January 1, 2025 Updates & 2025 Right-of-Way Procedures Manual

The current Right-of-Way Procedures Manual published on the city's website is new. The new manual provides a central location for a comprehensive list of existing procedures previously available on the right-of-way resources webpage, in addition to rules and procedures that were not previously published on the website.

The right-of-way management team will review the manual annually, incorporate necessary updates and summarize the list of changes from the previous year in the table below.

Please note there are no updates or revisions reflected for 2024 as this is the first year of the manual's publication.

Revisions to Right-of-Way Procedures (2024)

Last updated: February 7, 2025

Section	Date of Change	Type of Change (New/Deleted/Revision)	Summary of Change
