

Innovation Prioritization & Policy Input

2

Help the city of Bellevue prioritize innovation projects. Provide ideas and insights on policy development related to the innovation forum.

Innovation Prioritization

Provide meaningful input to city staff on community innovation priorities through the development of a Bellevue innovation framework. This work will help advance inclusive innovation opportunities in government service delivery.

The future of Bellevue is multidimensional, and city government will keep the trust of its residents by focusing on:

High performance government

Vibrant economy

Safe and efficient transportation system

High quality built and natural environment

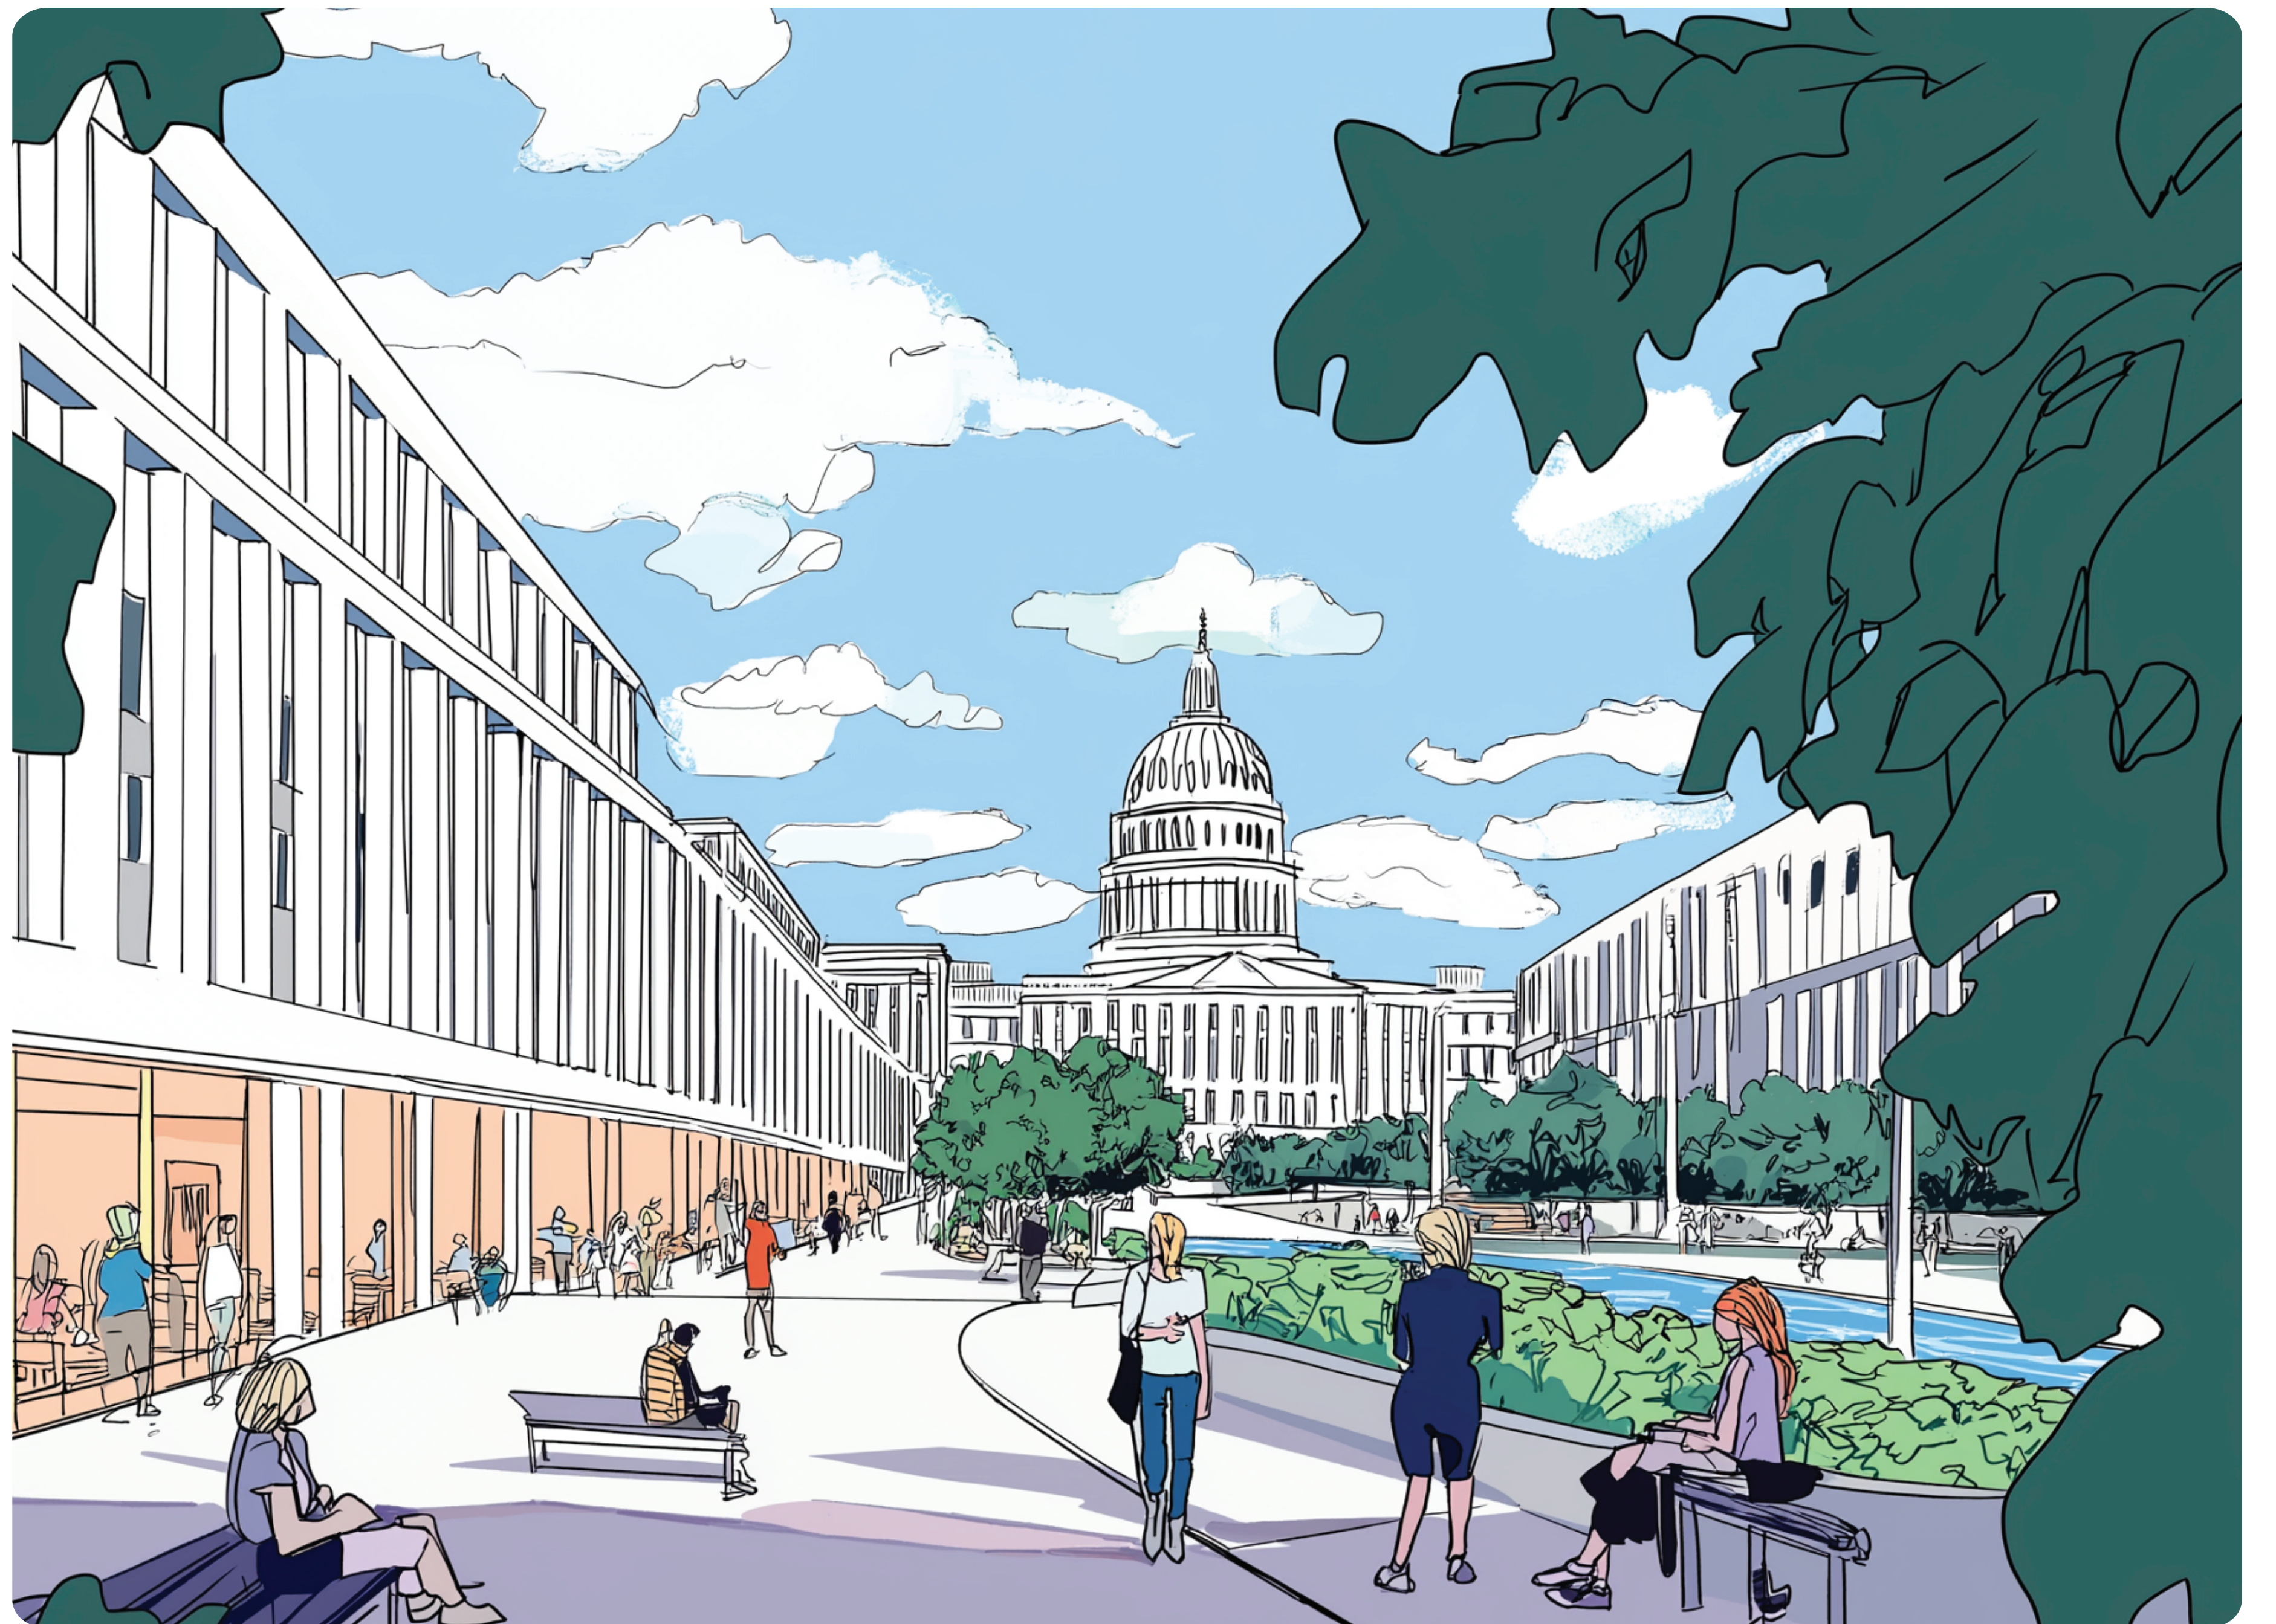

Community safety and health

Thriving people and communities

Policy Input

Discuss and shape potential innovation policies that staff may bring to council for consideration. Policies may address:

Government Innovation Partnership

Government policies can encourage the partnership between community needs and the innovation ecosystem.

Addressing Societal Concerns

Policies can be designed to mitigate potential negative impacts of technology, such as privacy violations, equity, and environmental concerns.

Promoting Collaboration

Government initiatives can facilitate partnerships between academia, industry, and research institutions, fostering knowledge sharing and accelerating innovation.

Bellevue needs your input and support

What are your initial impressions on innovation prioritization and policy input?

What are initial ideas for innovations that will positively impact our community?

How can Bellevue policies accelerate innovation in the community?

Please fill out your community feedback cards and leave them at the check-in desk.
