Final Design/Permitting/Contractor Selection.....Q3 2025-Q4 2027

Construction Q1 2028-Q4 2030

** Subject to change*

Meydenbauer South Reservoir Project

Bellevue Utilities needs to provide additional water storage to meet forecasted growth in the downtown, Wilburton, Bel-Red and adjoining neighborhood areas by 2030. The Meydenbauer neighborhood on Utility-owned property at 601 96th Avenue Southeast was selected as the location for a new reservoir, together with a pump station and a transmission water main from the site to downtown.

Community Outreach Meeting

The Project team will host several community outreach meetings over the next few years as the project moves through the design, permitting, and construction phases. These meetings will continue to provide project information and opportunities for dialogue with the community.
