaster portion of the building are wood. Typical floor coverings observed throughout the rest of the building are carpet, sheet vinyl, or 12-inch-square, vinyl tiles. The building is heated by roof-mounted heat pumps.

A gravel-paved parking lot with frontage along Northeast 16th Street East is immediately south of the building. Asphalt parking and driveways are also situated on the northern and eastern sides of the building. Immediately west of the building is 132nd Avenue Northeast. A large trash container is located near the northeastern corner of the property.

Land use in the site vicinity is characterized by a mixture of commercial and office developments. The subject property is bordered to the north by Familian Northwest's warehouse. Thrifty Supply Company occupies the eastern adjacent site. Northeast 16th Street parallels the southern property boundary, across which is a large building occupied by Platt Electric Supply, and to the west, across 132nd Avenue Northeast, is the Eastside Journal newspaper building.

We were informed by Michael Mack of ServiceMaster that ServiceMaster is an EPA registered, small-quantity generator of hazardous waste (WAD 980738199). Mr. Mack explained that cleaning solvents are still reclaimed by a settling process and reused. He also stated that small quantities of solvents become contaminated during cleaning jobs and are stored in a drum for pick up by Van Waters and Rogers, Incorporated of Kent, Washington. According to Mr. Mack, Van Waters and Rogers picks up the hazardous waste on an as-needed basis, generally about once a year, for lawful treatment or disposal. Copies of the most recent Hazardous Waste Manifest and transportation agreements are appended to this report.

State and Federal Databases

Geotech Consultants, Inc. utilized the services of Environmental Data Resources, Inc. (EDR) to complete a search of available state and federal government records. EDR reported those sites and businesses that are located within the minimum search distances specified by American Society of Testing and Materials (ASTM) Designation E 1527-94. Additionally, through observations made during our site reconnaissance, we attempted to identify local topographic conditions that may influence the potential for regulated facilities to adversely impact the subject property. Our review of the EDR report revealed, that ServiceMaster is listed on the Resource Conservation and Recovery Information System (RCRIS) as a small-quantity generator of hazardous waste. A former tenant of the building, Advanced Technology Labs (ATL) remains on the Facility Index System (FINDS) listing. Additionally, the Bellevue Fire Station #6, located at 1850 - 132nd Avenue Northeast, reported soil contamination from a leaking underground storage tank to the Washington Department of Ecology in 1994. The Bellevue Fire Station #6 incident is discussed in greater detail in the *Contaminant Mobility and Site Vulnerability* section later in this report. These changes from our earlier study do not appear to pose significant environmental impacts to the subject property. A copy of the *EDR Radius Map with GeoCheck* is included with this report as an appendix.

Regional Physiographic Conditions

Physiographically, the site is situated on the Interlake Drift Upland, a gently rolling elevated plain. This plain was formed during the last period of continental glaciation, which ended approximately 13,500 years ago.

Soil and Geologic Conditions

Published geologic maps for the site vicinity (Galster and Laprade, 1991) suggest that much of the material underlying the subject property is glacial till, a dense, heterogeneous mixture of silt, sand, and gravel.

We were not provided with any reports of geotechnical studies for our review and cannot comment more definitively upon subsurface conditions beneath the site.

Hydrogeologic Conditions

The site is generally level and is approximately 200 feet above sea level. However, the land surface in the vicinity of the site gradually slopes down to the south-southwest. Based upon inference from topography and local drainage patterns, it appears that shallow-seated groundwater (if present) may flow toward the southwest. According to a U.S. EPA Ground Water Handbook, water tables typically conform to surface topography (Chapter 4, page 78).

Typically, till (the site soil) exhibits relatively low vertical hydraulic conductivity. This frequently results in the formation of a "perched" water table along its upper contact with a more permeable overlying soil. The "perched" water table (if present) is frequently seasonal and derives recharge primarily from the infiltration of precipitation through the soil above it. During our sampling of the former underground storage tank cavity in October of 1989, no groundwater seepage was encountered.

With respect to surface water resources, Golf Creek is located approximately 100 feet west of the property. This creek eventually discharges into Lake Washington, which is approximately 2.5 miles west of the subject property.

Assumptions and Opinion of Contaminant Mobility and Site Vulnerability

No confirmed hazardous waste contaminated sites lie within 1,000 feet of the subject property in an upgradient hydraulic position. However, as depicted in the attached EDR report, the Bellevue Fire Station #6, located at 1850 - 132nd Avenue Northeast, reported soil contamination from a leaking underground storage tank to the Washington Department of Ecology in 1994. The current status is listed as completed. Based on the environmental setting of the subject vicinity, the reported media (soil) affected at the Bellevue Fire Station #6 site, and the distance of this site relative to the subject property, it is our professional opinion that the potential for the migration of theoretical water-borne contamination onto the subject property is very low. Several potential sources of environmental contamination to the subject property lie within ASTM-specified search distances in crossgradient to downgradient hydraulic positions. Based upon their positions relative to the subject property, it is our opinion that the potential for theoretical water-borne contamination onto the subject property is low.

CONCLUSIONS AND RECOMMENDATIONS

We performed a Phase 1 Environmental Site Assessment Update, consistent with the scope and limitations of ASTM Designation E 1527-94, for the subject property at 1600 - 132nd Avenue Northeast in Bellevue, Washington. It is our opinion that the conclusions given in our most recent audit, dated October 26, 1992, remain valid.

LIMITATIONS

This report has been prepared for the exclusive use of Security Mutual Life Insurance Company of Lincoln Nebraska, National Mortgage Company, Bruce Kahn, and their representatives for specific application to this site. This work was performed in a manner consistent with that level of care and

skill normally exercised by members of the environmental science profession currently practicing under similar conditions in the area. Our work is in accordance with our Fee Schedule and General Conditions and our signed proposal, which is dated March 4, 1997.

The following items are attached to complete this update:

Plate 1	Vicinity Map
Plate 2	Site Plan
Appendix A	<i>EDR Radius Map with GeoCheck</i>
Appendix B	Uniform Hazardous Waste Manifest

We appreciate the opportunity to be of service to you on this project. If you have any questions, or if we may be of further service, please do not hesitate to contact us.

Respectfully submitted,

GEOTECH CONSULTANTS, INC.

Timothy A. Johnson

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The search met the specific requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-94, or custom distances requested by the user.

The address of the subject property for which the search was intended is:

1600-132RD AVENUE NE
BELLEVUE, WA 98005

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the subject property or within the ASTM E 1527-94 search radius around the subject property for the following Databases:

NPL:..... National Priority List
Delisted NPL:..... NPL Deletions
RCRIS-TSD:..... Resource Conservation and Recovery Information System
CERCLIS:..... Comprehensive Environmental Response, Compensation, and Liability Information System
CERC-NFRAP:..... Comprehensive Environmental Response, Compensation, and Liability Information System
CORRACTS:..... Corrective Action Report
SWF/LF:..... Solid Waste Facilities Handbook
RAATS:..... RCRA Administrative Action Tracking System
HMIRS:..... Hazardous Materials Information Reporting System
PADS:..... PCB Activity Database System
ERNS:..... Emergency Response Notification System

EXECUTIVE SUMMARY

Surrounding Properties:

Page numbers refer to the EDR Radius Map report where detailed data on individual sites be reviewed.

Sites listed in *bold italics* are in multiple databases.

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data comes from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 10/01/1996 has revealed that there are 3 CSCSL sites within approximately 1 Mile of the subject property.

GEOCHECK VERSION 2.1 SUMMARY

GEOLOGIC AGE IDENTIFICATION†

Geologic Code: Q
Era: Cenozoic
System: Quaternary
Series: Quaternary

ROCK STRATIGRAPHIC UNIT†

Category: Stratified Sequence

GROUNDWATER FLOW INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, including well data collected on nearby properties, regional groundwater flow information (from deep aquifers), or surface topography.‡

General Topographic Gradient: General SSW

General Hydrogeologic Gradient: The hydrogeologic gradient for this report has been determined using the depth to water table information provided below. Where available, the closest well in each quadrant has been identified (up to a radius of 5 miles around the target property) and used in the gradient calculation. While an attempt has been made to segregate shallow from deep aquifers, this cannot always be assured. Groundwater flow in the aquifer associated with the wells appears generally to be to the West. This would appear to be in conflict with the topographical gradient. The direction of the groundwater flow should be determined by a qualified environmental professional.

EPA Waste Codes Addendum

Code	Description
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D002	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
D003	A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM RECORDS:

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA/NTIS

Telephone: 703-603-8904

CERCLIS: CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/31/96

Date Made Active at EDR: 03/03/97

Database Release Frequency: Monthly

Date of Data Arrival at EDR: 01/16/97

Elapsed ASTM days: 46

Date of Last EDR Contact: 02/03/97

ERNS: Emergency Response Notification System

Source: EPA/NTIS

Telephone: 202-260-2342

ERNS: Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/30/96

Date Made Active at EDR: 11/05/96

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 08/19/96

Elapsed ASTM days: 78

Date of Last EDR Contact: 01/27/97

NPL: National Priority List

Source: EPA

Telephone: 703-603-8852

NPL: National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC).

Date of Government Version: 12/01/96

Date Made Active at EDR: 03/03/97

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 01/08/97

Elapsed ASTM days: 54

Date of Last EDR Contact: 12/23/96

RCRIS: Resource Conservation and Recovery Information System

Source: EPA/NTIS

Telephone: 703-308-7907

RCRIS: Resource Conservation and Recovery Information System. RCRIS includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Date of Government Version: 10/31/96

Date Made Active at EDR: 03/03/97

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 01/09/97

Elapsed ASTM days: 53

Date of Last EDR Contact: 02/27/97

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

FEDERAL NON-ASTM RECORDS:

CONSENT: Superfund (CERCLA) Consent Decrees

Source: EPA Regional Offices

Telephone: Varies

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: Varies

Database Release Frequency: Varies

Date of Last EDR Contact: Varies

Date of Next Scheduled EDR Contact: 09/01/95

CORRACTS: Corrective Action Report

Source: EPA

Telephone: 703-308-7907

CORRACTS: CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/01/96

Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 12/18/96

Date of Next Scheduled EDR Contact: 03/17/97

FINDS: Facility Index System

Source: EPA/NTIS

Telephone: 703-908-2493

FINDS: Facility Index System. FINDS contains both facility information and "pointers" to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 09/30/95

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/30/96

Date of Next Scheduled EDR Contact: 04/07/97

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation

Telephone: 202-366-4555

HMIRS: Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/95

Database Release Frequency: Annually

Date of Last EDR Contact: 01/27/97

Date of Next Scheduled EDR Contact: 04/28/97

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission

Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 02/13/96

Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/14/97

Date of Next Scheduled EDR Contact: 04/14/97

NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 205-564-4267

NPL LIENS: Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/91

Database Release Frequency: No Update Planned

Date of Last EDR Contact: 11/25/96

Date of Next Scheduled EDR Contact: 02/24/97

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PADS: PCB Activity Database System

Source: EPA

Telephone: 202-260-3992

PADS: PCB Activity Database. PADS identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 08/26/96

Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/02/97

Date of Next Scheduled EDR Contact: 05/19/97

RAATS: RCRA Administrative Action Tracking System

Source: EPA

Telephone: 202-564-4104

RAATS: RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA.

Date of Government Version: 04/17/95

Database Release Frequency: N/A

Date of Last EDR Contact: 12/16/96

Date of Next Scheduled EDR Contact: 03/17/97

ROD: Records Of Decision

Source: NTIS

Telephone: 703-416-0703

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 03/31/95

Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/02/96

Date of Next Scheduled EDR Contact: 03/03/97

TRIS: Toxic Chemical Release Inventory System

Source: EPA/NTIS

Telephone: 202-260-2320

TRIS: Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/92

Database Release Frequency: Annually

Date of Last EDR Contact: 12/30/96

Date of Next Scheduled EDR Contact: 03/31/97

TSCA: Toxic Substances Control Act

Source: EPA/NTIS

Telephone: 202-260-1444

TSCA: Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site. USEPA has no current plan to update and/or re-issue this database.

Date of Government Version: 01/31/95

TACOMA-PIERCE COUNTY:

Closed Landfill Survey

Source: Tacoma-Pierce County Health Department

Telephone: 206-591-6500

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

Historical and Other Database(s)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Former Manufactured Gas (Coal Gas) Sites: The existence and location of Coal Gas sites is provided exclusively to EDR by Real Property Scan, Inc. ©Copyright 1993 Real Property Scan, Inc. For a technical description of the types of hazards which may be found at such sites, contact your EDR customer service representative.

Disclaimer Provided by Real Property Scan, Inc.

The information contained in this report has predominantly been obtained from publicly available sources produced by entities other than Real Property Scan. While reasonable steps have been taken to insure the accuracy of this report, Real Property Scan does not guarantee the accuracy of this report. Any liability on the part of Real Property Scan is strictly limited to a refund of the amount paid. No claim is made for the actual existence of toxins at any site. This report does not constitute a legal opinion.

DELISTED NPL: Delisted NPL Sites

Source: EPA
Telephone: 703-603-8769

DELISTED NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NFRAP: No Further Remedial Action Planned

Source: EPA/NTIS

Telephone: 703-416-0702

NFRAP: As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

FRDS: Federal Reporting Data System

Source: EPA/Office of Drinking Water

Telephone: 202-260-2805

FRDS provides information regarding public water supplies and their compliance with monitoring requirements, maximum contaminant levels (MCL's), and other requirements of the Safe Drinking Water Act of 1986.

Area Radon Information: The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

Oil/Gas Pipelines/Electrical Transmission Lines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines and electrical transmission lines.

Sensitive Receptors: There are individuals who, due to their fragile immune systems, are deemed to be especially sensitive to environmental discharges. These typically include the elderly, the sick, and children. While the exact location of these sensitive receptors cannot be determined, EDR indicates those facilities, such as schools, hospitals, day care centers, and nursing homes, where sensitive receptors are likely to be located.

USGS Water Wells: In November 1971 the United States Geological Survey (USGS) implemented a national water resource information tracking system. This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on more than 900,000 wells, springs, and other sources of groundwater.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1994 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

Epicenters: World earthquake epicenters, Richter 5 or greater

Customer Notification And Certification

Generator Name/Location: SERVICEMASTER
EPA I.D. Number: WAD980738199
Waste Profile or ARF Designation: SERBE0001
Manifest Number: 97020
EPA Waste Number(s): F002 D040
Waste Analysis Available? Yes (attached) No X On file at receiving facility

Unrestricted Waste Notification (Category 1)

Mark the statement below if you generate a waste that is not a land disposal restricted waste (the waste has no applicable treatment standards).

- I notify that I am familiar with the waste through analysis and testing or through knowledge of the waste to support this notification that the waste is not restricted as specified in 40 CFR §268, Subpart D or any applicable prohibitions set forth in 40 CFR §268.32 or RCRA Section 3004(d).

Restricted Waste/Debris Notification (Category 2)

Mark statement (2a) below if you generate a waste that is restricted from land disposal (the waste has applicable treatment standards).

NOTE-1: A waste may pass one or more standards and require treatment or be varianced for others. In this case, all applicable categories must be checked. NOTE-2: D001, D002 and D012 - D043 wastes must be evaluated for underlying constituents found in 40 CFR §268. 48 (Table UTS), that are reasonably expected to be present. A list of these constituents must be included on FORM B, or attached to and accompany this notification with each waste shipment. Mark statement (2b) if you generate a debris waste that will be treated to the alternate debris standards located in 40 CFR §268.45.

- (2a) Restricted Waste Notification
I notify that I am familiar with the waste through analysis and testing or through knowledge of the waste to support this notification that the waste is subject to the treatment standards specified in 40 CFR §268 Subpart D. The waste: (a) must be treated to the appropriate regulatory treatment standard, by the appropriate regulatory treatment method; (b) qualifies for a variance as described in category 3 below; or (c) meets some or all of the standards as described in Category 4 below.
- (2b) Alternate Debris Treatment Notification: This hazardous debris is subject to the alternate treatment standards of 40 CFR §268.45. The waste contains the following contaminants subject to treatment [check all that apply]:
 §268.45(b)(1)- Toxicity characteristic debris;
 §268.45(b)(2)- Debris contaminated with listed waste;
 §268.45(b)(3)- Cyanide reactive debris.

Restricted Waste Variance Notification (Category 3)

Mark the statement below and list the applicable variance date on Form B, if you generate a waste which does not require treatment prior to land disposal because of a variance (including a case-by-case extension under 40 CFR §268.5, a nationwide variance under 40 CFR §268 Subpart C, a no migration petition under 40 CFR §268.6, or other applicable variance).

- I notify pursuant to 40 CFR §268.7(a)(3) that I am familiar with the waste through analysis and testing or through knowledge of the waste to support this notification that this waste is subject to a national capacity variance under 40 CFR §268 Subpart C, or a case-by-case extension under 40 CFR §268.5, or an exemption under 40 CFR §268.6.

Restricted Waste Certification (Treatment Standards Met) (Category 4)

Mark the certification statement below if you generate a waste that is restricted from land disposal (the waste has applicable treatment standards), and the waste meets the standards as generated. Note: All applicable constituent standards must be accounted for. A waste may pass one or more standards and require treatment or be variance for other constituents. In this case, all applicable categories must be checked.

I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA § 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

RECYCLING/TSD HANDLING AGREEMENT (GENERATOR AND RECYCLING/TSD CONTRACTOR)

WHEREAS, Generator produces spent chemicals which may be considered to be "hazardous" or "toxic" within the meaning of applicable federal and state laws ("Spent Chemicals") and which therefore must be transported, stored, disposed of, recycled, treated or re-used ("Handled") in accordance with applicable laws pertaining to hazardous or toxic chemicals;

WHEREAS, Recycling/TSD Contractor owns or controls facilities which are capable of Handling Spent Chemicals in accordance with all applicable laws pertaining to such activities;

WHEREAS, the parties desire to enter into an arrangement for the Handling of Spent Chemicals, all on the terms and conditions hereinafter set forth;

NOW, THEREFORE, in consideration of the covenants and agreements contained herein, the undersigned agree to the following terms and conditions of this Recycling/TSD Handling Agreement as well as to the Standard Terms and Conditions Governing the Handling of Spent Chemicals ("Standard Terms and Conditions"), which are attached to the Generator copy of this Agreement and are incorporated herein by reference. All capitalized terms not otherwise defined herein shall have the meanings set forth in the Standard Terms and Conditions.

1. SPENT CHEMICALS SHIPMENT. The completed Uniform Hazardous Waste Manifest or appropriate state manifest which is identified by the reference number appearing in a space below the signatures to this Agreement and which pertains to the Spent Chemicals Shipment Handled under this Agreement is hereby incorporated herein by reference. Such manifest describes certain Spent Chemicals which Generator hereby agrees to ship to Recycling/TSD Contractor and which Recycling/TSD Contractor agrees to Handle at the facility named in such manifest ("Designated Facility").

2. COLLECTION, TRANSPORTATION, STORAGE AND DELIVERY. All Spent Chemicals Shipments shall be transported to Recycling/TSD Contractor by Van Waters & Rogers Inc., a Washington Corporation ("VW&R"), or an entity designated by VW&R to provide transportation and temporary storage services.

3. PAYMENT. It is understood that VW&R shall pay Recycling/TSD Contractor for Handling the Spent Chemicals Shipment (or, where money is owed to Generator, VW&R shall pay Generator for the Spent Chemicals Shipment) according to the terms of a certain Master Spent Chemicals Handling Agreement between Recycling/TSD Contractor and VW&R. Recycling/TSD Contractor shall not look to Generator for payment for Handling the Spent Chemicals Shipment, except for certain extraordinary charges incurred in connection with Non-conforming Spent Chemicals as set forth in the Standard Terms and Conditions.

4. INDEMNIFIED PARTY. As used in the Standard Terms and Conditions, the term "Indemnified Party" shall mean either Recycling/TSD Contractor or Generator, depending upon which party claims indemnification under this Agreement.

5. GENERATOR INDEMNIFICATION. Generator shall defend, indemnify and hold harmless Recycling/TSD Contractor, its past, present and future officers, directors, employees, agents, insurers and successors (hereinafter in this Paragraph referred to collectively as "Recycling/TSD Contractor") from and against any and all Loss which Recycling/TSD Contractor may sustain or incur, be responsible for or pay out as a result of:

(a) Generator's breach of any representation, warranty, term or provision of this Agreement; or

(b) The negligence or intentional misconduct of Generator, its employees, agents, representatives or subcontractors in the performance of this Agreement, provided that such indemnification shall not apply to the extent such liabilities result from Recycling/TSD Contractor's negligence or intentional misconduct or from a breach of this Agreement by Recycling/TSD Contractor.

6. NAMES AND ADDRESSES OF PERSONS TO WHOM NOTICE IS TO BE GIVEN. The name of the person to whom notice is to be given on behalf of Generator appears on the Uniform Hazardous Waste Manifest in Item 16 or the appropriate state manifest. The name of the person to whom notice is to be given on behalf of Recycling/TSD Contractor appears on the Uniform Hazardous Waste Manifest in Item 20 or the appropriate state Hazardous Waste Manifest under Item 3 (for

APPENDIX F
INTERVIEW DOCUMENTS

SITE INTERVIEW QUESTIONNAIRE

1.0 GENERAL INFORMATION

- 1.1 Business Name: ARNOLDS APPLIANCE SIC Code: _____
- 1.2 Location/Address: 1625 132ND AVE NE BELLEVUE WA
- 1.3 Person Interviewed
- a. Name: RICK MOLING
- b. Title: PRESIDENT
- c. Years of Familiarity with Site: 7 YEARS
- 1.4 Site History
- a. Year Property was First Developed: DONT KNOW
- b. Prior Use before Development: DONT KNOW
- c. Information concerning the operations of previous owners or tenants (obtain dates):
1. _____
2. _____
3. _____
4. _____
- 1.5 Prior locations of the current operation: 1035 116TH AVE NE BELLEVUE WA
- 1.6 Are there other locations where this business has employees, land or facilities? Yes No
Explanation: _____
- 1.7 Site Utilities
- a. Electric:
- b. Gas:
- c. Water (indicate supply): CITY
- d. Sewer:
- e. Other: _____
- 1.8 Is current owner or operator involved in any clean-ups or been asked to participate in any clean-ups?
 Yes No If so, describe: _____
- 1.9 Is the site located along a waterway? Yes No
If so, describe: GOFF CREEK
- GENERAL COMMENTS: _____

2.0 SITE AND FACILITY INFORMATION

- 2.1 Is surface water within 500 feet? Yes No
- 2.2 Groundwater Information
- a. Depth to groundwater: DONT KNOW
- b. Known uses of groundwater: _____
- c. Are there any groundwater wells which the facility does or can monitor? Yes No
Has contamination been detected? Yes No
Comments: DONT KNOW
WELLS WERE DRILLED BY SOUND TRANSIT

SITE INTERVIEW QUESTIONNAIRE

- 2.3 Does the site use well water?
 a. Well depth: _____
 b. Well delivery rate: _____
 c. Well water use: _____
 d. Were any wells capped within the last five years? Yes No
 If so, explain why: _____
- 2.4 Has any major demolition occurred on the site? Yes No
 If yes, explain: _____
- 2.5 Are site maps, drawings or aerial photos available? Yes No
 If yes, obtain.
- 2.6 Do neighbors or authorities complain about odors, discharges or noise from this facility?
 Yes No If yes, explain: _____
- 2.7 Does runoff from the site flow onto or into:
 a. Other property: Yes No If yes, explain: _____
 b. Surface water: Yes No If yes, explain: _____
 c. Storm drainage: Yes No If yes, explain: _____
- 2.8 Is this facility in the 25-year or 100-year floor plan? Yes No
 If yes, explain: _____
- 2.9 Has this facility ever been flooded? Yes No
 If yes, explain: _____
- 2.10 PCB Information
- a. Is any PCB electrical equipment located on the premises (transformers, capacitors, florescent light ballasts)?
 Yes No If yes, explain: THESE ARE TRANSFORMER & FLORESCENT LIGHTS
- b. Did the PCB equipment ever leak? Yes No If yes, explain: _____
- c. Is any of the PCB equipment inside a building? Yes No If yes, explain: DONT KNOW
- d. Is the PCB equipment marked, well maintained and secure? Yes No 11
- e. Have there been any spills or fires involving PCB equipment?
 If yes, explain: _____ Yes No 11
- f. Does the facility own, store or has the facility disposed of PCB's?
 If yes, explain: _____ Yes No 17
- g. Has the facility stored on-site any PCB electrical equipment?
 If yes, explain: _____ Yes No 11
- 2.11 Building Information
- a. Number of buildings: 1
- b. Square footage: 32500
- c. Age of building(s): 1983 2003
- d. Construction of building(s): CONCRETE BLOCK AND TILT UP
- e. Do any buildings have asbestos-containing insulation or construction materials? Yes No
 If yes, where: DONT KNOW
- f. Do any buildings have urea formaldehyde foam insulation? Yes No
 If yes, where: DONT KNOW
- g. Do any of the building(s) have peeling lead paint within five feet of floor? Yes No
 If yes, where: DONT KNOW

SITE INTERVIEW QUESTIONNAIRE

2.12 Environmental, Health and Safety

- a. Does the facility use or manufacture OSHA hazardous chemicals? Yes No
If yes, describe: _____
- b. Does the facility have a hazardous material inventory? Yes No
If yes, where: _____
- c. Does the facility have a Hazardous Communication Program (e.g., required by Employee or Community Right-to-Know laws)? Yes No
- d. Does the facility store more than the threshold planning quantities of hazardous substances listed in 40 CFR 300, Appendix D? Yes No If yes, describe: _____
- e. Inquire of any notices, violations and fines against the facility for alleged violations. Ask for any documentation. If yes, describe: _____
- f. Has the facility released a reportable quantities or non-de minimis amount of oil or hazardous substances? Yes No Ask whether it was reported. Yes No
If yes, with whom? _____
- g. Are there any waste disposal areas on the premises? Yes No If yes, describe: _____
- h. Does or did any operation at the facility use petroleum solvents or its derivatives, or any chlorinated solvents? Yes No If yes, describe: _____
- i. Ask whether the facility is current in compliance with all permits. Yes No

2.13 Radon

- a. Ask whether there is any concern in the local area with elevated levels of radon.
Comments and/or notes: _____
- b. Has the facility performed any test for radon on site or in the building? Yes No
If yes, where: _____

GENERAL COMMENTS: _____

3.0 HANDLING AND STORAGE OF RAW MATERIALS AND PRODUCTS

- 3.1 Ask for a list of hazardous substances and fuel used at this location. *N/A*
- 3.2 Determine for these hazardous substances whether the materials are stored or processed in:
 - a. Aboveground Storage Tanks (ASTs): _____
 - b. Below Ground Tanks (and sumps): _____ *NO KNOWN TANKS*
 - c. Containers: _____
- 3.3 Tank Information
 - a. Ask for an inventory of tanks and/or containers.
 - b. Underground tanks:
 - 1. Have underground tanks been leak tested? Yes No
 - 2. Did test indicate leaks? Yes No
 - 3. Are underground tanks contents routinely inventoried? Yes No
 - 4. Has Inventory analysis indicated material loss? Yes No
- 3.4 Does the facility have a Spill Prevention Countermeasure and Contingency Plan? Yes No
- 3.5 Have any tanks been abandoned or removed from this location? Yes No
- 3.6 Have underground tank notifications been made to designated agencies? Yes No

SITE INTERVIEW QUESTIONNAIRE

3.7 Inquire about any know spills or releases of hazardous substances or related to the site.

Yes No If yes, describe: _____

a. Material released: _____

b. Amount: _____

c. Notification made? Yes No If yes, to whom: _____

d. Cleanup efforts: _____

GENERAL COMMENTS: _____

4.0 WASTE STREAM INFORMATION

4.1 Waste streams

a. Are hazardous wastes generated, stored, burned or disposed on-site? Yes No
If yes, describe: _____

b. Are solid wastes generated, burned or disposed on-site? Yes No
If yes, describe: _____

c. Is used oil generated, stored, burned or disposed on-site? Yes No
If yes, describe: _____

d. Determine the waste stream for all waters: _____

4.2 Hazardous Wastes

a. What is volume generated per month? Yes No
If yes, describe: _____

b. Are solid wastes generated, burned or disposed on site? Yes No
If yes, describe: _____

c. Is used oil generated, stored, burned or disposed on-site? Yes No
If yes, describe: _____

d. Determine the waste stream for all waters: _____

1. Surface Impoundments: _____

2. Waste Piles: _____

3. Deep Wells: _____

4. Dry Wells: _____

5. Septic Systems: _____

6. Sewer: _____

7. Incinerators, Furnaces: _____

8. Landfills: _____

9. Land Treatment: _____

e. Does the facility use hazardous waste as a fuel or raw material? Yes No
If yes, describe: _____

f. Has the facility ever disposed of hazardous waste on site? Yes No
If yes, describe: _____

g. Ask whether the facility has disposed of hazardous waste off-site. _____

N/A

GENERAL COMMENTS: _____

SITE INTERVIEW QUESTIONNAIRE

5.0 WASTEWATER OR STORMWATER DISCAHRGES

- 5.1 Determine the facility discharges of process wastes. _____
- 5.2 Provide permit information on discharges:
- a. Surface Water – NPDES # _____, Expiration Date: _____
 - b. Municipal Sewer – Permit # _____, Expiration Date: _____
 - c. Stormwater Permit - Permit # _____, Expiration Date: _____
 - d. Describe any discharge monitoring: _____
 - 1. Parameters: _____
 - 2. Frequency of Analysis: _____
- N/A
- 5.3 Is waste water stored in a pond, pit or lagoon? Pond Pit Lagoon N/A
- a. Size, depth of lagoon: _____
 - b. Design of lagoon: _____
 - c. Sludge disposal method: _____
- 5.4 Are there any floor drains or catch basins in facility that could discharge spills, leaks or process water from storage or process areas.
- 5.5 How is runoff from roofs, and outdoor facility storage or process areas discharged? N/A
- a. Municipal sewer: _____
 - b. Storm drain or other stormwater facilities: _____
 - c. Surface water: _____
- 5.6 Has the facility received any notices of violations for discharges? Yes No
If yes, describe: _____
- 5.7 Is the facility under any order? Yes No
If yes, describe: _____
- 5.8 Does the facility utilize a septic or drain system or a leach field? Yes No
If yes, describe: _____
- 5.9 Does the facility have a Stormwater Pollution Prevention Plan? Yes No
- GENERAL COMMENTS: _____

6.0 AIR EMISSIONS

- 6.1 Determine each permitted source and obtain a list of permitted sources:
- 6.2 Are there any air emissions sources?
- a. Process stacks, boiler stocks? Yes No N/A
 - b. Vents, exhaust ports? Yes No N/A
 - c. Fans? Yes No N/A
 - d. Open processes, evaporative processes? Yes No N/A
 - e. Process equipment (driers, mixers, spray booths)? Yes No N/A
 - f. Fugitive emission sources? Yes No N/A
 - g. Bulk loading, unloading areas? Yes No N/A
- UNUSED SINCE WEVE BEEN HERE
- 6.3 Are any of the sources above without permits or have permits expired? Yes No
If yes, describe: _____

SITE INTERVIEW QUESTIONNAIRE

- 6.4 Are any emissions vented through control devices?
- a. Fans, vents, stacks? Yes No N/A
 - b. Scrubbers, filters? Yes No N/A
 - c. Baghouses, cyclones, precipitators? Yes No N/A
 - d. Vapor recovery systems? Yes No N/A
 - e. Combustion or oxidation units? Yes No N/A
 - f. Flares? Yes No N/A
- 6.5 Is any control device malfunctioning?
If yes, describe: _____ Yes No
- 6.6 Are control devices tested?
If yes, describe testing procedures: _____ Yes No
- 6.7 Are odors, fumes or dust observed from the facility?
If yes, describe: _____ Yes No
- GENERAL COMMENTS: _____

7.0 ADJACENT PROPERTY INFORMATION

- 7.1 Inquire about names and locations of current adjacent property owners or operators:
- 7.2 Inquire about the current use of the adjacent property(ies):
- a. _____
 - b. _____
 - c. _____
 - d. _____
- UNKNOWN*
- 7.3 Ask about previous uses of the adjacent property(ies):
- a. _____
 - b. _____
 - c. _____
 - d. _____
- UNKNOWN*
- 7.4 Does the adjacent property(ies) impact this facility? Yes No
- a. If yes, describe: _____
 - b. If yes, describe: _____
 - c. If yes, describe: _____
 - d. If yes, describe: _____
- 7.5 Is any of the adjacent property(ies) used for petroleum storage or delivery? Yes No
- a. If yes, describe: _____
 - b. If yes, describe: _____
 - c. If yes, describe: _____
 - d. If yes, describe: _____
- UNKNOWN*

SITE INTERVIEW QUESTIONNAIRE

- 7.6 Is any of the adjacent property(ies) used for chemical manufacturing? Yes No
- a. If yes, describe: _____
- b. If yes, describe: _____
- c. If yes, describe: _____ *UNKNOWN*
- d. If yes, describe: _____

8.0 LANDOWNER LIABILITY PROTECTIONS (LLPs)

In order to qualify for one of the *Landowner Liability Protections (LLPs)*¹⁸⁷ offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"),¹⁸⁸ the *user* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete.

- 8.1 Environmental liens that are filed or recorded against the property (40 CFR 312.25). Did a search of recorded land title records (or judicial records where appropriate, see Note 1 Below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?
- a. Federal Yes No If yes, describe: _____
- b. Tribal Yes No If yes, describe: _____ *UNKNOWN*
- c. State Yes No If yes, describe: _____
- d. Local Yes No If yes, describe: _____

Note 1: In certain jurisdictions, federal, tribal, state or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

- 8.2 Activities and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi)). Did a search of recorded land title records (or judicial records where appropriate, see Note 1 in Section 8.1) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?
- a. Federal Yes No If yes, describe: _____
- b. Tribal Yes No If yes, describe: _____ *UNKNOWN*
- c. State Yes No If yes, describe: _____
- d. Local Yes No If yes, describe: _____

- 8.3 Specialized knowledge of experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge of experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge if the chemicals and processes used by this type of business?
- Yes No If yes, describe: _____

- 8.4 Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? Yes No If yes, describe: _____

PRION PURCHASE PRICE WAS AT FAIR MARKET VALUE

SITE INTERVIEW QUESTIONNAIRE

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes No If yes, describe: _____

8.5 Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

a. Do you know the past uses of the property?

Yes No If yes, describe: _____ *HEAVY EQUIPMENT OPERATION IN THE 1960'S*

b. Do you know of specific chemicals that are present or once were present at the property?

Yes No If yes, describe: _____ *OIL (DIESEL)*

c. Do you know of spills or other chemical releases that have taken place at the property?

Yes No If yes, describe: _____

d. Do you know of any environmental cleanups that have taken place at the property?

Yes No If yes, describe: _____ *THERE WAS A CLEANUP OF MOTOR OIL*

8.6 The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

Yes No If yes, describe: _____

APPENDIX G
USER-PROVIDED INFORMATION

Phase I ESA User Questionnaire

Sound Transit East Link Parcel E340
EL299 King County Tax Parcel 2825059191
1625 132nd Avenue NE, Bellevue, Washington

In order to qualify for one of the federal landowner liability protections and to enable us to fully address the objective of the Phase I ESA, please complete the questionnaire below and provide the additional information requested.

1. Are you aware of any environmental cleanup liens against the subject property that are filed or recorded under federal, tribal, state or local law?
 Yes No Don't Know If yes, describe: _____
2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state or local law?
 Yes No Don't Know If yes, describe: _____
3. As the user of this Phase I ESA, do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
 Yes No Don't Know If yes, describe: _____
4. Does the purchase price being paid for the subject property reasonable reflect the fair market value of the property?
 Yes No Don't Know If yes, describe: _____
 - a. If you conclude that there is a difference and you answered NO above, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
 Yes No Don't Know If yes, describe: _____
5. Are you aware of commonly known or reasonably ascertainable information about the subject property that would help us identify conditions indicative of releases or threatened releases? For example:
 - a. Do you know the past uses of the property?
 Yes No Don't Know If yes, describe: _____
 - b. Do you know of specific chemicals that are present or once were present at the property?
 Yes No Don't Know If yes, describe: _____
 - c. Do you know of spills or other chemical releases that have taken place at the property?
 Yes No Don't Know If yes, describe: _____
 - d. Do you know of any environmental cleanups that have taken place at the property?
 Yes No Don't Know If yes, describe: _____
6. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?
 Yes No Don't Know If yes, describe: _____

Phase I ESA User Questionnaire

Mark Menard/Sound Transit
User Questionnaire Completed by (Name and Organization)

October 21, 2014
Date

List of Requested Information, if available:

- Names and phone numbers of key individuals with knowledge of property use history.
- A map showing the boundaries of the subject property.
- Tax ID numbers for parcels included within the subject property.
- Copies of any past environmental site assessment and/or audit reports or risk assessment studies.
- Environmental permits.
- Registrations for underground and aboveground storage tanks (if any).
- Material safety data sheets for hazardous substances used or stored on-site (if any).
- Community right-to-know plans pertaining to the subject property.
- Safety plans pertaining to on-site facilities.
- Reports regarding geotechnical and/or hydrogeological conditions at or near the subject property.
- Notices or other correspondence from any governmental agency relating to past or current violations of environmental laws with respect to the subject property or relating to environmental liens encumbering the property.
- Recorded Activity Use Limitations (AULs).

RESTRICTIVE COVENANT

Notice is hereby given that the property described on Exhibit "A" attached hereto and known as, the press building of The Journal American newspaper property, located at 1705 132nd Avenue, Bellevue, Washington, 98005, has been the subject of an Independent Remedial Action conducted under Wash. Rev. Code Section 70.105D (1993). Certain of the on-site soils are contaminated with petroleum hydrocarbons and are capped by the press building and its parking lot area, as depicted by Figures 6 through 9 of the INDEPENDENT REMEDIAL ACTION REPORT: The Journal American Facility, Bellevue, Washington (the "Report"), prepared by CH2M HILL, dated August 1995 and submitted to the Washington Department of Ecology's (WDOE), Northwest Region, Bellevue Washington. At the time of the Report, the maximum residual soil concentration of total petroleum hydrocarbon (TPH) gasoline was 1,200 milligrams per kilogram (mg/kg) at boring locations B04 at the 10 foot depth and B10 at the 7.5 foot depth and the maximum residual concentration of TPH diesel was 12,000 mg/kg at B04 at the 10 foot depth. These maximum soils concentrations exceed the Washington State Models Toxics Control Act (MTCA) Level A cleanup standards of 100 mg/kg gasoline in soil and 200 mg/kg diesel in soil. Until such time as this covenant is removed according to its terms, use of this property is restricted in accordance with Wash. Admin. Code (WAC) 173-340-440, which is incorporated here by reference, as follows:

- a) No activities may be conducted at the property that may interfere with the groundwater monitoring and the continued protection of the Independent Remedial Action;
- b) No activities may be conducted that may result in the release of the petroleum hydrocarbon contamination capped by the press building, loading dock and asphalt paving identified as capping the petroleum hydrocarbon contamination in Figures 6 through 9 above;
- c) Water well(s) shall not be installed on the property for purpose of domestic water use;
- d) Written notification must be given to the WDOE or its successor agency before excavating, moving or removing the soils or material beneath the press building, loading dock, and asphalt paving which are capped by these structures. In the event the cement flooring and foundation of the press building or the loading dock are demolished, all TPH contaminated soils above applicable WAC 173-340-700 through 173-340-760 cleanup standards shall be removed and disposed of in accordance with applicable law or, in the alternative, appropriate sampling and testing shall be completed that documents that the remaining TPH contaminated soils are below applicable cleanup criteria. A report documenting

9609271199

960927-1199 01:16:00 PM KING COUNTY RECORDS 005 5H 12:00

these facts shall be submitted to WDOE or its successor agency for review and approval.

- 9609271199
- e) Written notification must be given to WDOE or its successor agency before removal or destruction of those areas of the existing press building, loading dock, or asphalt paving identified as capping the petroleum hydrocarbon contamination in Exhibit "B";
 - f) Written notification must be given to the WDOE or its successor agency of owner's intent to convey any interest in the property. Further, no conveyance of title, easement, lease, or other interest in the property will be consummated by the owner of the property without notice of this Restrictive Covenant;
 - g) The owner must notify WDOE or its successor agency, prior to any use of the property that is inconsistent with the terms of this Restrictive Covenant.
 - h) The WDOE or successor agency or its designated representative shall have the right to enter the property after 24-hour prior notice, at reasonable times for the purpose of evaluating compliance with the terms of this Restrictive Covenant, to take samples and to inspect records related to the Independent Remedial Action;
 - i) Upon remediation (by removal or otherwise) of the petroleum contaminated soil to below those levels set forth in Wash. Admin. Code 173-340-700 through 173-340-760, the owner may record an instrument stating that this restrictive covenant is of no further force or effect, provided the owner has the consent of the WDOE or its successor agency to so do.

IN WITNESS WHEREOF, the undersigned has executed this instrument as of the 25 day of September, 1996.

RELATED DOCUMENT
REFERENCE NO. 9609271199

This RELEASE OF RESTRICTIVE COVENANT is made by NORTHWEST MEDIA (WASHINGTON), L.P., an Ohio limited partnership, and O.B. BELLEVUE PROPERTIES, LLC, a Washington limited liability company.

RECITALS

- A. Northwest Media (Washington), L.P., an Ohio limited partnership ("NMW") owns that certain real property commonly known as 1705 132nd Avenue, Bellevue, King County, Washington ("Parcel A").
- B. O.B. Bellevue Properties, LLC, a Washington limited liability company ("OB"), as successor in interest to OB Bellevue Properties II, LLC, owns that certain real property immediately adjacent to Parcel A, commonly known as 1625 132nd Avenue NE, Bellevue, Washington ("Parcel B"). Parcel A and Parcel B are legally described on Exhibit A attached hereto.
- C. NMW is the previous owner of Parcel B. NMW conveyed Parcel B to OB on or about April 1, 2003 under that certain Special Warranty Deed recorded on April 1, 2003 as Auditor's File No. 20030401002879, King County, Washington.
- D. Parcel A and Parcel B are encumbered by that certain Restrictive Covenant, dated September 25, 1996 and recorded under Auditor's File No. 9609271199, King County, Washington (the "Restrictive Covenant"). The Restrictive Covenant sets forth certain use restrictions for property identified as "the press building of the Journal American Newspaper property" as a result of soil contamination. The map attached to the Restrictive Covenant indicates that the contaminated soil is located on Parcel B only. The map does not indicate any contamination on Parcel A.
- E. NMW and OB requested a letter from the Washington State Department of Ecology ("DOE") consenting to the release of the Restrictive Covenant from Parcel A. DOE provided NMW and OB with a letter dated April 26, 2005 (the "Consent") that acknowledges that the Restrictive Covenant was erroneously recorded against Parcel A and consenting to the release of Parcel A from the Restrictive Covenant. A copy of the Consent is attached hereto as Exhibit B.

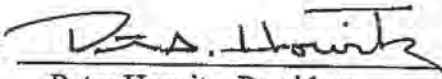

RELEASE

- 1. NMW and OB hereby release the Restrictive Covenant on Parcel A.
- 2. OB acknowledges and agrees that the Restrictive Covenant still encumbers Parcel B and remains in full force and effect, unmodified and unchanged by this Release of Restrictive Covenant.
- 3. This instrument may be executed in any number of counterparts, each of which, when executed and delivered, will be deemed to be an original, and all of which taken together will be deemed to be but one and the same instrument.

IN WITNESS WHEREOF, the parties have executed this instrument as of the
29 day of JULY, 2005.

RE: Restrictive Covenant Recorded Under King County Recording No. 9609271199

Dear Mr. Horvitz and Mr. O'Brien:

The Washington State Department of Ecology (Ecology) has received a request from Northwest Media (Washington), L.P. and OB Bellevue Properties, LLC (together, the "Owners") for Ecology's consent to release the above referenced restrictive covenant (the "Restrictive Covenant") on that certain real property commonly known as 1705 132nd Avenue NE, Bellevue, Washington (the "1705 Property"). The Owners are making the request because the Restrictive Covenant was erroneously recorded against the 1705 Property together with that certain real property commonly known as 1625 132nd Avenue NE, Bellevue, Washington (the "1625 Property"). We have reviewed the Owners' request and the information provided. Ecology agrees that the Restrictive Covenant properly encumbers the 1625 Property but not the 1705 Property. Accordingly, Ecology hereby consents to the release of the 1705 Property from the Restrictive Covenant.

Please provide Ecology with copies of all documents recorded pertaining to the release of 1705 Property from the Restrictive Covenant.

Regards,

A handwritten signature in black ink, appearing to read "Joseph M. Hickey".

APPENDIX H

**IMPORTANT INFORMATION ABOUT YOUR
ENVIRONMENTAL SITE ASSESSMENT/EVALUATION REPORT**

Date: April 27, 2015
To: Mr. Mark Menard
Sound Transit

IMPORTANT INFORMATION ABOUT YOUR ENVIRONMENTAL SITE ASSESSMENT/EVALUATION REPORT

ENVIRONMENTAL SITE ASSESSMENTS/EVALUATIONS ARE PERFORMED FOR SPECIFIC PURPOSES AND FOR SPECIFIC CLIENTS.

This report was prepared to meet the needs you specified with respect to your specific site and your risk management preferences. Unless indicated otherwise, we prepared your report expressly for you and for the purposes you indicated. No one other than you should use this report for any purpose without first conferring with us. No one is authorized to use this report for any purpose other than that originally contemplated without our prior written consent.

The findings and conclusions documented in this site assessment/evaluation have been prepared for specific application to this project and have been developed in a manner consistent with that level of care and skill normally exercised by members of the environmental science profession currently practicing under similar conditions in this area. The conclusions presented are based on interpretation of information currently available to us and are made within the operational scope, budget, and schedule constraints of this project. No warranty, express or implied, is made.

OUR REPORT IS BASED ON PROJECT-SPECIFIC FACTORS.

Our environmental site assessment is based on several factors and may include (but not be limited to): reviewing public documents to chronicle site ownership for the past 30, 40, or more years; investigating the site's regulatory history to learn about permits granted or citations issued; determining prior uses of the site and those adjacent to it; reviewing available topographic and real estate maps, historical aerial photos, geologic information, and hydrologic data; reviewing readily available published information about surface and subsurface conditions; reviewing federal and state lists of known and potentially contaminated sites; evaluating the potential for naturally occurring hazards; and interviewing public officials, owners/operators, and/or adjacent owners with respect to local concerns and environmental conditions.

Except as noted within the text of the report, no sampling or quantitative laboratory testing was performed by us as part of this site assessment. Where such analyses were conducted by an outside laboratory, Shannon & Wilson relied upon the data provided and did not conduct an independent evaluation regarding the reliability of the data.

CONDITIONS CAN CHANGE.

Site conditions, both surface and subsurface, may be affected as a result of natural processes or human influence. An environmental site assessment/evaluation is based on conditions that existed at the time of the evaluation. Because so many aspects of a historical review rely on third party information, most consultants will refuse to certify (warrant) that a site is free of contaminants, as it is impossible to know with absolute certainty if such a condition exists. Contaminants may be present in areas that were not surveyed or sampled, or may migrate to areas that showed no signs of contamination at the time they were studied.

Unless your consultant indicates otherwise, your report should not be construed to represent geotechnical subsurface conditions at or adjacent to the site and does not provide sufficient information for construction-related activities. Your report also should not be used following floods, earthquakes, or other acts of nature; if the size or configuration of the site is altered; if the location of the site is modified; or if there is a change of ownership and/or use of the property.

INCIDENTAL DAMAGE MAY OCCUR DURING SAMPLING ACTIVITIES.

Incidental damage to a facility may occur during sampling activities. Asbestos and lead-based paint sampling often require destructive sampling of pipe insulation, floor tile, walls, doors, ceiling tile, roofing, and other building materials. Shannon & Wilson does not provide for paint repair. Limited repair of asbestos sample locations are provided. However, Shannon & Wilson neither warrants repairs made by our field personnel, nor are we held liable for injuries or damages as a result of those repairs. If you desire a specific form of repair, such as those provided by a licensed roofing contractor, you need to request the specific repair at the time of the proposal. The owner is responsible for repair methods that are not specified in the proposal.

READ RESPONSIBILITY CLAUSES CAREFULLY.

Environmental site assessments/evaluations are less exact than other design disciplines because they are based extensively on judgment and opinion, and there may not have been any (or very limited) investigation of actual subsurface conditions. Wholly unwarranted claims have been lodged against consultants. To limit this exposure, consultants have developed a number of clauses for use in their contracts, reports, and other documents. These responsibility clauses are not exculpatory clauses designed to transfer the consultant's liabilities to other parties; rather, they are definitive clauses that identify where responsibilities begin and end. Their use helps all parties involved recognize their individual responsibilities and take appropriate action. Some of these definitive clauses may appear in this report, and you are encouraged to read them closely. Your consultant will be pleased to give full and frank answers to your questions.

Consultants cannot accept responsibility for problems that may develop if they are not consulted after factors considered in their reports have changed, or conditions at the site have changed. Therefore, it is incumbent upon you to notify your consultant of any factors that may have changed prior to submission of the final assessment/evaluation.

An assessment/evaluation of a site helps reduce your risk, but does not eliminate it. Even the most rigorous professional assessment may fail to identify all existing conditions.

ONE OF THE OBLIGATIONS OF YOUR CONSULTANT IS TO PROTECT THE SAFETY, HEALTH, PROPERTY, AND WELFARE OF THE PUBLIC.

If our environmental site assessment/evaluation discloses the existence of conditions that may endanger the safety, health, property, or welfare of the public, we may be obligated under rules of professional conduct, statutory law, or common law to notify you and others of these conditions.

The preceding paragraphs are based on information provided by the

EXECUTIVE SUMMARY

The Shannon & Wilson Team has completed a Phase I Environmental Site Assessment for Sound Transit Right-of-Way Number EL 297, located at 1700 130th Avenue NE in Bellevue, Washington. This study was conducted with the understanding that Sound Transit plans to acquire the entire subject parcel as part of the East Link Light Rail Project, E340 Corridor.

The research conducted as part of this assessment indicates that the office building at the site was constructed in 1977. The site is also developed with at-grade parking.

Based on our site visit and information review, it is the professional opinion of the Shannon & Wilson Team that a recognized environmental condition exists for the subject site.

Adjacent Property (Former Journal American – 1705 132nd Avenue NE, #EL 297.1)

- The east-adjointing property (EL 297.1), former Journal American, appears on the Leaking Underground Storage Tank and Independent Cleanup Report databases. Limited information suggests that soil contamination was discovered at the location of two underground storage tanks along the property's shared border with the parcel to the south (EL 299) in a relative up-gradient hydrologic position. A review of partial information indicates that 75 tons of petroleum-contaminated soil was removed and that remaining soils were compliant with cleanup levels. No information regarding groundwater quality at this facility was identified in the files reviewed.

Given the lack of information regarding groundwater quality at this off-site and relative cross to up-gradient facility, there appears to be a moderate risk of potential impact to the subject parcel.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
SOUND TRANSIT RIGHT-OF-WAY #EL 297
AIPHONE CORPORATION
1700 130TH AVENUE NE
BELLEVUE, WASHINGTON

1.0 INTRODUCTION

The Shannon & Wilson Team has completed a Phase I Environmental Site Assessment (ESA) for Sound Transit East Link Right-of-Way Number EL 297, located at 1700 130th Avenue NE in Bellevue, Washington. The work was conducted under contract #RTA/LR 164-09 with Sound Transit. This study was conducted to assist Sound Transit's plans to acquire the entire subject parcel as part of the East Link Extension, Contract E340 Project in Bellevue, Washington.

1.1 Purpose

The purpose of this Phase I ESA is to identify, to the extent feasible pursuant to the process described in the ASTM International (ASTM) Practice E 1527-05 and E 1527-13 (Phase I ASTM standard) *recognized environmental conditions* (RECs), *controlled RECs* (CRECs), or *historical RECs* (HRECs) associated with the site. The term REC means:

The presence or likely presence of hazardous substances or petroleum products in, on or at a property: (1) due to a release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

The term CREC means:

A REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place **subject to the implementation of required controls** (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

The term HREC means:

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, **without** subjecting the property to **any required controls**.

The terms REC and CREC are not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not RECs or CRECs.

The U.S. Environmental Protection Agency has determined that the Phase I ASTM standard (E 1527-13) (ASTM, 2013) is consistent with and meets the requirements for performing All Appropriate Inquiry (AAI) and may be used to comply with federal AAI regulations at 40 Code of Federal Regulations Part 312. Washington State Model Toxics Control Act (MTCA) (Washington State Department of Ecology [Ecology], 2013) and Dangerous Waste Regulations define hazardous or dangerous wastes and/or substances, and contain information regarding discovery and reporting. State regulations were considered within the process of performing this Phase I ESA.

1.2 Scope of Services

The scope of services included the following subtasks:

- Review of readily available information with respect to current uses of the property and its surroundings.
- Review of readily available information from various sources, including city directories, historical maps, and aerial photographs, with respect to the historical uses of the property and its surroundings.
- Review of state and federal databases of known and suspected contaminated sites.
- Visual reconnaissance of the property and cursory reconnaissance of the immediate site vicinity.
- Review of information related to the physical setting of the site.
- Preparation of this report.

The scope of this project does not include an evaluation of all environmental considerations that may be relevant to a particular transaction, such as testing for radon and mold, or evaluation of

indoor air quality, potential wetlands, regulatory compliance, and health/safety matters. It also does not include any sampling or testing of air, soil, water, or building materials.

1.3 Roles

To complete this Phase I ESA, the Team utilized the following members:

- Ms. Lisa Kollasch (Senior Environmental Scientist, EHS-International, Inc., [EHSI]) collected data, completed the site visit and initiated reporting.
- Mr. Kurt Easthouse (Principal Hydrogeologist, EHSI) completed initial review of technical content and provided EHSI quality assurance review.
- Mr. Michael S. Reynolds (Principal Environmental Engineer, Shannon & Wilson, Inc. [Shannon & Wilson]) completed review for programmatic consistency and compiled the report for production.
- Mr. Scott Gaulke (Vice President, Shannon & Wilson) completed final technical review of the report.

2.0 SITE DESCRIPTION AND PHYSICAL SETTING

The subject parcel is located in the northeast quarter of Section 28, Township 25 North, Range 5 East of the Willamette Meridian. The subject parcel is identified as King County tax parcel 2825059040. The property is owned by the Aiphone Corporation. The site vicinity is shown in Figure 1, and a map of the site and adjoining properties is presented in Figure 2.

The 53,838-square-foot (sf) parcel is occupied by a 17,945-sf warehouse and office building with associated at-grade parking. The subject parcel is adjoined by the following land uses:

- Blue Sky Church with associated parking lot to the north.
- A structure designated as the Evergreen Building to the northeast.
- An office building occupied by Spectrum Controls to the east (EL 297.1).
- A commercial structure occupied by Arnold's Appliance (EL 299) to the southeast.
- A warehouse building occupied by Grand Event Rentals and Fastenal to the south (EL 296).
- A mining/quarry/ore processing facility owned by Cadman, Inc. across 130th Avenue NE to the west (EL 290).

Site elevation ranges from approximately 209 feet above mean sea level (MSL) at the northwest portion of the parcel to 194 feet MSL at the southeast portion of the parcel. Surrounding topography generally slopes gently down toward the south and southeast.

3.0 GEOLOGIC AND HYDROGEOLOGIC SETTING

This section describes the general geologic setting of the site vicinity and discusses the subsurface conditions beneath the site and surrounding area as they relate to the potential for contamination to migrate through the soils and groundwater.

3.1 Regional and Site Geologic Setting

Bellevue is located in the central portion of the Puget Sound Basin, an elongated, north-south-trending depression situated in western Washington between the Olympic Mountain Range to the west and the Cascade Mountain Range to the east. Regional topography was shaped mainly by repeated glaciations that moved back and forth across the region over 10,000 years ago, leaving a thick deposit of unconsolidated soils and creating a series of north-south-trending ridges separated by deep troughs. The troughs are now occupied by streams, lakes, and waterways, including Puget Sound, Lake Washington, and Lake Sammamish.

Several explorations were advanced in the E340 Corridor and on the subject site to collect geotechnical and hydrogeological data in support of previous East Link Light Rail studies (CH2M Hill, 2011; H-J-H Design Partners [H-J-H], 2014a). Two soil borings (E340-B-025 and E340-B-026) were drilled on the subject parcel during one of the geotechnical investigations. Boring E340-B-025 reported up to 4.5 feet of fill (silty sand and sand with little silt) underlain by about 2.5 feet of Recessional Outwash (sand with some gravel), and 2.5 feet of Till (sand and silt with gravel). Pre-Vashon Fluvial Deposits (silty sand) underlie the Till to the bottom of the boring at 16.5 feet. In Boring E340-B-026, soil observed included Recessional Outwash to 12 feet, underlain by Pre-Vashon Fluvial Deposits to 15.9 feet.

3.2 Regional and Site Groundwater

Information regarding groundwater depth and flow direction was obtained by reviewing the Environmental Data Resources, Inc., (EDR) report (2014a and 2014b), Ecology files and the Sound Transit East Link, South Bellevue to Overlake Transit Center Geotechnical Data Report (H-J-H, 2014a), and Geotechnical Recommendations Report (H-J-H, 2014b).

Groundwater conditions at the site include a regional aquifer that is primarily within the pre-Vashon fluvial deposits and a shallow perched aquifer above the glacial till and lacustrine deposits. The groundwater elevation within the regional aquifer is approximately elevation 178 feet (12 feet below ground surface [bgs] at the site) and the flow direction is west. The regional aquifer is confined by overlying till and lacustrine deposits, and wells installed within the regional aquifer near Kelsey Creek (on EL 287) show artesian conditions with water levels measured approximately 12.5 feet above ground (approximately elevation 150 feet). Shallow groundwater has been observed near ground surface perched on the till and lacustrine deposits. The extent of the perched groundwater and flow direction will vary depending on the localized topography and geology.

Depth to groundwater near the site was measured approximately 12 feet bgs (elevation 178 feet) in monitoring well E340-B-019, and approximately 6 feet bgs (elevation 188 feet) in monitoring well E340-B-022. Monitoring well E340-B-019 is located about 200 feet south of the subject parcel, in 130th Avenue NE, and is screened approximately 90 feet bgs within the regional aquifer. Monitoring well E340-B-022 is located about 230 feet southeast of the subject parcel; it is screened approximately 15 feet bgs within the perched aquifer. The direction of groundwater flow within the regional aquifer is to the west. The direction of perched groundwater flow was measured to be to the southwest on the west-adjointing parcel (EL 290) (HartCrowser, 1999). A southerly groundwater flow direction was estimated on the southeast adjoining parcel (EL 299) (CH2M Hill, 1995). Based on this information, we estimate the direction of perched groundwater flow beneath the subject parcel to be generally to the south.

4.0 SITE HISTORY

The history of land use for the subject parcel was evaluated to identify past uses that might have had adverse effects on the environmental conditions of the property, primarily through the use of potentially hazardous materials. The historical information was obtained by reviewing readily available data from public agencies and library resources.

The following site history is based on a compilation of information obtained from the following resources:

- Aerial photographs (1944, 1965, 1968, 1977, 1980, 1985, 1990, 2005, 2006, and 2011) (EDR, 2014c).
- Aerial photographs from King County's geographic information system (1936, 1998, 2000, 2002, 2005, 2007, and 2009).

- Kroll Atlas (1960, 1965, and 1970).
- Historical Topographic Maps obtained from EDR (1895, 1897, 1950, 1968, 1973, 1982, and 1983) (EDR, 2014d).
- Cole Historical Reverse Street Directories from EDR – Bellevue, Washington (1971, 1976, 1981, 1986, 1992, 1995, 1999, 2003, 2008, and 2013) (EDR, 2014e).
- King County Assessor’s current and archive records.
- Sanborn Maps (none available for subject parcel and adjacent areas) (EDR, 2014f).

4.1 Site

Historical 1936 and 1944 aerial photos show the southern half of the subject parcel as undeveloped and covered with vegetation, while the northern half had been cleared and graded with an agricultural field on the eastern portion. In the 1965 photo, the southern half of the parcel is still undeveloped with vegetation, but the agricultural field in the northeastern portion is no longer shown. The 1968 photo is unclear, but appears to show no change. Beginning in 1977, the aerial photography displays a warehouse structure to the northeast of the parcel along with parking and vegetative cover for the remainder of the property. The 1985 aerial photo displays an addition to the southeast of the warehouse. The aerial photographs continue to display the warehouse with the addition, as it currently exists in the 1990 through 2011 photographs.

The Kroll Atlas indicates that the subject parcel formally spanned two larger parcels under private ownership in 1960 and 1965. The 1970 atlas denotes the parcel spanning two smaller parcels with no further details.

Cole Historical Street Directories provide no data for the subject parcel (1700 130th Avenue NE) in 1971 and 1976. The 1981 directory lists Aiphone USA, Inc. and Deroche & Co., Inc. The 1986 through 1999 listings have Aiphone Intercom Systems as the only tenant. The 2003 listing shows Aiphone Communications Systems, Aiphone Corporation and an unknown occupant. The 2008 and 2013 directories show Aiphone Corporation as the only occupant.

The historical topographic maps show the property as vacant land in 1950, 1968, and 1973. On the 1982 map, the present-day warehouse structure is shown.

An undated King County Assessor’s tax card has a hand drawn floor plan of the structure noting rooms including a warehouse, engineer repair, parts-service, shipping and two office areas. One office area is noted as being occupied by a lessee named De Rouche & Co. One section is noted

to be an addition added pre-1986 with no permit. The mezzanine level is used for storage and the building substrate is concrete. Space heaters are noted to be used in the warehouse while electric baseboard and an air heating, ventilation and air conditioning (HVAC) system are present in the office areas. A copy of the archive tax records is included in Appendix A.

Current King County Assessor's records indicate the property was developed with a one-story office and warehouse masonry structure with a mezzanine level in 1977. The building utilizes a warmed and cooled HVAC system and the current owner is the Aiphone Corporation. One building permit is noted as being issued for an interior remodel in December 2008 for the introduction of partitions and walls to enclose the open warehouse and create workspace.

4.2 Adjacent Site History

Histories of adjacent properties are discussed in a clockwise order beginning with the property to the north.

4.2.1 Adjacent Property to the North

The 1936 and 1944 aerial photos show the adjacent north parcel as developed with what appears to be a single family residence with two small additional structures. An agricultural field is shown in the southeast portion of the parcel. The 1965 photo shows at least three rectangular structures. The 1968 photo is unclear but appears to show no change. The 1977 through 2011 photos show the site as it currently exists, with two adjoining structures and associated at grade parking.

The topographic maps display the property as vacant land in 1950, 1968 and 1973. The 1982 map displays the north adjoining structures on the property as they currently exist.

The Kroll Atlas displays the parcel as being part of two larger parcels that were privately owned in 1960 and 1965 with what appears to be a residential structure in the northwest. The 1970 atlas exhibits this parcel as being combined as an even larger parcel with property to the southeast.

Cole Historical Street Directories begin listing the property address of 1720 130th Avenue NE in 1981 as Care Computer Sys, Moore Publications, and Peoples Constructn. Other listings include: CMC Intrnl, Communctn Research, and Energy Sciences (1986); Asscn Iranians WA, Biomed Inc., Pressure Products, and Profit Mngmnt Grp (1992); Colonnade Technologies, Inc., Data Envelope & Packaging, Evergreen Management Co., Highland Classic Homes, Pressure

Products, Inc., and Purus Technologies, Inc. (1995); Alpharma NW Incorporated, Evergreen Management Company, Pharmacy Aquatic Animal Health Division, and Purus Technologies (1999); Digital Candle, Inc., Evergreen Management Co., Purus Technologies, Inc., and Rob Woolfenden (2003); and Blue Sky Vineyard Church (2008).

King County Assessor's records describe the one-story structure as being of masonry construction and describe interior areas as office space or "industrial flex" areas. The structure was built in 1977 and has a heat pump heating system. Sales history includes the April 21, 2001, sale from Moore Building Associates to Almar Limited Partnership with the subsequent sale to Blue Sky Church, the current owner on April 24, 2013. Permits for interior tenant space improvements are listed in May 2007 and one new building permit is listed in April 2014.

4.2.2 Adjacent Property to the Northeast

The 1936 and 1944 aerial photos show the adjacent northeast parcel with undeveloped forest on the eastern portion with cleared, mostly vacant land on the remaining west and central portions. The site has multiple rural roads and small structures. The 1965 and 1968 photos show vacant land with rural roads. The 1977 photo shows undeveloped land covered with vegetation. 132nd Avenue NE is shown to the adjacent east of this property. The 1980 through 2011 photos show this property as it currently exists, with one rectangular-shaped structure to the southwest, forested vegetation to the southeast and a parking lot along the northern boundary.

The topographic maps display the property as vacant land from 1950 to 1982.

The 1960 and 1965 Kroll maps show the property as being part of a larger, privately owned parcel. The 1970 map shows the larger parcel as being slightly smaller. No property owner is noted.

Cole Historical Street Directories do not list this property (1721 132nd Avenue NE) in 1971 or 1976. In 1981, the property is listed under Resource Control. No listings were again found for 1986, 1992, and 1999. In 1995, the property is listed under Laser Fantasy Inc. In 2003, the property is listed under Bender Consulting LLC and Stuart Anderson. In 2008 and 2013, the property is listed under The RAFN Company.

King County Assessor records describe a one-story masonry building on this parcel. The structure was built in 1978 and utilizes a heat pump heating system. The structure is divided into office and storage warehouse spaces. Sales history includes the April 12, 1988, sale from BA

Mortgage & International RE to John B Cahoon III, and the subsequent January 1, 2008, sale to Evergreen Building Partners LLC, the current owner. No permit history is noted.

4.2.3 Adjacent Property to the East

The 1936, 1944, 1965, and 1968 aerial photos display the parcel (EL 297.1) as partially forested, vacant land. The 1977 through 2011 photos show this property as it currently exists, with an irregular-shaped structure with at-grade parking.

The topographic maps display the property as vacant land from 1950 to 1973. The 1982 map displays the east adjoining structure on the property as it currently exists.

The Kroll Atlas displays the parcel as being part of two larger, privately owned parcels from 1960 through 1965. The 1970 atlas exhibits this parcel as spanning two parcels with no further information given.

Cole Historical Street Directories begin listing the property addresses of 1700 132nd Avenue NE in 1976 as Familian NW, Inc. The property address of 1705 132nd Avenue NE is also listed beginning in 1981. Other listings for these two addresses include: Familian NW, Inc. and Journal American Newspaper (1981 and 1986); Journal American, Familian Northwest, and Northwest Media (1992); Familian Corp. (1995); Familian Northwest, Inc., Eastside Journal, Journal American, and Northwest Media (1999); Familian Northwest, Eastside Journal, Northwest Media, Inc., and two unknown occupants (2003); Ferguson Enterprises, Inc., FNW Ferguson, and Northwest Medical Washington LP (2008); and FNW Ferguson and King County Journal (2013).

King County Assessor's records describe the two-story masonry office building as heated with heat pumps and built in 1977. Sales history includes the February 28, 1986, sale from Newspaper Partners to Longview Publishing and the subsequent sale on May 18, 2006, from Northwest Media LP to PBNK Development, LLC, which is the current owner. Permit history includes a new building permit issued in May 2007 for the expansion of the second floor in the existing building and a January 2008 permit for the repair of a bridge, guard rails, and decking.

4.2.4 Adjacent Property to the Southeast

The parcel to the southeast (EL 299) appeared as vacant forested land in the 1936 through 1965 aerial photographs. In the 1968 aerial photograph, the site appeared cleared and graded. Archive tax assessor records indicate that the site was developed with a 4,850-sf shop building in

1969 that was occupied by Ace Bulldozing. The heat source for the building is noted as oil and an oil storage room is depicted at the northwest corner of the building. The fee owners in 1969 were Bill and Elvin Whitescarver. The aerial photos from 1977 and 1980 show the shop building on the northwest quadrant of the site with parked vehicles and storage yard covering the remainder of the parcel. The western core of the existing warehouse building was constructed in 1983 and replaced the earlier shop building. The 1985 aerial photograph shows the 1983-vintage warehouse building occupying the western portion of the site with the eastern portion covered with paved parking. The eastern showroom portion of the building was reportedly constructed in 2005 and is seen on the 2008 to 2011 aerial photographs.

A review of historical Cole reverse street directories documents Whitescarver Brothers and Ace Bulldozing occupying the site from at least 1971 through 1981. The site address was not listed in 1986 through 1992; however, the Eastside Journal and Journal American operated a printing production facility on the site during this time frame, but their official address was 1705 132nd Avenue NE. Both Arnold's Appliance and Lexus of Bellevue were listed at the subject site address in 2013.

4.2.5 Adjacent Property to the South

The 1936 and 1944 photographs show this property (EL 296) as undeveloped land covered with vegetation. The 1965 photo shows the property developed with one rectangular-shaped building. The 1968 photo is not clear, but appears to show the property the same as depicted in the 1965 photo. In the 1977 photo, the single, rectangular building is seen, but parking areas along the north, west, and south perimeters are also visible. In the 1980 through 2011 photos, the site appears unchanged.

The topographic maps display the property as vacant land in 1950. One rectangular shaped structure is visible in the 1968, 1973, 1982, and 1983 maps, as it currently exists.

The Kroll Atlas displays the parcel as being part of a larger, privately owned parcel in 1960 and 1965. The 1970 atlas exhibits this previously larger parcel as being segregated into three separate smaller parcels.

This property contains multiple tenant spaces. The Cole Directories for 1606 130th Avenue NE include Stusser Electric in 1971 through 2003. The same address lists Eastside Durham Upholstery, Inc. and Grand Event Rentals in 2008 and only Grand Event Rentals in 2013. The only listing found for 1612 130th Avenue NE was Fastenal in 2013. The only listing found for 1618 130th Avenue NE was The Wall Doctor, Inc. in 2013. For 1628 130th Avenue

NE, Comtech Financial Corporation is listed in 1995 through 2013, Instruments Supply and McLean, Inc. in 1986, McLean, Inc. in 1981 and 1976, and Wes-Con Development and Campsites of America were listed in 1971.

Historical Archive tax records indicate that the fee owner was Andover Investment Company in December 1961. A one-story concrete masonry block structure with a concrete foundation was built in 1962. The structure is noted to have a mixture of electrical, gas, and baseboard heating systems. A hand-drawn floor plan of the building shows a warehouse with a sales and display area in the original 1962 construction section of the building with office areas, a plumbing warehouse, and two storage areas in a 1967 building addition. A 1962 photo of the subject parcel shows the name Stusser Electric on the side of a building.

The current King County Assessor records indicate that the one-story masonry structure was built in 1962. It is comprised of warehouse office and storage spaces and is heated with space heaters. Sales history includes the November 1, 1993, sale from Andover Investment Company to Stusser Electric Company; the July 5, 1995, sale from Andover Investment Company to SGB, LLC; the February 14, 2005, sale from SGB, LLC to Les Real Estate Holdings, LLC; and lastly, the subsequent February 6, 2009, sale to Elufa, LLC, which is the current owner. Permit history includes one remodel permit issued in March 2009 for the removal of five interior walls and cabinets.

4.2.6 Adjacent Property to the West

The 1936 and 1944 aerial photographs show a rural road with partially forested undeveloped land beyond. The 1965 photo displays 130th Avenue NE with much of the land beyond as being cleared and replaced with a quarry. Several irregular-shaped structures are shown in the north central area of this large parcel. This mining quarry/ore processing facility is also shown in the 1968 through 2011 photos.

The property to the adjacent west is shown as vacant in the 1950 historical topographic map. The maps display three small structures on the property in 1968 and 1973. The 1982 map shows one small, rectangular-shaped structure on the property.

The Kroll Atlas displays 130th Avenue NE with the property beyond as part of two separate parcels in 1960 and 1965. A small structure is visible in the eastern portion of the southern parcel. The 1970 Kroll Map shows the current parcel configuration and is listed as “Lkside Gravel.”

The Cole Historical Reverse Street Directories have no listings for this property (1605 130th Avenue NE).

Archived assessor records indicated that the site was owned by Hattie Norman in either 1914 or 1915 and the site was covered with brush and used for residential farming purposes. In 1939, the property was owned by Willem A. Frastex and also listed as being used for residential farmland. A single-family residence was constructed on the site in 1946 with an oil-fired heat source. The residence had indoor plumbing and an associated garage was noted to have a dirt floor. By 1956, a small office and batch plant were located on the site.

The current King County Assessor's records indicates a mining/quarry/ore processing operation on the property with two buildings, one for sand and gravel operations, and the other a storage building. The sand and gravel building is a one-story, wood-framed office building constructed in 1946. The storage building is a one-story, wood-framed structure with an unfinished basement built in 1960. The heating system for both buildings is listed as unknown. Sales history includes the March 29, 1991, sale from the Washington Asphalt Co., Inc. to the Cadman Premix Co., Inc. (Cadman), which is the current owner. Permit history includes a new building addition in June 2009 for a cement silo at the concrete batch plant.

5.0 RESULTS OF VISUAL RECONNAISSANCE

Ms. Lisa Kollasch conducted a visual reconnaissance of the subject parcel on November 13, 2014. The purpose of the reconnaissance was to identify visible indications of hazardous or potentially hazardous substances that were historically used or are currently used, generated, stored, or disposed of on the subject parcel.

Ms. Kollasch was unaccompanied while viewing the interior of the building. The subject building is currently occupied by Aiphone Communication Systems (Aiphone). Aiphone develops and manufactures building communication and security systems and does not generate any hazardous wastes in their operations. The owner requested that any photographs taken onsite be reviewed prior to publication. Representative photographs taken during the site reconnaissance and approved by the site owner for publication are provided in Appendix B. A visual reconnaissance of adjoining properties was also conducted during this site visit, but was restricted to what could be observed from public areas. A site visit checklist which documents field observations is included in Appendix C.

5.1 Subject Parcel

A one-story office building with mezzanine level and associated paved parking areas occupies the site (Photo 1). Exterior surface parking lots occupy the south and west portions of the site (Photos 1 and 2). The north exterior of the building has a small strip of landscaping with vegetation which borders the parcel boundary (Photo 3). The east exterior of the subject building has a small strip of undeveloped land with vegetation on an incline leading uphill to a chain link fence (Photo 4).

One transformer was observed in the northwest exterior area by the trash dumpsters (Photo 5). Holes in the concrete barrier wall of this area between the subject parcel and the one to the north could potentially be for drainage purposes (Photo 6). High intensity discharge lighting was observed on the building exterior (Photo 7) as well as in “street light” style lights throughout the paved parking areas (Photo 8). One back-up generator was seen on the southeast exterior of the building (Photo 9). This is most likely a package unit with a built-in day tank into the base. One capped soil boring was also observed in the southeast exterior paved parking area (Photo 10 and Figure 2). One flammable chemical cabinet was noted in the warehouse area of the subject building (Photo 11). Items inside the cabinet included silicone coating spray, anti-static cleaner, epoxy compound, low odor mineral spirits, and denatured alcohol (Photo 12).

Interior building features noted during the reconnaissance included office areas, manufacturing and shipping warehouse areas, and a conference room (Photos 13 and 14). Housekeeping appeared to be good throughout the building, with no evidence of leakage or spills.

5.2 Adjacent Properties

The following observations were made of the adjoining properties:

- The subject parcel is adjoined by 130th Avenue NE to the adjacent west with the Cadman (EL 290) quarry property beyond (Photos 15 and 16). The property has undeveloped vegetation on perimeter boundaries with a largely open central area. Quarry machinery is present on the north half of EL 290, with multiple small office structures in the south half.
- Blue Sky Church is to the north (Photo 17) with one structure comprising the central and northeast areas of the site with paved parking areas along the west and south perimeter boundaries.
- To the east there is a chain link fence with Spectrum Controls beyond (Photos 4 and 18) (EL 297.1). A paved parking area exists between the fence and this two-story office building.

- Arnold's Appliance Store with an associated parking lot is located to the adjacent southeast (EL 299). The irregular-shaped structure occupies the northwest quadrant of the parcel, with paved parking areas comprising the south, east and northeast property areas. Goff Creek runs sub-grade along the eastern perimeter boundary of the site with a sidewalk and 132nd Avenue NE beyond.
- To the south is a patch of vegetation, a rock wall, and the adjoining Elufa property (EL 296, Photos 19 and 20). The Elufa property is at a lower elevation compared to the subject property and contains a one-story commercial structure with a paved parking lot.

6.0 RESULTS OF ENVIRONMENTAL RECORDS REVIEW

Regulatory agency records were reviewed for the subject parcel and nearby properties to identify known or potential sources of contamination that could adversely impact the subject parcel. We authorized EDR to conduct a search of the U.S. Environmental Protection Agency (EPA), Ecology, and local and tribal environmental databases that contain information regarding environmental conditions at and near the subject parcel. The EDR report was reviewed for accuracy of site locations. The complete EDR report, including figures identifying locations of reportable sites within 1 mile of the subject parcel, is included in Appendix D.

6.1 Environmental Data Resources, Inc. (EDR) Report Review

Numerous sites within the selected search radii are listed in the local, state, and/or federal databases that were reviewed. Some of the sites are listed in multiple databases. Table 1 includes information about listed sites with confirmed or suspected contamination that are within approximately ¼ mile of the subject parcel for sites that are potentially up-gradient. The table also includes information about such sites within approximately 400 feet in other directions from the subject site. Other sites identified by the EDR search were not reviewed further because they are:

- Located down- or cross-gradient from the subject parcel and greater than 400 feet away.
- Too far away, based on the contaminant type, to likely affect the subject parcel.
- Registered only as generators of hazardous waste with no disposal or reporting violations and no documented evidence of contaminant releases.
- Listed in the state underground storage tank (UST) database but not listed in state and/or federal databases that would indicate that a release has occurred.
- Not known to have contamination.

Out of the six sites listed in Table 1, four were excluded from further evaluation based on remediation status, distance from the subject site, and/or a low hazard ranking.

6.2 File Review

Based on their locations and distances from the subject parcel, as well as types of contaminants and indications of potential groundwater impacts, two sites listed in Table 1 were selected for further review and are discussed below. Site information was collected from the EDR report, and the Ecology Northwest Region office in Bellevue, Washington. A copy of the documentation from the Ecology file review is included in Appendix E.

6.2.1 1605 and 1701 130th Avenue NE (#EL 290)

The Cadman site is listed on the Recovered Government Archive State Hazardous Waste Facilities List, Facility Index System/Facility Registry System (FINDS), Confirmed and Suspected Contaminated Sites List (CSCSL), and Facility/Site Identification Listing (ALLSITES) databases. The Cadman site is located adjacent to the subject parcel to the west in an inferred cross-gradient to down-gradient position with respect to groundwater flow. Cadman performed a soil remedial action in 1998 in regards to releases associated with a former aboveground storage tank shed and two diesel USTs. A total of 323 tons of total petroleum hydrocarbons (TPH)-impacted soil was excavated and removed off-site for recycling. Groundwater wells were installed and showed the groundwater flowed to the west/southwest away from the subject parcel. The reported concentration of diesel in the post-remediation downgradient well was at 269 micrograms per liter ($\mu\text{g/L}$), which is below the MTCA Method A Cleanup Level of 500 $\mu\text{g/L}$. Based on the groundwater flow direction away from the subject parcel and the reported groundwater concentrations below MTCA, the reported release at the Cadman site is not likely to impact the subject parcel.

6.2.2 1625 and 1705 132nd Avenue NE (#EL 297.1 and #EL 299)

The former Journal American facility is listed at the parcel adjacent and southeast of the subject parcel at 1625 132nd Avenue NE (EL 299) and at the parcel adjacent and east of the subject parcel at 1705 132nd Avenue NE (EL 297.1). The Journal American newspaper formerly operated on both parcels. The site is also listed under the names Longview Publishing and King County Journal. The site appears on the ALLSITES, Resource Conservation and Recovery Act NonGenerator/No Longer Reporting, UST, CSCSL-No Further Action (NFA), Institutional Controls, FINDS databases. The listings describe separate cleanup efforts for both parcels.

CH2M Hill completed an Independent Remedial Action Report on EL 299 (CH2M Hill, 1995). The report documented a release to soil and groundwater from a former UST and associated fuel dispensing island located on the south-central portion of the subject parcel. According to the report, the contamination was discovered in 1994 after the site had been redeveloped and a former press building constructed over part of the area of contamination. Remediation of the contamination involved excavation of approximately 40 tons of contaminated soil. Approximately 430 cubic yards of petroleum-contaminated soil were left in place due to concerns with the structural integrity of the building. Impacts to groundwater by TPH as gasoline were initially identified. Monthly groundwater sampling events from September 1994 through February 1995 did not disclose petroleum-related contaminants above the MTCA Method A cleanup levels in effect at that time. The contaminants of concern were identified as TPH as gasoline, TPH as diesel, and benzene, toluene, ethylbenzene, and xylenes (BTEX). The report stated that a 4-inch asphalt cap would be placed over the parking lot and along with the presence of the press building effectively cap the contamination left in place.

Four groundwater monitoring wells were installed in 1995 and 1996 and documented groundwater flow to the south (CH2M Hill, 1996). The groundwater data from the monitoring wells documented gasoline (non-detect to 400 $\mu\text{g/L}$) and diesel (non-detect to 580 $\mu\text{g/L}$) below the MTCA Method A Cleanup Levels at that time (1,000 $\mu\text{g/L}$ for both gasoline and diesel). MTCA was revised in 2007 and 2013 and the cleanup level for diesel was reduced to 500 $\mu\text{g/L}$. This information indicates that some of the past groundwater data was out of compliance in terms of current cleanup levels for diesel.

On September 25, 1996, a Restrictive Covenant was filed for parcel EL 299. The following stipulations were included in the Restrictive Covenant:

- No activities may be conducted at the property that may interfere with the groundwater monitoring and the continued protection of the Independent Remedial Action.
- No activities may be conducted that may result in the release of the petroleum hydrocarbon contamination capped by the press building, loading dock and asphalt paving identified as capping the petroleum hydrocarbon contamination.
- Water wells shall not be installed on the property for the purpose of domestic use.
- Written notification must be given to Ecology or its successor agency before excavating, moving or removing the soils or material beneath the press building, loading dock, and asphalt paving that are capped by these structures. In the event that the cement flooring and foundation of the press building or loading dock are

- demolished, all TPH-contaminated soils above applicable Washington Administrative Code (WAC) 173-340-700 through 173-340-760 cleanup standards shall be removed and disposed of in accordance with applicable law or, in the alternative, appropriate sampling and testing shall be completed that documents that the remaining TPH-contaminated soils are below applicable cleanup criteria. A report documenting these facts shall be submitted to Ecology or its successor agency for review and approval.
- Written notification must be given to Ecology or its successor agency before removal or destruction of those areas of the existing press building, loading dock, or asphalt paving identified as having petroleum contamination.
 - Written notification must be given to Ecology or its successor agency of owner's intent to convey any interest in the property. Furthermore, no conveyance of title, easement, lease, or other interest in the property will be consummated by the owner of the property without notice of this Restrictive Covenant.
 - The owner must notify Ecology or its successor agency prior to any use of the property that is inconsistent with the terms of the Restrictive Covenant.
 - Ecology or its successor agency or its designated representative shall have the right to enter the property after a 24-hour notice at reasonable times for the purpose of evaluating compliance with the terms of the Restrictive Covenant, to take samples, and to inspect records related to the Independent Remedial Action.
 - Upon remediation of the petroleum-contaminated soil to below those levels set forth in WAC 173-340-700 through 173-340-760, the owner may record an instrument stating that the Restrictive Covenant is of no further force or effect, provided the owner has the consent of Ecology or its successor agency to do so.

It appears that the described loading dock has been demolished and removed from the site. It is unknown whether or not the conditions of the Restrictive Covenants were followed when the loading dock was removed.

A Phase II ESA was also for EL 299 and testing of soil and groundwater was conducted for gasoline and BTEX and all of the results were below MTCA Method A Cleanup Levels (JMK Environmental Solutions, Inc. [JMK], 2007). However, groundwater samples were not analyzed for diesel, so groundwater quality in regards to this compound is unknown.

Ecology conducted a five-year periodic review of this parcel in October 2009 (Ecology, 2009). The review notes that a NFA letter was issued on October 7, 1996. In their review, Ecology concluded the following:

- That the cleanup actions completed at the site appear to be protective of human health and the environment,

- Soil cleanup levels have not been met at the standard point of compliance for the site; however, the cleanup action has been determined to comply with cleanup standards since the long-term integrity of the containment system is ensured, and the requirements for containment technologies are being met.

The Restrictive Covenant for the property is in place and continues to be effective in protecting human health and the environment from exposures to hazardous substances and protecting the integrity of the cleanup action.

Journal American also occupied the parcel located adjacent to the east of the subject parcel in a relatively up-gradient hydrologic position (EL 297.1). A review of reports indicates that two gasoline USTs and approximately 75 tons of petroleum-contaminated soil were removed from the east-adjointing Journal American property in 1995 (CH2M Hill, 1995). Confirmation sampling at the final limits of the remedial excavation documented the removal of the contamination.

On August 10, 1998, Ecology sent a single-page letter to Longview Publishing Company regarding the Journal American facility on the east-adjointing parcel (EL 297.1) (Ecology, 1998). The letter notes that Ecology did not receive a final cleanup report for the Journal American facility. The letter informed the property owner that MTCA requires submittal of final cleanup reports within 90 days of completion of the cleanup action.

Given the lack of information regarding groundwater quality at this inferred up-gradient to cross-gradient facility (EL 297.1), a release to groundwater may have occurred, potentially impacting the subject parcel.

7.0 PREVIOUS ENVIRONMENTAL REPORT REVIEW

No previous environmental reports have been provided by the property owner as of the writing of this report.

8.0 INTERVIEW AND USER-PROVIDED INFORMATION

8.1 Interview

An interview questionnaire was sent to Ms. Deborah Kirchner (Vice President, Administrative Services for Aiphone) on October 30, 2014. Ms. Kirchner as well as Duane Davison Whse/Logistics Manager (*sic*), Frank Koch, Facilities Maintenance supervisor and Michael Hoyt, Engg/Production Manager (*sic*), filled out the form and sent it back to the Shannon &

Wilson Team on November 6, 2014. A copy of the interview form is included in Appendix F. The interview revealed that conformal coatings, rubbing alcohol, and general household cleaners are used on site. The interview also revealed that asbestos had been found in the kitchen floor tile mastic. No other known potential environmental concerns were noted.

8.2 User Provided Information

The Shannon & Wilson Team sent Sound Transit a questionnaire asking if Sound Transit had any specialized knowledge regarding the site, and whether Sound Transit was purchasing the subject parcel below its market value. Sound Transit completed the questionnaire on October 21, 2014. Sound Transit was not aware of any liens or activity use limitations for the property. Sound Transit was not aware of releases or past releases at the property. Sound Transit did not know if the purchase price reflected fair market value for the property. A copy of the completed user questionnaire is included in Appendix G.

9.0 DATA GAPS

Within the context of our all appropriate inquiry for recognized environmental conditions at the subject site, we have identified the following data gap:

- **No 50-year chain of title or environmental lien searches were provided.**
 - *The **significance** of this data gap is unknown. If this information is provided to us, we will review it and issue an addendum to the report if any of our conclusions or recommendations are altered.*

10.0 SUMMARY OF FINDINGS AND CONCLUSIONS

The Shannon & Wilson Team has performed this Phase I ESA in conformance with the Scope and Limitations of ASTM Practice E1527-13 for the subject property located at 1700 130th Avenue NE in Bellevue, Washington. Any exceptions to, or deletions from, this practice are described in Section 9.0 of this report. This assessment has revealed no evidence of RECs in connection with the subject property with the exception of the following:

- The east-adjointing property (EL 297.1), former Journal American, appears on the Leaking Underground Storage Tank and Independent Cleanup Report databases. Limited information suggests that soil contamination was discovered at the location of two USTs along the property's shared border with the parcel to the south (EL 299) in a relative up-gradient hydrologic position. A review of partial information indicates that 75 tons of petroleum-contaminated soil was removed and that

remaining soils were compliant with cleanup levels. No information regarding groundwater quality at this facility was identified in the files reviewed.

Given the lack of information regarding groundwater quality at this off-site and relatively up-gradient facility, there appears to be a moderate risk of potential impact to the subject parcel.

11.0 LIMITATIONS, UNCERTAINTY, AND RISK

This Phase I ESA was conducted to render a professional opinion about the likelihood of regulated contaminants being present on, in, or beneath the site at the time services were conducted. No matter how thorough a Phase I ESA study may be, findings derived from its conduct are limited, and the Shannon & Wilson Team cannot know or state for an absolute fact that a site is unaffected by reportable quantities of regulated contaminants. Furthermore, even if the Shannon & Wilson Team believes that reportable quantities of regulated contaminants are not present, Sound Transit still bears the risk that such contaminants may be present or may migrate to the site after the study is complete.

The Shannon & Wilson Team has reviewed historical records and conducted an on-site visual inspection of the subject parcel. We have examined and relied on documents referenced in the report and on oral statements made by certain individuals. The Shannon & Wilson Team have not conducted an independent examination of the facts contained in referenced materials and statements. We have assumed that these documents are genuine and that the information provided in these documents and statements is true and accurate. We have no knowledge or indication to the contrary unless otherwise stated in the body of the report.

Data generated from the site reconnaissance reflect that which can be reasonably inferred or is obvious by direct visual observation. The Shannon & Wilson Team assumes no responsibility for identifying characteristics of the subject parcel that were not readily identifiable by visual reconnaissance at the time of our site visit.

The Shannon & Wilson Team has prepared this report in a professional manner, using that level of skill and care normally exercised for similar projects under similar conditions by reputable and competent environmental consultants currently practicing in the area, and in accordance with the terms and conditions set forth in our contract and Work Directive #14. The Shannon & Wilson Team is not responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed at the time the report was prepared. Also note that the facts and conditions referenced in this report may change over time and that the conclusions set forth here are applicable to the facts and conditions as described only at the time

of this report. Conclusions were made within the operative constraints of the scope, budget, and schedule for this project. We believe that the conditions stated here are factual, but no guarantee is made or implied.

This report is for the exclusive use of Sound Transit and its representatives. Shannon & Wilson has prepared Appendix H, “Important Information About Your Environmental Site Assessment/Evaluation Report,” to help you and others understand the use and limitations of our reports.

12.0 CERTIFICATIONS, SIGNATURES, AND CREDENTIALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in the Code of Federal Regulations Title 40, Part 312. We have the specific qualifications based on education, training, and experience to assess a property of this nature, history, and setting of the subject parcel.

This ESA was performed by:

Kurt Easthouse, L.G., L.H.G.
Principal Hydrogeologist

Mr. Easthouse is a Principal Hydrogeologist at EHSI, and has reviewed this report for technical content. He is a Professional Geologist and Hydrogeologist with over 28 years of experience characterizing and remediating environmental contamination.

Scott W. Gaulke, P.E., L.H.G.
Vice President

Mr. Scott W. Gaulke, a Vice President at Shannon & Wilson, Inc., reviewed this Phase I ESA for completeness and technical accuracy. Mr. Gaulke is a Professional Engineer with over 25 years of experience conducting Phase I ESAs and other environmental assessments.

APPENDIX C
SITE VISIT CHECKLIST

SITE VISIT CHECKLIST

GENERAL INFORMATION

Date: 11-13-14 Arrival Time: 8 am Departure Time: 10 am
Weather Conditions: Sunny, partial clouds
Inspector (Name, Title): Lisa Kollasch, Senior Environmental Scientist
Site Contact (Name, Title): Deborah Kirchner

The source (Name/Agency/Publication) of all data should be provided with the data.

1.0 PHYSICAL SITE DESCRIPTION

Facility/Project Name: Aiphone – EL297
Address: 1700 130th NE
City, State, Zip: Bellevue, WA 98005
County: King
Property Boundaries (Street names, development, woods, lakes, etc)
North: Thin patch of elevated landscaping with vegetation.
South: Rock wall leading to lower elevation covered with vegetation.
East: Vegetation on slope leading uphill to chain link fence.
West: 130th Ave
Methods of Investigation (Walk, drive, perimeter, etc.): Walk
Accessed/Did Not Access: Accessed interior and exterior areas.

2.0 GENERAL PHYSICAL CONDITIONS

Size of Site (Acres/sq.ft): 53838 ft²
Shape of Site: square
Number of Parcels: 1

Land Use

Present Use (Agriculture, residential, commercial, industrial): Commercial / industrial
Zoned: BR-RC-1
Percentage of Occupancy: 100%
Tenant Life (Use): Since at least 1981 per city directories. Per interview with Deborah Kirchner, Aiphone developed this site.
Land Cover: Minimal landscaping cover, parcel is ~25% building and 75% paved parking and right-of-ways.
Number of Buildings: 1
Number of Stories: 1 + mezzanine
Age of Buildings: 1977

SITE VISIT CHECKLIST

Size of Buildings: 17,945 ft²

Materials Building Constructed of: masonry perimeter walls, concrete slab foundation, wood framed roof, suspended acoustical ceiling.

Condition and Cleanliness of Buildings and Surrounding Area (Debris, dumps, equipment clutter): Good housekeeping. No staining or debris noted.

Warnings, Notices and Permits Displayed (Type): None noted

Evidence of Past Use (Disturbed areas/patched pavement/demolition remains): Not noted

Odors

Description (Gasoline, paint, chemical): N/A

Location: N/A

Spills

Location: N/A

Description (Size, composition): N/A

Staining (On walls, ceilings, floors, ground, soil, etc.)

Location: N/A

Color: N/A

Description (Size, composition): N/A

Vegetation

Ground Cover (Trees, grass, crops, bare): Landscaping had ivy, bushes, trees, and rock walls

Discoloration (Description/location/probable cause): N/A

Bare Spots (Location/probable cause): N/A

Stunted Vegetation Growth (Location/description): N/A

Increased Vegetation Growth (Location/description): N/A

Topography

Relief (Flat, gently rolling, sloping, hilly, karst): Sharp elevation increase to north. Sloping elevation increase to east, sharp drop in elevation to south and west is relatively level to 130th Ave NE.

Regional and Local Slope: Towards south

Elevation: ~209

Depression/pits/lagoons (Description/location): N/A

Evidence of Fill (Changed topography, immature vegetation, mining activities-description/location): N/A

Source of Fill (Source of information): N/A

Hydrology

Ponds, Streams, Ditches, etc. (Location, direction, distance): N/A

Wetlands (Detailed study required?): N/A

SITE VISIT CHECKLIST

Source of Water (Where water in streams, rivers, ditches is flowing from): N/A

Discharge Points of Water: N/A

Site Receives/Surface Water Run-off from. (Direction): North and east

Run-off from Site Flows to (Direction into inlets, street, adjacent land): South and southwest

Wastewater Discharge: City of Bellevue

Flood Plain: _____

Geology and Hydrogeology (Record Review)

Soil Type. (Clay, sand, loam): Silty sand and gravel

Drainage (Good, fair, poor): Fair

Depth of Bedrock: Unknown

Groundwater Depth/Flow Direction: ~8 ft, inferred south

3.0 STORAGE

USTs

Evidence of On-Site/Adjacent Site UST's (Pipes, vents, pump islands, fill caps, patching): N/A

Monitor Systems (Location): N/A

Contents: N/A

Tank ID #: N/A

Size: N/A

Age: N/A

Tank Type (Steel, fiberglass, composite): N/A

Records (Tightness, testing, inventory): N/A

ASTs

Location: N/A

Contents: N/A

Age/Condition of Tank/Type of Tank/Size: N/A

Evidence of Spills/Leaks/Containment: N/A

4.0 PCBS (TRANSFORMERS, FLORESCENT LIGHT BALLASTS, HYDRAULIC LIFTS)

Type/Number of Equipment: Mounted 4' x 2' – 2 bulb and 8' x 1' bulb fluorescent lights, one transformer, HID lights on building exterior and in "street light" style lights in parking lots.

ID#: _____

Labeled: No "non-PCB" label noted on transformer

Location: Transformer located in NW area of parcel

Condition of Units: rusted, fair

SITE VISIT CHECKLIST

Condition of Surroundings: fair, no staining noted

Owner of Units: ownership not noted on transformer

PCB Content: unknown

5.0 EQUIPMENT USED ON SITE

Type of Equipment (Processing, maintenance): Carpentry tools, tools to manufacture electronic equipment, drills, cutting saws

Location: Warehouse areas

Chemicals Used by Equipment (Process): Unknown

Chemicals Used in Cleaning Equipment (Maintenance): Anti-static cleanser, Sustainable Earth multi-purpose cleaner, denatured alcohol

Cleanliness/Upkeep of Equipment: Good

6.0 UTILITIES (INCLUDE NAME OF PUBLIC UTILITY)

City/Well Water (Age/test results): City of Bellevue

Sewer Water (Leach field, dry wells, age): City of Bellevue

Septic System (Tiles or leach field/age/records): N/A

On-Site Treatment Facility (Lagoons, ponds, age/records): N/A

Power (Company name/age): PSE

Natural Gas (Age): PSE, reg mounted units

7.0 WASTE AND CHEMICAL HANDLING

Size/Numbers Type of Storage Containers: N/A

Location: N/A

Contents: N/A

Condition of Containers (Covered, labeled, corroded): N/A

Disposal Methods (Who/frequency): N/A

Spills/Leaks: N/A

On-Site Chemicals (MSDS) (Get copies): Kept in flammable chemical cabinet

Purpose of Chemicals (Process, cleaning): Cleaning

Use of Herbicides or Pesticides: N/A

8.0 ACMs

ACM Inspector: N/A

Suspect ACMs Observed: N/A

Condition: N/A

Classification: N/A

SITE VISIT CHECKLIST

Location: Deborah Kirchner noted in interview that asbestos had been found in kitchen floor tile mastic.

Quantity: N/A

9.0 LEAD/LEAD IN PAINT

Lead in Paint Inspector: N/A

Maps Checked: N/A

Agency Personnel, Records, Surveys: N/A

Samples (Number, location, date, method): N/A

Maps Checked: N/A

Agency Sources, etc.: N/A

Maps Checked: N/A

Agency Sources, etc.: N/A

10.0 WETLANDS/SEISMIC/OIL AND GAS/HYDROGEOLOGIC/TRANSMISSION TOWER

Maps, Agency Personnel, Records, Surveys Checked: N/A

Description (Reported/observed): N/A

11.0 ADJACENT LAND USE

Property Use (North): Blue Sky Church

Property Use (South): ... Building (EL296). Tenants include Cross Fit 425, The Walk Doctor, and rental company.

Property Use (East): Spectrum Controls

Property Use (West): 130th Avenue NE with Cadman Quarry (EL290) beyond.

Potential Concerns (USTs, ASTs, spills, operations, age): History of spills at Cadman property.

12.0 PAST USE OF PROPERTY AND SURROUNDING AREA

Topography: Gently sloping south

USTs (For on-site USTs include all information): None on site. Former UST's on Cadman property (290) and 297.1.

ASTs (Include all information): Former AST on Cadman property (at least 3)

Solid/Hazardous Waste: _____

Spills and Leaks: Documented tank releases at Cadman and Journal American properties.

13.0 INTERVIEWS

Property Owner/Tenant (Name): Deborah Kirchner

Adjacent Properties: EL290, EL 299

Local Regulatory: Ecology File Review

14.0 MISCELLANEOUS INFORMATION

SITE VISIT CHECKLIST

One pad mounted generator noted on southeast exterior of building. Olympian model D50P4. Per www.equipmentlocator.com this generator utilizes diesel fuel.

One capped soil boring noted on site in southeast parking area.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2014 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc. or its affiliates is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

<u>Year</u>	<u>Target Street</u>	<u>Cross Street</u>	<u>Source</u>

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/11/2014 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 11 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 07/21/2014 has revealed that there are 31 CSCSL sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Ecology's Leaking Underground Storage Tanks Site List.

A review of the LUST list, as provided by EDR, and dated 08/18/2014 has revealed that there are 13

EXECUTIVE SUMMARY

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 07/21/2014 has revealed that there are 24 CSCSL NFA sites within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

SPILLS: Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

A review of the SPILLS list, as provided by EDR, and dated 06/12/2014 has revealed that there are 3 SPILLS sites within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/11/2014 has revealed that there are 72 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, and dated 04/09/2009 has revealed that there is 1 FTTS site within approximately 0.001 miles of the target property.

PURUS TECHNOLOGIES INC	1720 130TH AVE NE SUIT	0 - 1/8 (0.000 mi.)	H95	155

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there is 1

EXECUTIVE SUMMARY

HIST FTTS site within approximately 0.001 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/18/2013 has revealed that there are 37 FINDS sites within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 55 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 6 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Ecology in Washington.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 2 RGA LUST sites within approximately 0.001 miles of the target property.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

Registry ID: 110005334316

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
