

SAFE SYSTEM SPEAKER SERIES

Please join us for a presentation by a nationally recognized road safety expert.

Kristin White is Google's Transportation Industry Executive, helping governments use technology to advance safety, resilience, and economic growth. She was the youngest Federal Highway Administrator ever appointed and previously served as COO of ITS America. A lawyer and former Fulbright Fellow, she's a nationally recognized leader in transportation innovation and a passionate advocate for elevating women in the field.

Date: May 28, 2025

Location: Bellevue City Hall

(450 110th Ave NE, Bellevue, WA 98004)

Room: City Hall Concourse & Council Chambers

Time: Networking reception - 11 a.m.-12 p.m.

Presentation - 12-1 p.m.

Kristin White will present on:

From Code to Curb: Google's Role in Advancing AI for Smart Tech and Safe Streets

Presentation Summary:

In this session, Kristin White, Google's Transportation Industry Executive, explores how artificial intelligence is transforming transportation—from digital platforms to physical streets. Drawing on real-world partnerships and policy experience, Kristin will highlight how AI and data-driven tools can support safer, more equitable, and connected communities. Attendees will gain insights into how public agencies can harness emerging technologies to drive innovation, improve mobility outcomes, and build resilient infrastructure from the code that powers our tools to the curbs that shape our cities.

Networking reception with light refreshments provided by AAA Washington.
