Description and Scope

This project will complete design and fund construction of neighborhood congestion projects that address and ease congestion for motor vehicles within, near and/or connecting neighborhoods to services to improve access and mobility.

Rationale

In November 2016, the residents of Bellevue approved Proposition 2 which assessed a \$0.15 per \$1,000 levy to fund Neighborhood Safety, Connectivity and Congestion Management projects. This project addresses Council's desire to provide approximately \$2 million per year for design analysis work on intersection and roadway projects that would improve neighborhood access/egress. At Council direction, funds may be used to leverage other funding sources, or as contribution to levy-backed construction.

Environmental Impacts

There are no environmental impacts associated with this project fund. Should Council elect to fund project construction utilizing levy funds then a project-specific environmental study may be required.

Operating Budget Impacts

Operating costs for this program will be determined on a project specific basis as required.
