

Development Services Organizational Chart

Development Services offers one-stop permit shopping for land and building development in Bellevue and the surrounding service areas. Planners, engineers, inspectors, code compliance officers and support staff from the Development Services Building, Land Use, Fire, Transportation and Utilities departments help homeowners, business owners and professionals in the construction industry navigate the permitting process. Our work entails reviewing plans, inspecting projects and investigating code violations. This service ensures that projects are safe and aligned with federal, state and city codes.
