

South Bellevue Station Neighborhood Improvements Project

Let us know what you think about options to reduce vehicle speeds on 112th Avenue SE

In response to community concerns, the City of Bellevue Transportation Department is working on a project to reduce vehicle speeds on 112th Avenue SE near your home (see map). The speed reduction project is part of a wider neighborhood project to fill gaps in the sidewalk that leads to the South Bellevue light rail station.

We often make more than one change to a road when we try to reduce speeds. The changes to the road will be selected based on design considerations, community feedback and available budget. As we start to design this project, we'd like to get your feedback.

Take our short survey!

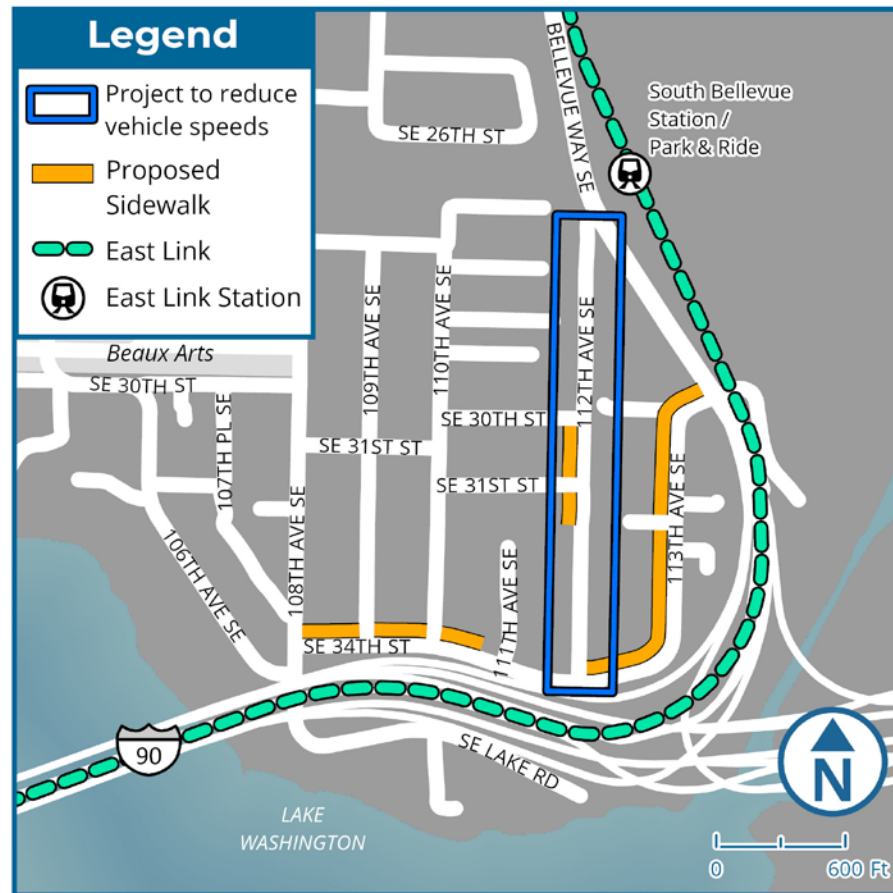

Respond to the short, anonymous survey available at bit.ly/112avespeed or by scanning the QR code by January 19, 2024 to let us know what you think about different options to reduce vehicle speeds along this road. If you'd like a hard copy of the survey, please reach out via the contact information below.
