East Link construction impacts to Bellevue City Hall

Accessing Bellevue City Hall during East Link construction may be challenging in the coming years, and we ask for your patience. The area around City Hall is an active construction zone. Please be safe and follow all flaggers' instructions and construction signs.

Visitor parking at City Hall will be prioritized for customers who are conducting business with the city

or attending some city meetings including City Council meetings, public hearings, advisory boards and commission meetings.

City staff are committed to providing you exceptional customer service. Plan your next trip to City Hall by allowing extra time to complete your business with us. We look forward to serving you.

Starting in June 2017 and continuing for a few years, Sound Transit's construction to build East Link light rail will impact how you access Bellevue City Hall. The Bellevue Downtown Station is being built at the northern portion of the plaza area and will be connected to the tunnel that is being built under 110th Avenue NE. This construction is expected to be complete in late 2020.

Construction impacts near and on the City Hall campus include:

- Less visitor parking available during and after construction
- Permanent closure of the NE 6th Street access
- Construction work zone at the vacant lot adjacent to City Hall
